National Security In The Third World The Management Of Internal And External Threats:

National Security : Emerging Dimensions and Threats Navniti Gandhi, 2010 There is a visible change in the outlook towards security all over the world probably because of the increasing complexity of global problems and their repercussions for millions of people all over the world Insecurity is not just all pervasive but is reiterating its alarming overtones more forcefully than during the cold war era There are now threats very different from a military attack on a nation's territory The concept of National Security hence needs to be redefined The gamut of its perceptions has undergone a paradigm shift The context against which the policy makers seek to establish national security is undergoing tumultuous changes While not downplaying the relevance of strategic means of maintaining national security this book explores the emerging non strategic threats to national security with the obvious grave consequences on human security This book attempts to address several questions Can the concepts of National Security and Human Security be reconciled meaningfully Can their approaches and objectives be intertwined so that we can live a fuller life Can the nations and citizenry both feel equally secure at the same time

National Security in the Third World Edward E. Azar, Chung-in Moon, 1988 This important book assesses the Western concept of state and national security and incorporates the unique concerns of Third World countries It provides an in depth analysis of the special problems of security in developing nations

India's National Security Dilemma Rajpal Budania, 2001

National Security and International Relations (Routledge Revivals) Peter Mangold, 2013-10-14 First published in 1990 National Security and International Relations provides a concise analysis of the problem of national security in the twentieth century It examines the criteria by which states decide what level of security they want to seek in an uncertain and essentially Hobbesian world and why some states tend to underinsure while obsessively insecure states overinsure frequently making others more insecure in the process In the wake of two world wars and the threat of nuclear destruction Peter Mangold argues that war was becoming as much a source of insecurity as the intentions of other states It then explores the different approaches attempted during the twentieth century to ameliorate or ideally escape from the security dilemma These range from international regimes to the restructuring of the international politics of Western Europe so as to substitute cooperation for conflict and U S and Soviet attempts to render nuclear competition safer through arms control and confidence building measures Of special value to students of International Relations and Strategic Studies this book will also interest those keen to understand the challenges embodied in Gorbachev's new thinking in foreign policy

The International in Security, Security in the International Pinar Bilgin, 2016-07-15 International Relations continues to come under fire for its relative absence of international perspectives In this exciting new volume Pinar Bilgin encourages readers to consider both why and how non core geocultural sites allow us to think differently about key aspects of global politics Seeking to further debates surrounding thinking beyond the West non West divide this book analyzes how scholarship on and conceptions of the international outside core contexts are tied up with peripheral actors search for

security Accordingly Bilgin looks at core periphery dynamics not only in terms of the production of knowledge in the production of IR scholarship or material threats but also peripheral actors conceptions of the international in terms of standard of civilization and their more contemporary guises which she terms as hierarchy in anarchical society The first three chapters provide a critical overview of the limits of our theorizing about IR and security as well as a discussion on the track record of critical approaches to IR and security in addressing those limits The following three chapters offer one way of addressing the limits of our theorizing about IR and security by inquiring into the international in security security in the international Each of these chapters makes a theoretical point and illustrates this further in a spotlight section that further illustrates the point to aid student learning A genuinely innovative contribution to this rapidly emerging field within IR this book is essential reading for students and scholars of critical security international relations theory and Global IR

The Evolution of International Security Studies Barry Buzan, Lene Hansen, 2009-08-27 The first intellectual history of International Security Studies since 1945 providing an unparalleled survey for students and scholars

Forging a Singaporean Statehood: 1965-1995 Robin Ramcharan, 2021-10-25 This work takes an in depth look at the multi faceted contemporary relationship between Singapore and Japan since the end of World War II It is the story of a relationship between an economic superpower Japan and an enterprising city state whose leaders have sought to emulate not only Japan's economic success but several key facets of Japanese society as well No other country surpasses Singapore in its public admiration of Japan How is it possible for a multi ethnic Singapore to emulate a relatively homogeneous Japan What features of economic and political motives behind the attempt to emulate Japan These and other questions are addressed in this work which will be of interest to scholars of the international relations and security of East and Southeast Asia

Margins of Insecurity Sam C. Nolutshungu, 1996 A number of crises since the end of the Cold War have demonstrated the insecurity of ordinary people in circumstances where states are either unable to provide protection or are themselves the principle sources of violence Public opinion has provoked international politicians to recognise a problem in which they should intervene but it is rare for effective policies to be implemented Emerging from a series of workshops on the International Security of Marginal Populations the essays seek solutions which go beyond the traditional emphasis on the interests of the state and give due weight to the needs of minority populations SAM C NOLUTSHUNGU was Professor of Political Science in the Frederick Douglass Institute of African and African American studies at the University of Rochester Contributors DAVID LAITIN KIM HOPPER ZOLTAN BARANY JONATHAN BOYARIN REMY LEVEAU ALFRED DARNELL CHARLES R HALE ANTHONY ASIWAJU SAM NOLUTSHUNGU

