Scientific, Environmental, and Political Issues in the Circum-Caspian Region M.H. Glantz, Igor S. Zonn, 2013-11-11 On behalf of the Russian Federation Committee on Water Economy I would like to welcome the participants of the NATO sponsored Workshop on the Problems of the Caspian Sea and the Circum Caspian States The world's largest intercontinental sea lake is well known for its wealth mineral and fuel resources and sturgeon stocks the products of which oil and caviar are in constant demand on the world market During the last half century the Caspian Sea has been the focus of the scientific community concerned with its level fluctuations We were and still are solving a two faceted issue to rescue the Caspian Sea and to rescue the population from the Caspian Sea To rescue the Caspian Sea is to address a broad spectrum of environmental issues related primarily to water pollution by waste water and petroleum products To rescue the population from the Caspian Sea means that an almost 2.5 m sea level rise in the last two decades has resulted in flooding of vast coastal areas deteriorating economic and social spheres of activity Solutions to these issues are linked to the numerous mysterious aspects of recent Caspian Sea behavior Regrettably the collapse of the USSR has led to a decline of marine observations and control over the use of marine

resources in the region Coordinated international action on the protection of living marine resources have terminated generating disastrous consequences

The East Asian Welfare Model Roger Goodman, Huck-Ju Kwon, Gordon White, 2006-12-05 For many politicians and observers in the West East Asia has provided a broad range of positive images of the state's intervention in society Neoliberals grew excited by popular welfare systems that cost little in expenditure and bureaucracy Social democrats thought they had found a model for social cohesion and equality In fact the reality in East Asia is rather different from these stereotypes In this book six specialists of six different societies in East Asia Japan South Korea Taiwan China Singapore and Hong Kong examine the role of the state in their welfare systems There are detailed case

studies on pensions health insurance housing and personal social services They provide an up to date detailed account of how these systems have developed as well as an examination of the question of whether these welfare regimes are the natural outgrowth of cultural traditions or the result of economic and political conditions This broad ranging and detailed study will be welcomed by both students and policy makers as the first proper academic study in English to have such a wide coverage of this topic Its clarity and authority should come as a welcome alternative to the more common misconceptions about Asian society
