Mathematics across the Iron Curtain Christopher Hollings, 2014-07-16 The theory of semigroups is a relatively young branch of mathematics with most of the major results having appeared after the Second World War This book describes the evolution of algebraic semigroup theory from its earliest origins to the establishment of a full fledged theory Semigroup theory might be termed Cold War mathematics because of the time during which it developed There were thriving schools on both sides of the Iron Curtain although the two sides were not always able to communicate with each other or even gain access to the other s publications A major theme of this book is the comparison of the approaches to the subject of mathematicians in East and West and the study of the extent to which contact between the two sides was possible

Dissident Histories in the Soviet Union Barbara Martin, 2019-05-16 How was it possible to write history in the Soviet Union under strict state control and without access to archives What methods of research did these historians be they academic that is based at formal institutions or independent rely on And how was their work influenced by their complex and shifting relationships with the state To answer these questions Barbara Martin here tracks the careers of four bold and important dissidents Aleksandr Solzhenitsyn Roy Medvedev Aleksandr Nekrich and Anton Antonov Ovseenko Based on extensive archival research and interviews with some of the authors themselves as well as those close to them the result is a nuanced and very necessary history of Soviet dissident history writing from the relative liberalisation of de Stalinisation through increasing repression and persecution in the Brezhnev era to liberalisation once more during perestroika In the process Martin sheds light onto late Soviet society and its relationship with the state as well as the ways in which this dissidence participated in weakening the Soviet regime during Perestroika This is important reading for all scholars working on late Soviet history and society **National Union Catalog** ,1982 Includes entries for maps and atlases **Scientific**

Communication Across the Iron Curtain Christopher D. Hollings, 2015-12-12 This monograph provides a concise introduction to the tangled issues of communication between Russian and Western scientists during the Cold War It details the extent to which mid twentieth century researchers and practitioners were able to communicate with their counterparts on the opposite side of the Iron Curtain Drawing upon evidence from a range of disciplines a decade by decade account is first given of the varying levels of contact that existed via private correspondence and conference attendance Next the book examines the exchange of publications and the availability of one side s work in the libraries of the other It then goes on to compare general language abilities on opposite sides of the Iron Curtain with comments on efforts in the West to learn Russian and the systematic translation of Russian work In the end author Christopher Hollings argues that physical accessibility was generally good in both directions but that Western scientists were afflicted by greater linguistic difficulties than their Soviet counterparts whose major problems were bureaucratic in nature This volume will be of interest to historians of Cold War science particularly those who study communications and language issues In addition it will be an ideal starting pointing for

anyone looking to know more about this fascinating area *One Day We Will Live Without Fear* Mark Harrison, 2015-12-01
 What was life in the Soviet Union really like Through a series of true stories *One Day We Will Live Without Fear* describes
 what people's day to day life was like under the regime of the Soviet police state Drawing on events from the 1930s through
 the 1970s Mark Harrison shows how by accident or design people became entangled in the workings of Soviet rule The
 author outlines the seven principles on which that police state operated during its history from the Bolshevik revolution of
 1917 to the collapse of the Soviet Union in 1991 and illustrates them throughout the book Well known people appear in the
 stories but the central characters are those who will have been remembered only within their families a budding artist an
 engineer a pensioner a government office worker a teacher a group of tourists Those tales based on historical records shine a
 light on the many tragic funny and bizarre aspects of Soviet life **National Union Catalog, 1982** ,1983 **Register of**

 useful criticism of Soviet communism has come from Left socialist sources The essays in this collection are unified by an
 abiding faith in the value of social change and political revolution as well as a shared belief that the Soviet Union has fallen
 drastically short of its own promissory notes delivered by the Bolshevik Revolution of 1917 This volume the first in a series
 published under the direction of *New Politics* magazine takes up the intimacies of Soviet society its legal practices its party
 organization its economic planning techniques with a devastating forthrightness that is not to be found in any other single
 source The writings draw heavily from scholarly sources in Europe that provide perspectives toward Soviet society
 uncluttered by the usual ideological gambits found in many books published in this country and unbiased by a reliance on
 purely secondary sources For all who are interested in the Soviet communist regime yesterday today and tomorrow this
 book will be crucial **A London Bibliography of the Social Sciences** British Library of Political and Economic
