Low Attainers In Primary Mathematics The Whisperers And The Maths Fairy:

Low Attainers in Primary Mathematics Jenny Houssart, 2013-04-15 Investigates why so many children opt out of maths at an early age Raising maths performance is a key government objective Highly readable observation of children in primary schools Includes practical implications for classroom practice Teachers will recognise the descriptions of the I don't know children and the maths fairy

Low Attainers in Primary Mathematics Jenny Houssart, 2013-04-15 In this fascinating book Jenny Houssart draws on close observations with children in lower mathematics sets in primary schools to investigate why some children opt out of mathematics at an early age After introducing us to the children she addresses a particular type of mathematical task in each chapter including mental work practical work written work calculators and computers assessment tasks Through the use of stories and quotes the author shows how the children respond to specific tasks and presents evidence of a range of difficulties that emerge as the children are working Each chapter ends with discussions and implications for classroom practice *Low Attainers in Primary Mathematics* will be a useful resource for primary teachers student teachers SENCOs and teaching assistants who will all recognise these children from their own classrooms and draw insights from this highly readable book

Low Attainers in Primary Mathematics Berinderjeet Kaur, 2012 *Low Attainers in Primary Mathematics* focuses on data from students in Singapore schools It is widely acknowledged that students from Singapore do well in mathematics in international studies This book provides readers with a glimpse of students from Singapore who are at the other end of the ability spectrum The book is based on a study that explored the mathematics content knowledge of Primary 4 low attainers in mathematics their behaviours affects and home backgrounds and learning experiences Based on the findings of the study the book has recommendations for teachers of low attainers in primary mathematics This book serves as a must have resource for teachers and graduate students in Singapore who are working with or studying low attainers in primary mathematics It also makes a worthy contribution towards literature on low attainers in the field of mathematics education

EBOOK: Raising Achievement in Secondary Mathematics Anne Watson, 2006-06-16 This book brings together research and professional knowledge to enhance the teaching of lower attaining students in secondary mathematics Attainment in mathematics is an important social issue since underachievement can make a difference to future life choices particularly amongst certain groups of students *Raising Achievement in Secondary Mathematics* shows how well meant teaching strategies and approaches can in practice exacerbate underachievement in maths by making inappropriate demands on learners As well as criticizing some of the teaching and grouping practices that are considered normal in many schools the book also offers an alternative view of attainment and capability based on real classroom incidents in which low attaining students show themselves to be able to think about mathematics in quite sophisticated ways The author argues that teaching could be based on learners proficiency rather than on correcting deficits in knowledge and behaviour She describes how a group of teachers who believed that their students

could do better with higher expectations developed a range of principles and strategies to support their work the students showed significant progress and the teachers felt they were doing a better job With numerous case studies ideas and teaching strategies this book is for anyone who is teaching or learning to teach mathematics PISA Equations and Inequalities Making Mathematics Accessible to All OECD,2016-06-20 More than ever students need to engage with mathematical concepts think quantitatively and analytically and communicate using mathematics All these skills are central to a young person s preparedness to tackle problems that arise at work and in life beyond the classroom **Enabling Mathematics Learning of Struggling Students** Yan Ping Xin,Ron Tzur,Helen Thouless,2022-07-11 This book provides prospective and practicing teachers with research insights into the mathematical difficulties of students with learning disabilities and classroom practices that address these difficulties This linkage between research and practice celebrates teachers as learners of their own students mathematical thinking thus contributing an alternative view of mathematical progression in which students are taught conceptually The research based volume presents a unique collaboration among researchers in special education psychology and mathematics education from around the world It reflects an ongoing work by members of the International Group for the Psychology of Mathematics Education PME and the North American Chapter of the PME Working Groups The authors of chapters in this book who have been collaborating extensively over the past 7 years are from Australia Canada the United Kingdom and the United States *The Handbook of Mathematics Teacher Education: Volume 4* ,2008-01-01 The Handbook of Mathematics Teacher Education the first of its kind addresses the learning of mathematics teachers at all levels of schooling to teach mathematics and the provision of activity and programmes in which this learning can take place It consists of four volumes Volume 4 of this handbook has the title The Mathematics Teacher Educator as a Developing Professional The volume seeks to complement the other three volumes by focusing on knowledge and roles of teacher educators working with teachers in teacher education processes and practices In this respect it is unique Chapter authors represent a community of teacher educators world wide who can speak from practical professional and theoretical viewpoints about what it means to promote teacher education practice The volume is in 3 main sections In the first we focus on Challenges to and Theory in Mathematics Teacher Education Here authors write from perspectives of theory and or challenge and relate this to examples and insights from their practice The second section Reflection On Developing as a Mathematics Teacher Educator has four autobiographical chapters in which authors delineate their experiences as teacher educators and relate these to theoretical and or moral standpoints In Section 3 Working With Prospective and Practising Teachers What We Learn What We Come to Know authors write from perspectives on practice in many cases the practices in which they themselves have engaged and relate this to theoretical perspectives and rationales for teacher education programmes The volume also has an introductory chapter in which the purpose and content of the volume is set out and a final chapter that synthesises themes and issues from the chapters as a whole offering an overview of

