How Europe's Economies Learn Edward Lorenz,Bengt-åke Lundvall,2006-12-07 When seeking to bench mark the performance of European economies commentators often look to compare them to the economies of Japan and the United States How Europe s Economies Learn shows how this is seriously misleading and how any such comparison needs to be complemented with an understanding of the fundamental differences between Europe s economies The contributors provide an up to date description and analysis of the way differences in state systems and institutional contexts such as labour markets education and training systems and financial systems shape learning processes and innovation performance across the member nations of the European Union In doing so it draws important conclusion for how policy strategies should be designed at the national and European levels in order to further promote the goals of the Lisbonprocess *The European Economy 1914-2000* Derek Aldcroft,2002-01-10 As in earlier editions of this work Professor Aldcroft presents a succinct and lucid account of the development and problems of the European economy throughout the twentieth century The text divides into several clearly defined sub periods the aftermath of the First World War and reconstruction in the 1920s the depression and recovery of the 1930s the impact of the Second World War and the new division of Europe the postwar boom of the 1950s and 1960s the growth slowdown of the 1970s and the pervasive problems of inflation and unemployment This new edition incorporates extensive revisions including wide range coverage of the impact of economics union and the demise of the centrally planned economies revised bibliographies and topics for discussion The European Economy 1914 2000 provides an invaluable guide to the major economic changes in both Western and Eastern Europe during the twentieth century

and Balkan countries while at the same time taking into account the broader regional and global factors influencing these developments. By examining how the decisions and the performance of economic, social and political actors in the region are intertwined with wider regional and global events, the contributions highlight the dynamic development in Eastern Europe and the Balkans region. Further, the book demonstrates how the region has overcome numerous challenges in the past and is evolving within the framework of European economic integration and the global effervescent economy.

The European Economy 1914-1990 Derek Aldcroft, George Penelis, 1993-05-27 This new edition of *The European Economy 1914-1990* has been updated and revised to take account of the decade 1980-90 and as such covers some of the most dramatic and profound economic events of the twentieth century. *The European Economy 1914-1990* includes two additional chapters: one dealing with the Western European economies and in particular *European Security* Richard Rose, 2025-01-09 Exploring the ebb and flow of European security from the end of the Second World War to the present day, Richard Rose examines why security cannot be taken for granted today and what this means for the future of security in Europe. Since 1949, military security from the Black Sea to Washington's Potomac River has been guaranteed by NATO with the White House in command. He reminds us that masses of Europeans enjoyed unprecedented economic security as the European Union has replaced competition in armaments with competition in a single European market. The fall of the Berlin Wall and the Soviet Union restructured the map of Europe and encouraged the United States to turn toward China. However, Vladimir Putin's attempt to revive a Soviet style version of security by invading Ukraine has stimulated aid to Ukraine as it fights a proxy war to protect the security of Europe. Looking ahead, Rose asks whether European governments are able to defend themselves as America's commitment to Europe becomes less reliable, the challenge to Europe of helping fund the reconstruction of Ukraine questions the conditions in which the European Union and NATO could admit Ukraine as a member and sets out where Britain fits in as a NATO but not an EU member state.

Central and Eastern European Economies Marcus Gonçalves, Erika Cornelius Smith, 2016-07-25 Nearly seven decades ago, six countries in Western Europe—Belgium, France, West Germany, Italy, Luxembourg, and the Netherlands—decided to take economic cooperation to the next level. The vision of the EU founding states epitomized by the Schuman Declaration in 1950 was to tie their economies so closely together that war would become impossible. Robert Schuman, author of the plan, believed Europe could not be made all at once or according to a single plan. It would have to be built through concrete achievements which first create a de facto solidarity. The countries within the European Community benefited enormously from free trade and common economic policies, in particular structural funds designed to foster convergence by funding infrastructure and investments in poorer regions. This book examines how similar transitions and integration into the European Union are experienced in individual central and eastern European states through the use of country scans in the regional blocks of CEE, SEE, and CIS.

Explaining European Identity Formation Stephanie Bergbauer, 2017-10-24 What makes people identify with Europe To answer this question this book analyzes the development and determinants of a common European identity among EU citizens from the Maastricht Treaty in 1992 to the recent financial and economic crisis The author examines citizens identification with Europe for all EU member states and systematically explores the theoretical and empirical implications of two turning points in the recent history of EU integration namely the EU s enlargement to Central and Eastern Europe in 2004 2007 and the financial and economic crisis that started in 2008 The book integrates theoretical approaches to European identity in sociology social psychology and EU public opinion research in a comprehensive model for explaining individual identification with Europe The empirical analysis employs a multilevel framework to systematically assess the influence of individual characteristics and the political economic and social context on citizens feelings of identity The long analysis period spanning from 1992 to the present allows inferences to be drawn about the long term developments in the sources of European identification as well as the immediate impact of EU enlargement and the crisis on the determinants of European identification
