Cuaresma, Wilhelmina L. Cabo, 1998 Development, Democracy, and Welfare States Stephan Haggard, Robert R. Kaufman, 2020-06-16 This is the first book to compare the distinctive welfare states of Latin America East Asia and Eastern Europe Stephan Haggard and Robert Kaufman trace the historical origins of social policy in these regions to crucial political changes in the mid twentieth century and show how the legacies of these early choices are influencing welfare reform following democratization and globalization After World War II communist regimes in Eastern Europe adopted wide ranging socialist entitlements while conservative dictatorships in East Asia sharply

limited social security but invested in education In Latin America where welfare systems were instituted earlier unequal social security systems favored formal sector workers and the middle class Haggard and Kaufman compare the different welfare paths of the countries in these regions following democratization and the move toward more open economies Although these transformations generated pressure to reform existing welfare systems economic performance and welfare legacies exerted a more profound influence The authors show how exclusionary welfare systems and economic crisis in Latin America created incentives to adopt liberal social policy reforms while social entitlements from the communist era limited the scope of liberal reforms in the new democracies of Eastern Europe In East Asia high growth and permissive fiscal conditions provided opportunities to broaden social entitlements in the new democracies This book highlights the importance of placing the contemporary effects of democratization and globalization into a broader historical context *Urbanization and Sustainability in Asia* Brian Roberts,Trevor Kanaley,2006 This book considers urbanization in Asia and presents case studies of sustainable development best practice from 12 Asian countries Bangladesh Cambodia People s Republic of China India Indonesia Lao People s Democratic Republic Malaysia Pakistan Philippines Sri Lanka Thailand and Viet Nam **The Changing Constitution** Jeffrey L. and Middle Income Countries Helen Elsey, Patricia Kitsao-Wekulo, Robert C. Hughes, Margaret Nampijja, Paula Griffiths, Shagoofa Rakhshanda, George Evans Owino, 2024-06-26 Rapid urbanization in low and middle income countries LMICs has triggered a childcare crisis As families move to the city they leave behind extended family and traditional support networks parents and guardians particularly mothers are working long hours outside the home often in informal and unstable jobs In response to the increasing demand a range of informal private and NGO providers have sprung up to provide day and sometimes night care Governments are struggling to respond and the care for children in the early years frequently falls between ministries The combination of these factors in LMIC cities has left children from low income families with substandard childcare which poses a threat to their immediate and long term health and development The COVID-19 - Health Systems Nexus Lazarus Chapungu, David Chikodzi, Kaitano Dube, 2023-01-12 This contributed volume based on papers presented at a conference held in Zimbabwe in mid 2021 examines the nexus between Zimbabwe's health systems and the COVID 19 pandemic The collection of papers contained here is diverse and covers topics from how health systems handled or didn't handle surges to health communication during a global pandemic to economic and environmental impacts of the pandemic in Zimbabwe Editors Drs Edward Kunonga Lazarus Chapungu and David Chikodzi set the stage for these pieces with an introductory chapter that describes the health systems in Zimbabwe and offers an overview of the effects of the pandemic felt in the country Their concluding chapter synthesizes trends and issues emerging from the chapters and recommends policy directions regarding health management systems in Zimbabwe and elsewhere in the face of this and future pandemics **Urban Energy Poverty and Positive Energy Districts** Siddharth Sareen, Caitlin Robinson, Harriet Thomson, Rigoberto García, 2022-02-15 **The UK Regional-National Economic Problem** Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if

they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government
