The National Archives Donald R. McCoy, 1978 **Archives, Documentation, and Institutions of Social Memory**
Francis Xavier Blouin, William G. Rosenberg, 2007-08-02 Essays exploring the importance of archives as artifacts of culture
The National Archives Donald R. McCoy, 1970 **Processing the Past** Francis X. Blouin Jr., William G.
Rosenberg, 2012-12-18 Processing the Past explores the dramatic changes taking place in historical understanding and archival management and hence the relations between historians and archivists Written by an archivist and a historian it shows how these changes have been brought on by new historical thinking new conceptions of archives changing notions of historical authority modifications in archival practices and new information technologies The book takes an archival turn by situating archives as subjects rather than places of study and examining the increasingly problematic relationships between historical and archival work By showing how nineteenth and early twentieth century historians and archivists in Europe and North America came to occupy the same conceptual and methodological space the book sets the background to these changes In the past authoritative history was based on authoritative archives and mutual understandings of scientific research These connections changed as historians began to ask questions not easily answered by traditional documentation and archivists began to confront an unmanageable increase in the amount of material they processed and the challenges of new electronic technologies The authors contend that historians and archivists have divided into two entirely separate professions with distinct conceptual frameworks training and purposes as well as different understandings of the authorities that govern their work Processing the Past moves toward bridging this divide by speaking in one voice to these very different audiences Blouin and Rosenberg conclude by raising the worrisome question of what future historical archives might be like if historical scholars and archivists no longer understand each other and indeed whether their now different notions of what is archival and historical will ever again be joined [Closing an Era](#) Richard J. Cox, 2000-09-30 The importance of records in modern society is explored by re examining some of the historical antecedents for critical functions in the modern records professions The motivation for writing this book comes from a conviction of the importance of records and records professionals in organizations and society as well as the need to possess a stronger sense of the events trends people debates and controversies producing the modern records professions Archivists and records managers have tended to discount the importance of their historical antecedents ignoring the fact that many of the current debates and issues before the profession are not new but embedded in the historical evolution of the records professions Re examining some of the historical origins helps records professionals to re examine their mission to manage records for the benefit of organizations and of all of society Such re evaluation also helps to remind records professionals and others that the concerns generated by new electronic recordkeeping technologies are not new at all but built deep within the fabric of traditional records creation and administration *Prologue* , 1984 **The Record** United States. History's Babel Robert B. Townsend, 2024-05-31 From the late nineteenth century until World War II competing spheres of professional identity and practice redrew the field of history establishing fundamental differences between the roles of university historians archivists staff at historical societies history teachers and others In *History's Babel* Robert B Townsend takes us from the beginning of this professional shift when the work of history included not just original research but also teaching and the gathering of historical materials to a state of microprofessionalization that continues to define the field today Drawing on extensive research among the records of the American Historical Association and a multitude of other sources Townsend traces the slow fragmentation of the field from 1880 to the divisions of the 1940s manifest today in the diverse professions of academia teaching and public history By revealing how the founders of the contemporary historical enterprise envisioned the future of the discipline he offers insight into our own historical moment and the way the discipline has adapted and changed over time Townsend's work will be of interest not only to historians but to all who care about how the professions of history emerged how they might go forward and the public role they still can play

The State Library and Archives of Texas David B. Gracy, 2010-05-01 The Texas State Library and Archives Commission celebrated its centennial in 2009 To honor that milestone former State Archivist David Gracy has taken a retrospective look at the agency's colorful and sometimes contentious history as Texas's official information provider and record keeper In this book he chronicles more than a century of efforts by dedicated librarians and archivists to deliver the essential nonpartisan library and archival functions of government within a political environment in which legislators and governors usually agreed that libraries and archives were good and needed but they disagreed about whatever expenditure was being proposed at the moment Gracy recounts the stories of persevering sometimes controversial state librarians and

archivists and commission members including Ernest Winkler Elizabeth West the first female agency head in Texas government Fannie Wilcox Virginia Gambrell and Louis Kemp who worked to provide Texans the vital services of the state library and archives developing public library service statewide maintaining state and federal records for use by the public and lawmakers running summer reading programs for children providing services for the visually impaired and preserving the historically significant records of Texas as a colony province republic and state Gracy explains how the agency has struggled to balance its differing library and archival functions and most of all to be treated as a full range information provider and not just as a collection of disparate services **Guardian of Heritage** National Archives (U.S.),1985

The Remaking of Archival Values Victoria Hoyle,2022-10-07 The Remaking of Archival Values posits that archival theory and practice are fields in flux and that recent critical archival discourse that addresses neoliberalism racism and the legacies of colonialism and patriarchy represents a disruption not only to established principles but also to the values that underpin them Using critical discourse analysis and comparing theory and practice from the UK and the Anglophone world Hoyle explores the challenges faced by scholars institutions organisations and practitioners in embedding new values She demonstrates how persistent underlying discursive structures about archives have manifested from the late nineteenth century to the present day Qualitative and participatory research in the UK shows how conceptions of archival value arise are expressed and become authorised in practice at international national and local levels Considering what might be learnt from similar debates in public history and cultural heritage studies the book asks if and how dominant epistemologies of the archive can be dismantled amidst systems of power that resist change The Remaking of Archival Values is relevant to researchers and students in the field of archival and information studies as well as practitioners who work with archives around the world It will also speak to the interests of those working in the fields of cultural heritage archaeology museum studies public history and gender and race studies **Subject Guide to Communication, Informatics and**
