Lubetkin Architecture And The Tradition Of Progress:

Berthold Lubetkin John Allan,2012 **Berthold Lubetkin** John Allan,2012 This is a comprehensive study on the life and work of modernist architect Berthold Lubetkin This book reveals the man behind the architecture a survivor of the Russian Revolution European traveller and social commentator an intellectual in Europe and a well known social activist in Britain throughout the 20th century **Berthold Lubetkin** John Allan,2023-09-15 This book presents a compact and compelling account of the life and work of Berthold Lubetkin 1901 1990 widely regarded as the outstanding architect of his generation to practise in England It explores the key themes achievements and setbacks of his career drawing from the author s twenty year personal friendship with Lubetkin himself from discussions with former colleagues and from his direct experience of working with many of Lubetkin s buildings as a conservation architect The study reveals the significance of Lubetkin s Russian origins and European travels re assesses his prime work of the 1930s and charts the extensive output of his often overlooked post war career It also considers Lubetkin s legacy in the later work of his key associates several of whom became significant architects in their own right Lubetkin is a legendary figure in architectural circles while still remaining slightly mysterious and misunderstood The author shines new light on the man and his ideas and assesses his unique place in modern architectural history Illustrations include original black white images as well as high quality colour studies of the buildings as they are now A complete List of Works and published commentaries also provide a valuable source of reference

Building Theories Franca Trubiano,2022-11-25 Building Theories speaks to the value of words in architecture It addresses the author s fascination with the voices of architects engineers builders and craftspeople whose ideas about building have been captured in text It discusses the content of treatises essays articles and letters by those who have been throughout history committed to the art of building In this Building Theories argues for the return of a practice of architectural theory that is set amongst building buildings and builders This journey of close reading reinterprets the words of Vitruvius Alberti de L Orme Le Camus de M zi res Boull e Laugier Rondelet Semper Viollet le Duc H bsch B tticher Berlage Muthesius Wagner Behrendt Gropius and Arup With chapters dedicated to texts from antiquity the Renaissance and the nineteenth century and with a critical eye on architectural theory popularized in the Anglo Saxon world post 1968 readers are introduced to a wider more inclusive definition of architectural ideas Building Theories considers how contemporary scholarship has steered away from the topic of building in its reluctance to admit that both design and construction are central to its concerns In response it argues for a realignment of architecture with the concept of techn with a dual commitment to fabrica e ratio with a productive return to l art de bien bastir with the accurate translation of the term Baukunst and with an appeal to the architect s composite mind Students practitioners and educators will identify in Building Theories ways of thinking that strive for the integration of design with construction reject the supposed primacy of the former over the latter recognize how aesthetics are an insufficient scaffold for subtending the subject of architectural ethics

and accept without reservation that material transformations have always been at the origins of built form **Berthold Lubetkin's Highpoint II and the Jewish Contribution to Modern English Architecture** Deborah Lewittes, 2018-05-15 In 1935 the Russian born Jewish architect Berthold Lubetkin and his firm Tecton designed Highpoint a block of flats in London which Le Corbusier called revolutionary Three years later Lubetkin completed a companion design Yet Highpoint II felt very different and the sense that the ideals of modernism had been abandoned seemed hard to dispute Had modern architecture failed to take root in England This book challenges the belief that English architecture was on hiatus during the 1930s Using Highpoint II as a springboard Deborah Lewittes takes us on a journey through the defining moments of modern English architecture the high points of the period surrounding Highpoint II Drawing on Lubetkin's work and his writings the book argues that he advanced influential lasting theories which were rooted in his design for Highpoint II Lubetkin's work is explored within the context of wider Jewish emigration to London during the interwar years as well as the anti-Semitism that pervaded Britain during the 1930s As Lewittes demonstrates this decade was anything but quiet Providing a new perspective on twentieth century English architecture this book is of interest to students and scholars in architectural history urban studies Jewish studies and related fields *The Coming of the Aerial War* Michele Haapamäki, 2014-01-08 In the first half of the 20th century the possibility of flight opened up entirely new avenues of thought and exploration In the age of H G Wells and Biggles the opening up of the air to balloons and planes the Royal Flying Corps was founded in 1912 appealed to concepts of courage and bravery which would be both encouraged and undermined by the experiences of World War I The sky also held new terrors for everyday people who were now within reach of an airborne enemy these fears included the possibilities of bombing poison gas surveillance and social control This duality of fear and enthusiasm drove the Air Raid Precaution movement while vocal elements in the press and in parliament called for radical plans to cope with apocalyptic scenarios Here Michele Haapamäki charts the history of flight and of war in the air in the early twentieth century addressing the key issues of interwar historiography such as patriotism fear masculinity and propaganda **From Space in Modern Art to a Spatial Art History** Jutta Vinzent, 2019-12-02 This book traces artists theories of constructive space in the first half of the twentieth century Drawing on these concepts and recent theories on space it develops a methodology termed Spatial Art History that conceives of artworks as physical spatio-temporal things which produce the social to overcome the reductive understanding of art as a mere mirror or facilitator of society *Architecture* Jonathan Hill, 2014-04-04 The aim of this book is to expand the subject and matter of architecture and to explore their interdependence There are now many architectures This book acknowledges architecture far beyond the familiar boundaries of the discipline and reassesses the object at its centre the building Architectural matter is not always physical or building fabric It is whatever architecture is made of whether words bricks blood cells sounds or pixels The fifteen chapters are divided into three sections on buildings spaces and bodies which each deal with a particular understanding of architecture and architectural matter The richness and

