Burt,2001-02-28 From Marilyn to Mussolini people captivate people A E s Biography best selling autobiographies and biographical novels testify to the popularity of the genre But where does one begin Collected here are descriptions and evaluations of over 10 000 biographical works including books of fact and fiction biographies for young readers and documentaries and movies all based on the lives of over 500 historical figures from scientists and writers to political and military leaders to artists and musicians Each entry includes a brief profile autobiographical and primary sources and recommended works Short reviews describe the pertinent biographical works and offer insight into the qualities and special features of each title helping readers to find the best biographical material available on hundreds of fascinating individuals      **New England Must Not Be Trampled On** Roger Ginn,2016-02-01 On February 24 1838 Maine Congressman Jonathan Cilley was killed in Maryland by another Congressman from Kentucky in one of the last duels to take place in the United States At the time dueling was not illegal but still Cilley s death was a shock to the nation Before the duel fought with rifles at less than one hundred paces Cilley is believed to have said New England must not be trampled on He fought for the honor of his name the honor of his home state and the stout patriotism he held all his life This revealing biography considers Cilley s short life his early years in New Hampshire his time at Bowdoin College and his friendship with Nathaniel Hawthorn his marriage and political life the events that caused him to accept the duel challenge and the duel itself with its tragic aftermath It also provides an intriguing look into the politics of nineteenth century America      War, Technology, and Experience Aboard the USS Monitor David A. Mindell,2000-03-24 In a familiar story the USS Monitor battled the CSS Virginia the armored and refitted USS Merrimack at Hampton Roads in March of 1862 In War Technology and Experience aboard the USS Monitor David A Mindell adds a new perspective to the story as he explores how mariners fighting blindly below the waterline lived and coped with the metal

monster they called the iron coffin Mindell shows how the iron warship emerged as an idea and became practicable how building it drew upon and forced changes in contemporary manufacturing technology and how the vessel captured the nineteenth century American popular and literary imaginations Combining technical personal administrative and literary analysis Mindell examines the experience of the men aboard the Monitor and their reactions to the thrills and dangers that accompanied the new machine The invention surrounded men with iron and threatened their heroism their self image as warriors even their lives Mindell also examines responses to this strange new warship by Nathaniel Hawthorne and Herman Melville who prophetically saw in the Civil War a portent of the mechanized warfare of the future The story of the Monitor shows how technology changes not only the tools but also the very experience of combat generating effects that are still felt today in the era of smart bombs and pushbutton wars We find new significance in the otherwise well known history of the Monitor It is no longer the story of the heroic inventor and his impenetrable weapon thrusting themselves upon a doubtful and conservative bureaucracy It is no longer the story of a heroic battle and the machine's epic loss soon after Rather it is a story of people experiencing new machinery attempting to make sense of its thrills constrictions and politics and sensing its power and impotence both in glory and frustration from War Technology and Experience aboard the USS Monitor

A History of American Philosophy Herbert Wallace Schneider, 1946-01-01 The present work treats of several aspects of American philosophy in their historical perspective The author has interpreted philosophically the revolutionary changes that recent years have brought in the domain of education church politics natural sciences etc The reader will find herein that American Philosophy is the outgrowth of impacts of new life and new directions imported by waves of immigration More conspicuous are the recent intellectual imports from Cambridge Paris and Vienna The philosophical analysis that grew up in Cambridge under the leadership of Whitehead Russell and Moore the sophisticated modernized versions of Catholic scholasticism from Paris and the the schools of value theory existentialism phenomenology logical positivism psychoanalysis and socialism from Vienna these are now pervasive forces in American culture The author has ventured to predict that the types of philosophical thought described in this volume are being radically revised reviewed and reconstructed because of these new importations that a decidedly new chapter in American philosophy is being written The author has tried well to expound what American history teaches or what American philosophy stands for
