Rethinking the Mind-Body Relationship in Early Modern Literature, Philosophy, and Medicine Charis Charalampous, 2015-08-20 This book explores a neglected feature of intellectual history and literature in the early modern period the ways in which the body was theorized and represented as an intelligent cognitive agent with desires appetites and understandings independent of the mind It considers the works of early modern physicians thinkers and literary writers who explored the phenomenon of the independent and intelligent body

Charalampous rethinks the origin of dualism that is commonly associated with Descartes uncovering hitherto unknown lines of reception regarding a form of dualism that understands the body as capable of performing complicated forms of cognition independently of the mind The study examines the consequences of this way of thinking about the body for contemporary philosophy theology and medicine opening up new vistas of thought against which to reassess perceptions of what literature can be thought and felt to do Sifting and assessing this evidence sheds new light on a range of historical and literary issues relating to the treatment perception and representation of the human body This book examines the notion of the thinking body across a wide range of genres topics and authors including Montaigne s Essays Spenser s allegorical poetry Donne s metaphysical poetry tragic dramaturgy Shakespeare and Milton s epic poetry and shorter poems It will be essential for those studying early modern literature cognition and the body

**Writing, Geometry and Space in Seventeenth-Century England and America** Jess Edwards, 2018-12-07 The early modern map has come to mark the threshold of modernity cutting through the layered customs of Medieval parochialism with its clean expansive geometries Re thinking the role played by mathematics and cartography in the English seventeenth century this book argues that the cultural currency of mathematics was as unstable in the period as that of England s controversial enclosures and plantations Reviewing evidence from a wide range of literary and scientific courtly and pragmatic texts Edwards suggests that its unstable currency rendered mathematics necessarily rhetorical subject to constant re negotiation Yet he also finds a powerful flexibility in this weakness Mathematized texts from masques to maps negotiated a contemporary ambivalence between Calvinist asceticism and humanist engagement Their authors promoted themselves as artful guides between virtue and profit the study and the marketplace This multi disciplinary work will be of interest to all disciplines affected by the recent spatial turn in early modern cultural studies and particularly to students and researchers in literature history and geography

**Ecocriticism and Early Modern English Literature** Todd A. Borlik, 2011-05-11 In this timely new study Borlik reveals the surprisingly rich potential for the emergent green criticism to yield fresh insights into early modern English literature Deftly avoiding the anachronistic casting of sixteenth and seventeenth century authors as modern environmentalists he argues that environmental issues such as nature s personhood deforestation energy use air quality climate change and animal sentience are formative concerns in many early modern texts The readings infuse a new urgency in familiar works by Shakespeare Sidney Spenser Marlowe Raleigh Jonson Donne and Milton At the same time the book forecasts how ecocriticism will bolster the reputation of less canonical authors like Drayton Wroth Bruno Gascoigne and Cavendish Its chapters trace provocative affinities between topics such as Pythagorean ecology and the Gaia hypothesis Ovidian tropes and green phenomenology the disenchantment of Nature and the Little Ice Age and early modern pastoral poetry and modern environmental ethics It also examines the ecological onus of Renaissance poetics while showcasing how the Elizabethans sense of a sophisticated interplay between nature and art can provide a precedent for ecocriticism s current understanding of the relationship

between nature and culture as mutually constructive Situating plays and poems alongside an eclectic array of secondary sources including herbals forestry laws husbandry manuals almanacs and philosophical treatises on politics and ethics Borlik demonstrates that Elizabethan and Jacobean authors were very much aware of and concerned about the impact of human beings on their natural surroundings

**Binding the Absent Body in Medieval and Modern Art** Emily Kelley, 2017-07-05 This collection of essays considers artistic works that deal with the body without a visual representation It explores a range of ways to represent this absence of the figure from abject

elements such as bodily fluids and waste to surrogate forms including reliquaries manuscripts and cloth The collection focuses on two eras medieval and modern when images referencing the absent body have been far more prolific in the history of art In medieval times works of art became direct references to the absent corporal essence of a divine being like Christ or were used as devotional aids By contrast in the modern era artists often reject depictions of the physical body in order to distance themselves from the history of the idealized human form Through these essays it becomes apparent even when the body is not visible in a work of art it is often still present tangentially Though the essays in this volume bridge two historical periods they have coherent thematic links dealing with abjection embodiment and phenomenology Whether figurative or abstract sacred or secular medieval or modern the body maintains a presence in these works even when it is not at first apparent
