Research Reports - National Geographic Society National Geographic Society (U.S.),1978 Abstracts and reviews of research and exploration authorized under grants from the National Geographic Society **Breaking Ground** Getzel M. Cohen,Martha Sharp Joukowsky,2010-06-02 At the close of the Victorian era two generations of intrepid women abandoned Grand Tour travel for the rigors of archaeological expeditions shining the light of scientific exploration on Old World antiquity Breaking Ground highlights the remarkable careers of twelve pioneers a compelling narrative of personal social intellectual and historical achievement Claire Lyons The Getty Museum Behind these pioneering women lie a wide range of fascinating and inspiring life stories Though each of their tales is unique they were all formidable scholars whose important contributions changed the field of archaeology Kudos to the authors for making their stories and accomplishments known to us all Jodi Magness University of North Carolina Chapel Hill This book presents twelve fascinating women whose contributions to the development and progress of Old World archaeology in an area ranging from Italy to Mesopotamia have been immeasurable Each essay in this collection examines the life of a pioneer archaeologist in the early days of the discipline tracing her path from education in the classics to travel and exploration and eventual international recognition in the field of archaeology The lives of these women may serve as models both for those interested in gender studies and the history of archaeology because in fact they broke ground both as women and as archaeologists The interest inherent in these biographies will reach well beyond defined disciplines and subdisciplines for the life of each of these exciting and accomplished individuals is an adventure story in itself **Cordilleran Section of the Geological Society of America**

Professional Paper Richard S. Williams, Jane G. Ferrigno, 2002 **The Kyrenia Ship Final Excavation Report, Volume I** Susan Womer Katzev, Helena Wylde Swiny, 2022-12-01 The Kyrenia Ship a Greek merchantman built around 315 BC which sank off the north coast of Cyprus was excavated between 1968 and 1972 under the direction of Michael L Katzev of the University of Pennsylvania and Oberlin College The importance of this ship lies in the exceptionally well preserved hull that provided new insights into ancient shipbuilding as well as the cargo it carried The hold was stacked with transport amphoras of various types made on Rhodes with a few examples from Samos Kos Knidos and Cyprus supplemented by a consignment of millstones iron billets and almonds The cabin pottery from Rhodes also suggests this was the vessel's home port a conclusion supported by most of the scientific ceramic analyses Its trade route included Rhodes Cyprus and the Levant with perhaps Egypt as a final destination This volume provides a detailed history of the excavation followed by definitive studies of the amphora cargo and the pottery associated with shipboard life Some of the amphora stamps suggest that the ship sank between 294 and 291 BC dates corroborated by the cabin wares The repetition of four drinking cups kantharoi oil containers gutti wine measures olpai as well as bowls and saucers suggests that the ship was sailed by a crew of four Seven bronze coins were recovered five minted in the name of Alexander the Great and one well known type of Ptolemy I produced only on Cyprus *Glaciers of North America* Richard S. Williams, Jane G. Ferrigno, 2002 **Murray Springs** C. Vance Haynes, Bruce B. Huckell, 2022-04-05 The Murray Springs Site in the upper San Pedro River Valley of southeast Arizona is one of the most significant Clovis sites ever found It contained a multiple bison kill a mammoth kill and possibly a horse kill in a deeply stratified sedimentary context Scattered across the buried occupation surface with the bones of late Pleistocene animals were several thousand stone tools and waste flakes from their manufacture and repair Because of the unique occurrence of an algal black mat that buried the Clovis age surface immediately after abandonment the distributional integrity of the artifacts and debitage clusters is exceptional for Paleoindian sites Excavation of the Clovis hunters camp 50 to 150 meters south of the kills revealed artifactual evidence typical of hunting camp activity including hide working and weapons repair Impact flakes conjoining with Clovis points clearly tied the camp to the bison kill The unique nature of the site and this comprehensive study of the excavated material constitute one of the most important contributions to our knowledge of Paleoindian hunters in the New World **The Philosophy of Shipbuilding** Frederick M. Hocker, Cheryl A. Ward, 2004 12 expert nautical archaeologists present the latest information from excavations and explore the conceptual basis for shipbuilding traditions **Nemrud Dağı: Text** H. G. Bachmann, 1996 **Monumental Ambivalence** Lisa C. Breglia, 2009-12-03 From ancient Maya cities in Mexico and Central America to the Taj Mahal in India cultural heritage sites around the world are being drawn into the wave of privatization that has already swept through such economic sectors as telecommunications transportation and utilities As nation states decide they can no longer afford to maintain cultural properties or find it economically advantageous not to do so in the globalizing economy private actors are stepping in to

excavate conserve interpret and represent archaeological and historical sites But what are the ramifications when a multinational corporation or even an indigenous village owns a piece of national patrimony which holds cultural and perhaps sacred meaning for all the country's people as well as for visitors from the rest of the world In this ambitious book Lisa Breglia investigates heritage as an arena in which a variety of private and public actors compete for the right to benefit economically and otherwise from controlling cultural patrimony She presents ethnographic case studies of two archaeological sites in the Yucatán Peninsula Chichén Itz and Chunchucmil and their surrounding modern communities to demonstrate how indigenous landholders foreign archaeologists and the Mexican state use heritage properties to position themselves as legitimate heirs and beneficiaries of Mexican national patrimony Breglia's research masterfully describes the monumental ambivalence that results when local residents excavation laborers site managers and state agencies all enact their claims to cultural patrimony Her findings make it clear that informal and partial privatizations which go on quietly and continually are as real a threat to a nation's heritage as the prospect of fast food restaurants and shopping centers in the ruins of a sacred site

protection relay guides electrical engineering portal - Jan 28 2022

web aug 23 2023 protection relays the relay is a well known and widely used component applications range from classic panel built control systems to modern interfaces between control microprocessors and their power circuits or any application where reliable galvanic separation is required between different circuits although considered to be a relatively

application and setting guide abb - Aug 15 2023

web the present document discusses the effect of power factor pf correction of 3 phase asynchronous motors on the settings of motor protection relays the calculation of the corrected rated current of the motor and the corrected start up current of the motor are described by means of an example

relay setting calculation excel electrical engineering - Apr 30 2022

web helpful excel spreadsheets for protection engineers these spreadsheets below will make your endless calculations much easier calculation of idmt over current relay settings 50 51 50n 51n calculation model for thermal relay siemens 7sj6 motor protection relay selection curves

applying motor data to setup motor protective relay - Dec 07 2022

web setting of the motor protection relay is based on the motor datasheets information and system configuration datasheets are normally provided by motor manufacturer system configuration data can be obtained from single line diagram motor performance data thermal limit curves thermal limit curves cold running overload hot running overload

relay settings calculations electrical engineering - Aug 03 2022

web relay settings calculations electrical engineering this technical report refers to the electrical protection of all 132kv switchgear these settings may be re evaluated during the commissioning according to actual and measured values

relay setting calculation for motors electrical engineering - Feb 26 2022
