Security committee of Pakistan, it approved the first ever national security of Pakistan on 27 December 2021. National security policy we announced after APS attacks but the first ever comprehensive document and the comprehensive policy about national security was unveiled in 2021. The draft was presented to the national security committee which was approved.

Here your fundamental argument over here that we must ensure the safety and security of all the citizens of Pakistan, but this is the first ever security policy in Pakistan which is comprehensive and holistic. Which not only covers the internal dimensions but also the external dimensions. It not only covers the economic dimensions but also the territorial security dimensions. And when we say internal security, it refers to a very very broad debate of maintaining law and order and you know: covering terrorism, extremism, as well as countering insurgencies in Pakistan, now the third main component is economic security that is key to the overall national security of Pakistan. Without having economic security, the dream of achieving national security will be near to impossible. Another major component of the state's good governance. As by governance we mean improving the service delivery of the governmental departments and especially with respect to the national law enforcement agencies as well as economic policymakers that is also key to ensure the national security of Pakistan. Another dimension of the national security was documented in that. That is about human security aspects, nothing human skills concept that is a relatively new concept in the modern knowledge and modern literature. It just can be the security of individual people. Just can be their political security, economic security. Seven different security threats could identify security, but they all relate to the security of individuals groups and communities. Another security dimension that was added to this national security document was the foreign policy. When we say foreign policy obviously Pakistan's security interest whether his other states and especially when Pakistan makes alliances, treaties, agreements with the states how it affects Pakistan's national security that is also being made part of the national security. In the civilian departments, in the law enforcement departments besides the input from the military establishment and the military institutions as well it is an example of the collective wisdom of different governmental bodies including civilian as well as the military is national security documents. Special Bibliography Series United States Air Force Academy. Library, 195? The Politics of Ballistic Missile Nonproliferation W. Bowen, 2000-01-20 During the presidency of George Bush 1989 93 the proliferation of nuclear chemical and biological weapons and the ballistic missiles capable of delivering them rose greatly in significance as issues on the American security agenda In the missile field this became evident by the efforts of certain elements in the executive branch and several congressmen to improve domestic and international implementation of the Missile Technology Control Regime The Politics of Ballistic Missile Nonproliferation examines the political bureaucratic and systemic issues that interacted to determine the outcome of these efforts **Military planning in the twentieth century , Special Bibliography Series , 1957 Negotiation and Foreign Policy Decision Making** Melania-Gabriela Ciot, 2014-06-02 Foreign policy decisions are influenced by many factors The real world is complex and many variables have to be considered when making a decision A psychological approach to decision making facilitates the understanding and explaining of the complexity of foreign and global policies precisely because of the prolonged transitional stage of the contemporary international system The course of world politics is shaped by the decisions of leaders Uncertainty involved in decision making in foreign policy can relate to the motivations beliefs intentions or calculations of the opponents If it is not possible to understand how decisions are made then maybe it is at least feasible to understand these decisions and perhaps more importantly predict various results with regards to international politics This book provides a new perspective on the study of international relations by analyzing the subjective elements idiosyncrasies that occur in decision making at the individual level The use of psychological methods of analysing the foreign policy decision making process proposes a necessary investigation path into international relations **Defense Policy And The Presidency** Sam C. Sarkesian, 2019-04-11 This book examines the role of the president in the defense policy process focusing specifically on the administration of President Carter It provides an assessment of the impact of the president s policies on future U S defense posture Explaining Foreign Policy Steve A.

Yetiv, 2004-03-22 Scholars of international relations tend to prefer one model or another in explaining the foreign policy behavior of governments. Steve Yetiv, however, advocates an approach that applies five familiar models: rational actor, cognitive domestic politics, groupthink, and bureaucratic politics. Drawing on the widest set of primary sources and interviews with key actors to date, he applies each of these models to the 1990-91 Persian Gulf crisis and to the U.S. decision to go to war with Iraq in 2003. Probing the strengths and shortcomings of each model in explaining how and why the United States decided to proceed with the Persian Gulf War, he shows that all models, with the exception of the government politics model, contribute in some way to our understanding of the event. No one model provides the best explanation, but when all five are used, a fuller and more complete understanding emerges. In the case of the Gulf War, Yetiv demonstrates the limits of models that presume rational decision making as well as the crucial importance of using various perspectives. Drawing partly on the Gulf War case, he also develops innovative theories about when groupthink can actually produce a positive outcome and about the conditions under which government politics will likely be avoided. He shows that the best explanations for government behavior ultimately integrate empirical insights yielded from both international and domestic theory, which scholars have often seen as analytically separate. With its use of the Persian Gulf crisis as a teachable case study and coverage of the more recent Iraq war, *Explaining Foreign Policy* will be of interest to students and scholars of foreign policy, international relations, and related fields.

The Oxford Handbook of French Politics Robert Elgie, Emiliano Grossman, Amy Mazur, 2016. The Oxford Handbook of French Politics provides a comprehensive and comparative overview of the French political system through the lens of political science. The Handbook is organized into three parts: the first part identifies foundational concepts for the French case, including chapters on republicanism and social welfare; the second part focuses on thematic large-scale processes such as identity, governance, and globalization; while the third part examines a wide range of issues relating to substantive politics and policy, among which are chapters on political representation, political culture, social movements, economic policy, gender policy, and defense and security policy. The volume brings together established and emerging scholars and seeks to examine the French political system from a comparative perspective. The contributors provide a state-of-the-art review both of the comparative scholarly literature and the study of the French case, making *The Oxford Handbook of French Politics* an invaluable resource for anyone interested in the foundations of contemporary political life in France.

