Essays on Nominal Determination Henrik Høeg Müller, Alex Klinge, 2008 This volume brings together scholars of diverse theoretical persuasions who all share an interest in capturing the role that nominal determination and reference assignment play in the complicated interplay between thought language and communication The articles can be divided roughly into five main areas of concern the conceptual level of determination the emergence and function of articles their semantic contribution to nominal interpretation the morphology and syntax of determiners and the

interplay and contrasts between articles demonstratives and possessives Thus linguistic and philosophical issues in the subject field of nominal determination are addressed at all interface levels between morphology syntax semantics and pragmatics This volume shows that different theoretical frameworks may be brought fruitfully together in the effort to formulate new analyses of well known problems but also to raise new questions and point to new areas which may prove interesting topics for future research both in functional and formal paradigms A Primitive Arcadia Ellis Silas,1926
