Haitian History Alyssa Goldstein Sepinwall, 2013 Despite Haiti's proximity to the United States and its considerable importance to our own history Haiti barely

registered in the historic consciousness of most Americans until recently Those who struggled to understand Haiti's suffering in the earthquake of 2010 often spoke of it as the poorest country in the Western hemisphere but could not explain how it came to be so In recent years the amount of scholarship about the island has increased dramatically Whereas once this scholarship was focused on Haiti's political or military leaders now the historiography of Haiti features lively debates and different schools of thought Even as this body of knowledge has developed it has been hard for students to grasp its various strands Haitian History presents the best of the recent articles on Haitian history by both Haitian and foreign scholars moving from colonial Saint Domingue to the aftermath of the 2010 earthquake It will be the go to one volume introduction to the field of Haitian history helping to explain how the promise of the Haitian Revolution dissipated and presenting the major debates and questions in the field today

Deus in Machina: Religion, Technology, and the Things in Between Jeremy Stolow, 2013 The essays in this volume explore how two domains of human experience and action religion and technology are implicated in each other Contrary to commonsense understandings of both religion as an otherworldly orientation and technology as the name for tools techniques and expert knowledges oriented to this world the contributors to this volume challenge the grounds on which this division has been erected in the first place What sorts of things come to light when one allows religion and technology to mingle freely In an effort to answer that question Deus in Machina embarks upon an interdisciplinary voyage across diverse traditions and contexts where religion and technology meet from the design of clocks in medieval Christian Europe to the healing power of

prayer in premodern Buddhist Japan to 19th century Spiritualist devices for communicating with the dead to Islamic debates about kidney dialysis in contemporary Egypt to the work of disability activists using documentary film to reimagine Jewish kinship to the representation of Haitian Vodou on the Internet among other case studies Combining rich historical and ethnographic detail with extended theoretical reflection *Deus in Machina* outlines new directions for the study of religion and as technology that will resonate across the human sciences including religious studies science and technology studies communication studies history anthropology and philosophy