Military Industry and Regional Defense Policy Timothy D. Hoyt, 2017-07-05 Military Industry and Regional Defense Policy re examines military industrialization in the developing world focusing on policy making in producer states and the impact of security perceptions on such policy making Timothy D Hoyt reassesses the role of regional state sub systems in international relations and recent historical studies of international

technology and arms transfers Looking at Israel Iraq and India the three most powerful regional powers in the Cold War era he presents an expert analysis of the three sided phenomena of the regional hegemony the regional competitor and the small over achiever This new book breaks away from existing literature on military industries in the developing world which has focused on their economic and development costs and benefits These past studies have used primitive methodologies that focus on the production of complete weapons systems a misleading gauge in a world of growing international defense cooperation They have also ignored empirical evidence of the impact of local military industrial production on Cold War regional conflict and of the defence planning and concerns that drove development of indigenous military industries in key regional powers This new text delivers an incisive new perspective

Regional Security in the Middle East Zeev

Maoz,2013-06-17 Middle Eastern politics of the 1990s have been characterized by a drive towards peace Whether this is successful or not will depend on the negotiating process These articles discuss the challenges and provide some practical advice on how risks of failure could be avoided *Regional Security in the Middle East* Pinar Bilgin,2019-01-31 In this new and fully revised edition Pinar Bilgin provides an accessible yet critical analysis of regional security in the Middle East analysing the significant developments that have taken place in the past years Drawing from a wide range of critical approaches to security the book offers a comprehensive study of pasts presents and futures of security in the region The book distinguishes itself from previous critical studies on regional security by opening up both region and security Different from those approaches that bracket one or the other this study takes seriously the constitutive relationship between inventing regions and conceptions and practices of security There is not one Middle East but many shaped by the insecurities of those who voice them This book focuses on how present day insecurities have their roots in practices that have throughout history been shaped by geopolitical inventions of security In doing so the book lays the contours of a framework for thinking critically about regional security in this part of the world This second edition of *Regional Security in the Middle East* is a key resource for students and scholars interested in International Relations and Political Science Security Studies and Middle East Studies

Protecting the Global Civilian from Violence

Timo Kivimäki,2021-05-10 This book reveals why the UN is more successful than unilateral great powers in protecting civilians from violence and focuses on the discourse development and consequences of UN peacekeeping Analysing statistics of state fragility and fatalities of violence it reveals that the UN has managed to save tens of thousands of lives with its peacekeeping a surprising statistic given the media consensus about the UN s powerlessness and inefficiency Using computer assisted discourse analysis of resolutions from the UN Security Council 1993 2019 the book offers data that describe the character and development of UN approach to the protection of civilians from violence It then links the data to the statistics of conflict fatalities and state fragility to reveal by means of qualitative and quantitative analysis when where how and why the UN has been successful at protecting civilians Two reasons for the UN s success are highlighted in the book as being statistically most significant First the organization offers

local ownership to peaceful solutions by considering conflicting parties as the primary agents of protection. Second, the UN approach is much less power oriented than unilateral approaches by the great powers. Protection for the UN does not mean deterrence or destruction but rather support for local protectors of civilians. However, strong great power influence on such operations tends to weaken the UN's ability to save lives. This book will be of much interest to students of humanitarian intervention, peacekeeping, human rights, and International Relations in general.

Outsourcing Control Katherine H. Tennis, 2020-12-17 When the European Union signed an agreement with Turkey in 2016 to end irregular migration from Syria using extraterritorial measures, the media framed it as a radical new low in migrant protection. Similarly, when then presidential candidate Donald Trump called on Mexico to pay for the wall, critics argued it was an outlandish departure from established norms. Extraterritorial migration control arrangements of this type have become more visible in recent years, but they are not new. Katherine Tennis traces the emergence of these agreements in the Americas, Europe, and Southeast Asia. Grounded in case studies of negotiations between the United States and Haiti and Mexico, Italy's negotiations with Tunisia and Libya, and Spain's negotiations with Senegal, *Outsourcing Control* argues that while some countries sharing an interest in ensuring orderly migration or recognizing the opportunity for kickbacks have been happy to cooperate, others have objected, claiming wealthy destination states are exploiting them to do their dirty work. Tennis shows that these different responses depend on how the government in the partner country secures its power. Autocracies and strong democracies tend to cooperate, though for different reasons and in different ways. The most unpredictable partners are fragile democracies who are prone to nationalism and populist backlash. The first comprehensive study to trace the emergence of extraterritorial migration control agreements across nations, *Outsourcing Control* reveals the international and domestic pressures behind the complex, brutal, and often deadly situation facing migrants today.

