discovered that whenever we experience any type of loss whether it's life changing or a minor inconvenience we go through eight different emotional and physical stages known as The Grieving Process. Discovering this information brought comfort and healing to Tammy and she desires to encourage others during their grieving by educating them on The Grieving Process. Each chapter of *Journey through the 8 Stages of Grief* contains four sections to help those who are grieving work through their pain. The first section explains a specific stage of grieving and shares what to expect during that stage. The second section contains Tammy's unfiltered journal entries which chronicle how she navigated through that stage. The third section gives practical steps on how to work through that stage of grieving. It also gives a list of suggestions for friends and family members who want to help someone going through a difficult time. The last section of each chapter gives Bible verses to provide comfort and encouragement. Because we will all experience several losses during our lives, it is a tremendous help to know what to expect and what to do during these times of suffering.

Professor Dennis Klass, Webster University. *Dying, Death and Grief* is written for anyone who provides support to adults following bereavement. Whether in a professional or voluntary capacity, bereavement care requires empathy, judgement, and skill to ensure your response matches the needs of the person you are helping. Recognizing that we all experience bereavement differently, this book introduces theory and skills which can be used in any context to address a wide range of needs. The author explains the theoretical background to attachment and loss, and the core skills needed to support people who have been bereaved. Case studies and personal accounts illustrate key points, and exercises help you examine your own experiences and attitudes in relation to loss. The book also takes into account topics frequently overlooked in other texts, such as sexuality, spiritual responses to loss, cultural influences, and diversity, as well as the nature of chronic and disenfranchised grief. *Dying, Death and Grief* is designed for use on a wide range of training and academic courses that prepare practitioners to work with the bereaved. Professionals in a range of settings, including hospitals and in the community, as well as volunteers and befrienders in hospices and nursing homes, will find this a useful source of guidance.
