Natal Province Of Contrasts:

Natal, Province of Contrasts Gerald S. Cubitt, 1981 South Africa as a Multi-Ethnic Society Godfrey

Mwakikagile, 2010-06 The author looks at South Africa as a society whose multiple ethnic identities collectively constitute what is probably the most dynamic and most productive country on the continent The country's ethnic diversity is a source of strength It also poses challenges although South Africa has not fractured along ethnic lines as some countries have The work is also a telescopic survey of the country's history geography and cultural landscape providing a comprehensive picture of this vibrant nation whose population includes immigrants from other parts of the continent who have flocked into South Africa in large number since the end of apartheid Their presence in the rainbow nation has also been a source of tension between the immigrants and black South Africans especially in the poverty stricken townships across the country The immigrants have also contributed to the nation's ethnic and cultural diversity which is one of the prominent features of the South African society The book may serve members of the general public who are learning about South Africa for the first time It may also be helpful to students including those going to South Africa Those who specialise in South Africa may also find this work to be useful

South Africa and Its People Godfrey Mwakikagile, 2008 This work looks at South Africa and its people including all the racial and ethnic groups in all the provinces and their different cultures It's also a general historical background of South Africa since the founding of the country Also the country's natural resources in every province is one of the subjects covered in the book African immigrants in South Africa a relatively new group in the country especially since the end of apartheid is another subject addressed by the author And there's much more that's covered in this work

Crustal Evolution of Southern Africa A. J. Tankard, Martin Martin, K. A. Eriksson, D. K. Hobday, D. R. Hunter, W. E. L. Minter, 2012-12-06

Syntheses of the geology of major areas of the Earth's crust are increasingly needed in order that the features of and the problems associated with the secular evolution of the continents can be understood by a wide audience Southern Africa is fortunate in having a remarkable variety of geological environments developed without many breaks over 3.8 Ga and many of the rock groups are household names throughout the geological world In one respect the geology of Southern Africa is particularly important cratonization clearly began as early as 3.0 Ga ago in contrast to about 2.5 Ga in most other continental areas such as North America This book documents very well the remarkable change in tectonic conditions that took place between the Early and Mid Precambrian we have here evidence of the very earliest development of rigid lithospheric plates This book is a tribute to the multitudes of scientists who have worked out the geology of Southern Africa over many years and decades Whatever their discipline each provided a step in the construction of this fascinating story of 3.8 Ga of crustal development In the book the reader will find a detailed review of the factual data together with a balanced account of interpretative models without the indulgence of undue speculation One of its attractions is its multidisciplinary approach which provides a stimulating challenge to the reader

Climate Prediction and Agriculture Mannava VK Sivakumar, James Hansen, 2007-05-26

Improved adaptation of food production particularly in areas where climate variability is large holds the key to improving food security for human populations Increasing climate knowledge and improved prediction capabilities facilitate the development of relevant climate information and prediction products for applications in agriculture to reduce the negative impacts due to climate variations and to enhance planning activities based on the developing capacity of climate science This book based on an International Workshop held in Geneva in 2005 reviews the advances made so far in seasonal climate predictions and their applications for management and decision making in agriculture and identifies the challenges to be addressed in the next 5 to 10 years to further enhance operational applications of climate predictions in agriculture especially in the developing countries

Planning in a Global Era Andy Thornley, 2017-03-02

Globalization was the buzzword of the last decade Advances in communication technology computing and air travel have all contributed to the establishment of what has been referred to as a network society that encompasses the globe Such arguments clearly have a significance on planning an activity which has been concerned with controlling and shaping the use of space This volume brings together contributions from across the world in order to address some of the questions that arise from such global changes The opening section addresses the globalization debate directly raising some theoretical issues and exploring the planning implications across a range of world cities This is followed by an exploration of the way the theoretical debate about planning may need to advance to encompass contemporary forces A

number of more specific accounts addressing the need for adaptation are offered The final section focuses on two aspects housing and sustainability which persist as wicked problems and are likely to remain at the top of the agenda in the third millennium

Biogeography and Ecology of Southern Africa Marinus J.A. Werger,A.C. van Bruggen,2012-12-06 Southern Africa is certainly not a naturally bounded area so that there are several possibilities for delineating it and concepts about its extent Wellington discussed the various possibilities for delineation and suggested that one line stands out more clearly and definitely as a physical boundary than any other namely the South Equatorial Divide the watershed between the Zaïre Cuanza and Rufiji Rivers on the one hand and the Zambezi Cunene and Rovuma Rivers on the other This South Equatorial Divide is indeed a major line of separation for some organisms and is also applicable in a certain geographical sense though it does not possess the slightest significance for many other groups of organisms ecosystems or geographical and physical features of Africa The placing of the northern boundary of southern Africa differs in fact strongly per scientific dis cipline and is also influenced by practical considerations regarding the possibilities of scientific work as subordinate to certain political realities and historically grown traditions This is illustrated for example in such works as the Flora of Southern Africa where the northern boundary of the area is conceived as the northern and eastern political boundaries of South West Africa South Africa and Swaziland Botswana traditionally included in the area covered by the Flora Zambesiaca thus forms a large wedge in Southern Africa
