Choosing Schools Mark Schneider, Paul Teske, Melissa Marschall, 2002-04-07 School choice seeks to create a competitive arena in which public schools will attain academic excellence encourage individual student performance and achieve social balance In debating the feasibility of this market approach to improving school systems analysts have focused primarily on schools as suppliers of education but an important question remains Will parents be able to function as smart consumers on behalf of their children Here a highly respected team of social scientists provides extensive empirical evidence on how parents currently do make these choices Drawn from four different types of school districts in New York City and suburban New Jersey their findings not only stress the importance of parental decision making and involvement to school performance but also clarify the issues of school choice in ways that bring much needed balance to the ongoing debate The authors analyze what parents value in education how much they know about schools how well they can match what they say they want in schools with what their children get how satisfied they are with their children s schools and how their involvement in the schools is affected by the opportunity to choose They discover most notably that low income parents value education as much as if not more than high income parents but do not have access to the same quality of school information This problem comes under sensitive thorough scrutiny as do a host of other important topics from school performance to segregation to children at risk of being left behind □□□□□□□□ , 2006-11 **Planning Canadian Regions** Gerald Hodge, Ira M. Robinson, 2007-10-01 Planning Canadian Regions is the first book to consolidate the history evolution current practice and future prospects for regional planning in Canada As planners grapple with challenges wrought by globalization the evolution of massive new city regions and the pressures for sustainable and community economic development a deeper understanding of Canada s approaches is invaluable Hodge and Robinson identify the intellectual and conceptual foundations of regional planning and review the history and main modes of regional planning for rural regions economic development regions resource development regions and metropolitan and city regions They draw lessons from Canada s past experience and conclude by proposing a new paradigm addressing the needs of regional planning now and in the future emphasizing regional governance greater inclusiveness and integration of physical planning with planning for economic sustainability and natural ecosystems Planning Canadian Regions will be a much needed text for students and teachers of regional planning and an indispensable reference for planning practitioners It will also find a receptive audience in such disciplines as urban planning environmental studies geography political science public administration and economics
