National Security and Fundamental Freedoms Hualing Fu, Carole J. Petersen, Simon N.M. Young, 2005-03-01

There has been intense interest in the proposals to implement Article 23 both in Hong Kong and abroad. This book will be valuable to anyone who has followed or participated in that debate or has an interest in the delicate balance between civil liberties and national security. The book will be particularly useful for legislators, policy makers, lawyers, journalists, historians, teachers and students especially in the fields of law and the social sciences. The statutory Appendix will assist teachers and students to draw comparisons between existing law and the government's proposals. In 2003 more than 500 000 people marched in Hong Kong against the National Security Legislative Provisions Bill which would have prohibited treason, sedition, secession and subversion against the national government of China and included new mechanisms for proscribing political organisations. This edited collection analyses that legislation particularly the implications for civil liberties and the one country two systems model. Although the massive protest compelled the Hong Kong government to withdraw the Bill from the legislature in 2003 it will likely propose similar legislation in the future because Hong Kong has a constitutional obligation to implement Article 23 of the Basic Law. The book provides detailed and balanced commentary on the Bill, explains why certain proposals proved so controversial and offers concrete recommendations on how to improve the proposals before the next legislative exercise.

He obtained his LLB from the University of Toronto and his LLM from Cambridge University. This collection of essays on the saga of Hong Kong's efforts to address the mandate of Article 23 in the Basic Law of the Hong Kong Special Administrative Region and related matters is likely to be an extremely useful resource for a number of audiences. These include those directly engaged with the issue of legislation and policymaking in Hong Kong in both public institutions and in the community; those who have an interest in the development of Hong Kong's political and legal system and its relationship to the system of Mainland China; and those with an interest in national security and anti-terrorism legislation more generally.

from a comparative perspective The overall quality and range of the contributions is strong The topic itself is a current and important one and the collection is an important contribution to the field Andrew Byrnes Professor of Law Australian National University The debate on legislation to ensure the sovereignty and security of the PRC against threats from Hong Kong was a turning point in the Special Administrative Region's political history It showed that while some Hong Kong residents may have reservations about democracy human rights are cherished by almost all It also showed that people can influence policy even without formal institutions of democracy The authors of this book played a leading role in the debate clarifying the legal issues which was critical to an informed debate Yash Ghai Sir Y K Pao Professor of Public Law University of Hong Kong

Globalization and Conflict Robert G. Patman, 2006-08-10 This volume highlights the gap between the new security environment and the notion of state centred national security favoured by Washington showing how a Cold War phenomenon known as the national security state in which defence and foreign policy interests essentially converge remains largely intact The conventional wisdom since the suicide attacks of 9 11 is that the world has been transformed and according to President Bush September 11 changed the strategic thinking of the US This book challenges these assumptions Indeed the Bush administration's National Security strategy of 2002 has reinvigorated and even extended the idea of national security Paradoxically the renewed emphasis on a distinctly state centred approach to security including the War on Terror has unfolded during an era of deepening globalization Drawing on the international expertise of fourteen specialists the book examines four inter related themes the impact of globalization on the concept of security the strategic outlook of the world's only superpower the US the new conflicts that have come to characterize the post Cold War era efforts to regulate the emerging patterns of conflict in the