Globalizing Regionalism and International Relations Beatrix Futák-Campbell, 2021-05-20 Building on the recent initiative to truly globalize the field of international relations, this book provides an innovative interrogation of regionalism. The book applies a globalizing framework to the study of regional worlds in order to move beyond the traditional conception of regionalism, which views regions as competing blocs dominated by great powers. Bringing together a wide range of case studies, the book shows that regions are instead dynamic configurations of social and political identities in which a variety of actors, including the less powerful, interact and partake in regionalization processes and have done so through the centuries.

Cascade of Arms Andrew J. Pierre, 1997-11-01 With the post-cold war emphasis on the proliferation of weapons of mass destruction, the neglected dimension has been the spread of advanced conventional arms. Yet these are the arms most likely to be used in conflict. They present the greatest diversion from economic and social development and are the centerpiece of regional security balances. This book examines the policies and practices of the major arms supplying nations, looks at the impact of weapons purchases on the principal recipient regions, and the possibilities for regional arms control, and dissects the economics of arms exports for the producer nations in

both the developing and industrialized worlds The book thoroughly discusses the opportunities for and obstacles to achieving multilateral restraint on arms In addition to the editor contributors are Ian Anthony Stockholm International Peace Research Institute Nicole Ball Overseas Development Council Julian Cooper University of Birmingham Lawrence Freedman and Martin Navias King s College London Rodney Jones Policy Architects International Ethan Kapstein University of Minnesota Michael Klare Five College Program in Peace and World Security Studies Andrew Mack Australian National University Abdel Monem Said Aly Center for Political and Strategic Studies Cairo Janne Nolan Brookings Institution Andrew Ross Naval War College Gerald Segal International Institute for Strategic Studies and Gerald Steinberg Bar Ilan University Israel Copublished with the World Peace Foundation

[African Agency in International Politics](#) William Brown, Sophie Harman, 2013-03-20 This book analyses the rapidly increasing role of African states leaders and other political actors in international politics in the 21st Century In contrast to the conventional approach of studying how external actors impacted on Africa s international relations this book seeks to open up a new approach focusing on the impact of African political actors on international politics It does this by analysing African agency the degree to which African political actors have room to manoeuvre within the international system and exert influence internationally and the uses they make of that room for manoeuvre Bringing together leading scholars from Africa and Europe to explore the role and conception of African Agency this book addresses a wide range of issues from relations with western and non western donors Africa s role in the UN and World Trade Organisation negotiations over climate change trade agreements with the European Union regional diplomatic strategies the character and extent of African state agency and agency within corporate social responsibility initiatives African Agency in International Politics will be of interest to scholars and students of Africa s international relations African politics development geography diplomacy trade the environment political science and security studies

[Connecting Contemporary African-Asian Peacemaking and Nonviolence](#) Luigi Esposito, Vidya Jain, 2018-10-12 This collection brings together accomplished and emerging scholars who are researching and working for grassroots social change throughout Africa and Asia The essays within are sourced from a series of seminars held during the founding African Peace Research and Education Association Conference at the Economic Community of West African States Parliament in Abuja Nigeria The book draws strategic lines of connection between diverse peoples on the two most populous continents Looking at contemporary Gandhian Chinese armed guerrilla insurrectionist state supported and civil resistance movements each essay reviews recent attempts at peace building while also placing modern efforts in traditional historic indigenous contexts

[The Quest to Cyber Superiority](#) Nir Kshetri, 2016-07-29 This book explains how major world economies are recognizing the need for a major push in cyber policy environments It helps readers understand why these nations are committing substantial resources to cybersecurity and to the development of

standards rules and guidelines in order to address cyber threats and catch up with global trends and technological developments A key focus is on specific countries engagement in cyberattacks and the development of cyber warfare capabilities Further the book demonstrates how a nation s technological advancement may not necessarily lead to cyber superiority It covers cybersecurity issues with regard to conflicts that shape relationships between major economies and explains how attempts to secure the cyber domain have been hampered by the lack of an international consensus on key issues and concepts The book also reveals how some economies are now facing a tricky trade off between economically productive uses of emerging technologies and an enhanced cybersecurity profile In the context of current paradigms related to the linkages between security and trade investment it also delves into new perspectives that are being brought to light by emerging cybersecurity issues
