The Autobiography of Nathaniel Southgate Shaler Nathaniel Southgate Shaler, 1909 Nathaniel Southgate Shaler and the Culture of American Science David N. Livingstone, 1987 Nathaniel Southgate Shaler and the Culture of American Science is the first book length study of the man who served as Harvard's Professor of Geology and Paleontology during the Darwinian era Shaler was a student of Louis Agassiz and went on to a successful multifaceted career as a geologist, geographer, educator, humanist, and poet Livingstone employs a thematic approach to chart Shaler's career against the broader intellectual currents of America's Gilded Age After tracing Shaler's life story from his boyhood in Kentucky through his student years at Harvard, his service with the Geological Survey, and eventually his years as Dean of Harvard's Lawrence Scientific School, the author examines Shaler's evolutionary vision and portrays his strategic efforts to reconcile the nineteenth century's scientific and religious world views Livingstone assesses Shaler's prolific writings, including those on race, which demonstrate a typical concern to provide a scientific perspective on the political questions of immigration, restriction, and eugenic control IN addition, the book explores his efforts to interweave geography and history, particularly in relation to the American frontier, and his contributions to geology and geomorphology The portrait of Shaler is completed with a review of his educational thinking and his role in establishing the American Summer School and in furthering scientific and technological education Nathaniel Southgate Shaler emerges from Livingstone's work as a distinctive figure in the development of the new scientific culture, a figure who provides a focal point for assessing the impact of evolutionary naturalism on late nineteenth century American thought The Autobiography of Nathaniel Southgate Shaler Nathaniel Southgate Shaler, 2016-03-13 Nathaniel Southgate Shaler February 20, 1841 Newport, Kentucky April 10, 1906 Cambridge, Massachusetts was an American paleontologist and geologist who wrote extensively on the theological and scientific implications of the theory of evolution Born in 1841, Shaler studied at Harvard College's Lawrence Scientific School under Louis Agassiz After graduating in 1862, Shaler went on to become a Harvard fixture in his own right as lecturer, 1868 professor of paleontology for two decades, 1869-1888, and as professor of geology for nearly two more, 1888-1906 Beginning in 1891, he was dean of the Lawrence School Shaler was appointed director of the Kentucky Geological Survey in 1873 and devoted a part of each year until 1880 to that work In 1884, he was appointed geologist to the U.S. Geological Survey in charge of the Atlantic division He was commissioner of agriculture for Massachusetts at different times and was president of the Geological Society of America in 1895 He also served two years as a Union officer in the American Civil War **Shaler, Nathaniel Southgate** Nathaniel Southgate Shaler, 1995 Broadside of a poem entitled "The Orphan Brigade" first published in 1906 Poem relates the exploits and bravery of the First Kentucky Brigade C.S.A.