diversity of subjects and materials discussed in this book locates architecture firmly in the world as a whole not just the domain of architects In stating that architecture is far more than the work of architects this book aims not to deny the importance of architects in the production of architecture but to see their role in more balanced terms and to acknowledge other architectural producers Architecture can for example be found in the incisions of a surgeon the instructions of a choreographer or the movements of a user Architecture can be made of anything and by anyone 100 Houses 100 Years Twentieth Century Society,2018-02-15 A fascinating insight into Britain s built heritage and the diverse housing styles of the twentieth and twenty first century This book showcases 100 houses one from each year from 1914 that represent the range of architectural styles throughout the years and show how housing has adapted to suit urban life Each house is accompanied by stunning photography and texts written by leading architectural critics and design historians including Gavin Stamp Elain Harwood Barnabas Calder Ellis Woodman and Gillian Darley From specially commissioned architect designed houses for individuals and for families to housing built for increased workforces each of the 100 houses brings a different design style or historical story There are houses built as part of garden cities semi detached suburban houses housing estates eco houses almshouses converted factories and affordable post war homes The architectural styles encompass mock Tudor modernist Arts Crafts and brutalist and the featured architects include Giles Gilbert Scott Walter Gropius Edwin Lutyens Powell and Moya and David Chipperfield The book also contains essays that explore the social and political aspects of housing design in Britain over the last 100 years looking at the impact the World Wars had on housing exploring domestic technology and building materials and asking how the modern house came about Whether exploring Grayson Perry s folly like House for Essex Patrick Gwynne s modernist glass villa in Surrey Sarah Wigglesworth s Straw Bale House or Simon Conder s black rubber clad fisherman s hut in Dungeness this book gives a glimpse into the wonderful housing in Britain and is a must have for all fans of design history and architecture The Other Modern Movement Kenneth Frampton,2022-01-25 A revealing new look at modernist architecture emphasizing its diversity complexity and broad inventiveness Usually associated with Mies and Le Corbusier the Modern Movement was instrumental in advancing new technologies of construction in architecture including the use of glass steel and reinforced concrete Renowned historian Kenneth Frampton offers a bold look at this crucial period focusing on architects less commonly associated with the movement in order to reveal the breadth and complexity of architectural modernism The Other Modern Movement profiles nineteen architects each of whom consciously contributed to the evolution of a new architectural typology through a key work realized between 1922 and 1962 Frampton s account offers new insights into iconic buildings like Eileen Gray s E 1027 House in France and Richard Neutra s Kaufmann House in Palm Springs California as well as lesser known works such as Antonin Raymond s Tokyo Golf Club and Alejandro de la Sota s Maravillas School Gymnasium in Madrid Foregrounding the ways that these diverse projects employed progressive models advanced new methods in construction techniques and displayed a new sociocultural awareness