Johnson, McNamara, and the Birth of SALT and the ABM Treaty 1963-1969 John M. Clearwater, 1996-12. The purpose of this book is to examine the birth of bilateral strategic arms control between the United States and the Soviet Union during the Johnson Administration from 1964 to 1969. It is about the time and the place of the birth of bilateral strategic arms control as it came about in the United States through the efforts of President Lyndon Johnson and Secretary of Defense Robert McNamara in the 1960s. This is the time of the birth of what quickly came to be known as SALT or the Strategic Arms Limitation Talks. This inquiry firstly considers whether the move towards bilateral strategic arms control was

institutional or personal It then looks for the motivating factors both theoretical and substantive As few things have only a single cause it is likely that we shall find that the birth of strategic arms control was influenced by both nuclear weapons employment theory and by a substantive incident or reality such as the ever increasing number and sophistication of nuclear weaponry Lastly we must look for an immediate precipitating factor such as the move towards deployment of a potentially destabilizing ABM system by both the USA and USSR Therefore it must be borne in mind when examining the people and their theories the institutions the prevailing realities and major precipitating factors that they all come together to form the basis for the birth of bilateral strategic arms control This book shall therefore strive to reveal the extent of personal input the objective basis for that personal commitment and examine the major precipitating factors namely Anti Ballistic Missiles ABM and to a lesser extent Multiple Independently Targeted Re Entry Vehicles MIRV Although barely discussed at the time the MIRV would turn out to be a major arms control problem far greater than the hotly contested ABM system which spurred so many debates The unique aspect of this research is that other writers have concentrated almost totally on the people and events surrounding the Nixon Administration when studying SALT While it is true that the talks did not get underway during the Johnson years this study will show that all of the theoretical and preparatory work was done in the Johnson years and conclude by showing that many of the same people appear in the Nixon years Without the input of McNamara and his team there would have been no movement on strategic arms control until possibly the 1970s To add to the historical value of the work I have included in the annexes complete texts of the initial arms control proposal which the US team was to present to the Soviet Union in the autumn of 1968 In addition presented here for the very first time are the full instructions to the negotiating team and the initial presentation paper to be read by the team leader on the opening day of the talks When this final material is tied in with the history of the push for the talks the story is indeed exciting and meaningful For the first time we are presented with the almost complete picture of the formulation of an arms control proposal There is of course a fluke of history which brought this all to light As the Johnson material was never directly used in the formal SALT talks it was not subject to the same stringent security classifications as those of Nixon Ford Carter Reagan Bush and Clinton materials Therefore the documents started to be declassified in the late 1980s with the bulk coming to light in 1991 through 1994 Here then is the story of the origins of strategic arms control

The State, Society, and Limited Nuclear War Eric Mlyn, 1995-02-01 This book highlights the role that domestic politics has played in the evolution of U S nuclear weapons policy up to the present Mlyn focuses on the relationship among the three levels of this policy public statements force posture and nuclear targeting He shows that although state officials since 1960 maintained a policy of Mutual Assured Destruction MAD in public U S nuclear targeting in fact embraced Nuclear Utilization Theory NUTS Because this view of using nuclear weapons to fight a limited nuclear war was unpopular with the public however state officials did not articulate it fully until the early 1980s Thus although the Reagan administration was accused of radically changing nuclear weapons

policy it was actually continuing a long trend more openly Drawing on theories of the state archives and interviews with top defense policymakers this book tells an important story of interest to any reader concerned with how security policy is fashioned in the United States

One Hundred Years of Sea Power George W. Baer,1996-07-01 A navy is a state s main instrument of maritime force What it should do what doctrine it holds what ships it deploys and how it fights are determined by practical political and military choices in relation to national needs Choices are made according to the state s goals perceived threat maritime opportunity technological capabilities practical experience and not the least the way the sea service defines itself and its way of war This book is a history of the modern U S Navy It explains how the Navy in the century after 1890 was formed and reformed in the interaction of purpose experience and doctrine

Atomic Audit Stephen I. Schwartz,2011-12-01 Since 1945 the United States has manufactured and deployed more than 70 000 nuclear weapons to deter and if necessary fight a nuclear war Some observers believe the absence of a third world war confirms that these weapons were a prudent and cost effective response to the uncertainty and fear surrounding the Soviet Union s military and political ambitions during the cold war As early as 1950 nuclear weapons were considered relatively inexpensive providing a bigger bang for a buck and were thoroughly integrated into U S forces on that basis Yet this assumption was never validated Indeed for more than fifty years scant attention has been paid to the enormous costs of this effort more than 5 trillion thus far and its short and long term consequences for the nation Based on four years of extensive research Atomic Audit is the first book to document the comprehensive costs of U S nuclear weapons assembling for the first time anywhere the actual and estimated expenditures for the program since its creation in 1940 The authors provide a unique perspective on U S nuclear policy and nuclear weapons tracking their development from the Manhattan Project of World War II to the present day and assessing each aspect of the program including research development testing and production deployment command control communications and intelligence and defensive measures They also examine the costs of dismantling nuclear weapons the management and disposal of large quantities of toxic and radioactive wastes left over from their production compensation for persons harmed by nuclear weapons activities nuclear secrecy and the economic implications of nuclear deterrence Utilizing archival and newly declassified government documents and data this richly documented book demonstrates how a variety of factors the open ended nature of nuclear deterrence faulty assumptions about the cost effectiveness of nuclear weapons regular misrepresentation of and overreaction to the Soviet threat the desire to maintain nuclear superiority bureaucratic and often arbitrary decisions pork barrel politics and excessive secrecy all drove the acquisition of an arsenal far larger than what many contemporary civilian and military leaders deemed necessary Atomic Audit concludes with recommendations for strengthening atomic accountability and fostering greater public understanding of nuclear weapons programs and policies