the field and suggesting future directions Bibliographical Information for the complete set VOLUME 1 Knowledge and Beliefs in Mathematics Teaching and Teaching Development Peter Sullivan Monash University Clayton Australia and Terry Wood Purdue University West Lafayette USA eds paperback 978 90 8790 541 5 hardback 978 90 8790 542 2 ebook 978 90 8790 543 9 VOLUME 2 Tools and Processes in Mathematics Teacher Education Dina Tirosh Tel Aviv University Israel and Terry Wood Purdue University West Lafayette USA eds paperback 978 90 8790 544 6 hardback 978 90 8790 545 3 ebook 978 90 8790 546 0 VOLUME 3 Participants in Mathematics Teacher Education Individuals Teams Communities and Networks Konrad Krainer University of Klagenfurt Austria and Terry Wood Purdue University West Lafayette USA eds paperback 978 90 8790 547 7 hardback 978 90 8790 548 4 ebook 978 90 8790 549 1 VOLUME 4 The Mathematics Teacher Educator as a Developing Professional Barbara Jaworski Loughborough University UK and Terry Wood Purdue University West Lafayette USA eds paperback 978 90 8790 550 7 hardback 978 90 8790 551 4 ebook 978 90 8790 552 1 **Primary Teaching**

Assistants Curriculum in Context Carrie Cable, 2014-03-18 Teaching assistants are uniquely placed to support children's involvement with learning through the curriculum This book explores those issues that are central to that process Specifically it examines strategies for supporting learning and assessment in English maths and science inclusive and imaginative practices in all areas of learning home and community contexts for learning working practices which support professional development This book is written primarily for learning support staff **Emerging Curriculum** Andrew J.C. Begg, 2008-01-01 An important contribution that Emerging curriculum makes is a reconceptualizing of the curriculum development process This moves development thinking from the traditional research development dissemination model to one that acknowledges the interrelatedness of many influences on curriculum the multi layered nature of curriculum and the complexity of the educational system in which curriculum exists Indeed the educational system is envisaged as a complex living system The study is autobiographical it is based on a lifetime spent in education during which the author had a particular interest in curriculum and the associated development processes and how one's ideas about these change over time Emerging curriculum has been successfully submitted as a PhD thesis but was written as a book for a wider audience than the traditional thesis one It shows by example how reflection on one's work throughout one's career can be considered as research and can contribute to knowledge in a similar way to that of more traditional doctoral research projects It is hoped that teachers reading this will relate to the author's experiences in schools and will see themselves significant contributors to curriculum that curriculum developers will be provoked into considering alternative ways of working and that academics might move curriculum theorising closer to the reality of schools **The British National Bibliography** Arthur James Wells, 2005 STIMULUS DAN RESPON DALAM PEMBELAJARAN MATEMATIKA Torang Siregar, S.Pd., Gr., M.Pd., 2025-04-15 Buku ini membahas secara mendalam tentang dinamika stimulus dan respons dalam pembelajaran matematika menggabungkan pendekatan teoretis dan praktis untuk meningkatkan efektivitas pengajaran Matematika sering
