Low Level Radioactive Waste From Cradle To Grave:

Low-level Radioactive Waste Edward L. Gershey, 1990 **TECHNICAL Decision-making and Radioactive Waste Disposal** Andrew Newman, Gerry Nagtzaam, 2015-11-19 The International Atomic Energy Agency estimates that nuclear power generation facilities produce about 200 000 cubic meters of low and intermediate level waste each year Vital medical procedures industrial processes and basic science research also produce significant quantities of waste All of this waste must be shielded from the population for extended periods of time Finding suitable locations for disposal facilities is beset by two main problems community responses to siting proposals are generally antagonistic and as a result governments have tended to be reactive in their policy making Decision making and Radioactive Waste Disposal explores these issues utilizing a linear narrative case study approach that critically examines key stakeholder interactions in order to explain how siting decisions for low level waste disposal are made Five countries are featured the US Australia Spain South Korea and Switzerland This book seeks to establish an understanding of the political economic environmental legal and social dimensions of siting across those countries This valuable resource fills a gap in the literature and provides recommendations for future disposal facility siting efforts The book will be of interest to students and scholars of environmental law justice management politics energy and security policy as well as decision makers in government and industry **Hazardous Waste and Solid** David H.F. Liu, Bela G. Liptak, 1999-12-16 Hazardous Waste and Solid Waste covers the life of municipal solid waste bulky C D waste and hazardous waste It provides in depth coverage on all aspects of waste characterization treatment disposal and recovery The book identifies the sources of solid waste provides general information of the quantities of waste generated and discarded and examines the potential effects of solid waste on daily life and the environment It also defines hazardous waste and provides the criteria environmental engineers must use to determine if material is indeed a waste The editors give attention to the unique problems of risk assessment including the Hazard Ranking System and the National Priority List and transport of hazardous materials It addresses radioactivity individually with sections devoted to the principles and sources of radioactivity safety standards detection analysis recovery low level radioactive waste and high level radioactive waste The guide explores municipal waste reduction material recovery and refuse derived fuel within a catalog of options for solid waste Hazardous and Solid Waste is an excellent fundamental resource for those involved in any aspect of waste management B la G Lipt k speaks on Post Oil Energy Technology on the AT T Tech Channel **Radioactive Waste Management** ,1981 **The 1996 Baseline Environmental Management Report** ,1996 **The State of Development of Waste Forms for Mixed Wastes** National Research Council, Division on Earth and Life Studies, Commission on Geosciences, Environment and Resources, Committee on Mixed Wastes, 1999-07-02 **Battleground: Environment** Robin Morris Collin, 2008-07-30 The environment inflames passions in people on all points of the political spectrum Controversies over such issues as the rise of cancer in industrialized countries climate change and urban sprawl have skyrocketed as we

recognize the impact that humans have on the environment Many people become immersed in these controversies at a local level before they know much about the topic the nuances of many environmental conflicts are often overlooked as the media focuses on the adversarial nature of the conflict This reference resource provides students teachers librarians and citizens as a whole with the necessary first step in understanding these hot button issues Each entry identifies the issue involved who was holding various points of view or positions where and when the conflict occurred and explains the cultural social and political context and dimensions of the conflict Battleground Environment provides in depth analysis of over 100 of the most controversial topics involving the environment including childhood asthma the Kyoto Summit and Treaty smart growth the Three Gorges Dam in China and genetically modified food Entries include descriptions of public policies and discussions of the future of the controversy Each entry concludes with cross references and a short relevant bibliography suitable for student research The resource includes numerous sidebars that discuss in detail particular local controversies that illuminate the complexity of the topics discussed
