National Governance And The Global Climate Change Regime:

National Governance and the Global Climate Change Regime Dana Fisher, 2004 How do domestic interests affect international policymaking What is the role of the nation state within multilateral regimes How can we understand the diversity of state responses to the internationalization of environmental regulation National Governance and the Global Climate Change Regime compares the roles of different actors and institutions in international environmental policymaking It focuses on the formation of a legally binding treaty to reduce greenhouse gases the Kyoto Protocol to show how domestic interests affect international treaty negotiations Dana Fisher combines quantitative analysis of social economic and environmental data for the member states of the OECD with qualitative case studies of three key countries the United States Japan and the Netherlands She argues compellingly that domestic debates within states and subsequent national policy formation have a significantly larger role in international environmental regime formation than many scholars recognize

National Governance and the Global Climate Change Regime Dana Fisher, 2004-06 This book follows the groundbreaking Kyoto Protocol from the time of its drafting in 1997 to analyze its viability as an environmental treaty Dana R Fisher uses a valuable combination of substantive interview data and country case studies to understand the complexity of the domestic and international debates taking place around the Protocol With its unique blend of quantitative and qualitative data this study presents compelling evidence that domestic interests are crucial in the formation of international environmental policymaking

The Global Development Of Policy Regimes To Combat Climate Change Alex Bowen, Nicholas Stern, John Whalley, 2014-04-01 The year 2015 will be a landmark year for international climate change negotiations Governments have

agreed to adopt a universal legal agreement on climate change at the 21st Conference of Parties COP21 to the United Nations Framework Convention on Climate Change UNFCCC in Paris in 2015 The agreement will come into force no later than 2020 This book focuses on the prospects for global agreement how to encourage compliance with any such agreement and perspectives of key players in the negotiations the United States India China and the EU It finds that there is strong commitment to the established UN institutions and processes within which the search for further agreed actions will occur There are already a myriad of local and regional policies that are helping to reduce greenhouse gas emissions and build mutual confidence However the chapters in the book also highlight potential areas of discord For instance varying interpretations of the common but differentiated responsibilities of developing countries agreed as part of the UNFCCC could be a major sticking point for negotiators When combined with other issues such as the choice of consumption or production as the basis for mitigation commitments the appropriate time frame and base date for their measurement and whether level or intensity commitments are to be negotiated the challenges that need to be overcome are considerable The authors bring to bear insights from economics public finance and game theory Routledge Handbook of Climate Change and Society Constance Lever-Tracy, 2010-07-12 The Handbook of Climate Change and Society brings together the latest research on climate change from the social sciences It comprehensively covers social causes impacts recognition and responses to climate change and features cutting edge research by leading scholars from Australia Canada Europe UK and USA and new material on China India and South East Asia *Global Climate Governance* David Coen, Julia Kreienkamp, Tom Pegram, 2020-12-17 Climate change is one of the most daunting global policy challenges facing the international community in the 21st century This Element takes stock of the current state of the global climate change regime illuminating scope for policymaking and mobilizing collective action through networked governance at all scales from the sub national to the highest global level of political assembly It provides an unusually comprehensive snapshot of policymaking within the regime created by the United Nations Framework Convention on Climate Change UNFCCC bolstered by the 2015 Paris Agreement as well as novel insight into how other formal and informal intergovernmental organizations relate to this regime including a sophisticated EU policymaking and delivery apparatus already dedicated to tackling climate change at the regional level It further locates a highly diverse and numerous non state actor constituency from market actors to NGOs to city governors all of whom have a crucial role to play Global Environmental Governance and Small States Michelle Scobie, 2019 Global Environmental Governance gives the perspectives of small states on some of the most important issues of the anthropocene from trade climate change and energy security to tourism marine governance and heritage Providing an in depth analysis of global environmental governance and its impact on Caribbean small island developing states SIDS Michelle Scobie explores which dynamics and contexts influence current policy and future environmental outcomes for one of the most biodiverse regions of the planet Environmental Challenges and Governance Sacchidananda Mukherjee, Debashis

Chakraborty,2015-03-02 The economies located in East South and Southeast Asia have witnessed an interesting growth sustainability trade off over the last decades While growth considerations have paved ways for deepened ties with growing trade investment waves and increasing population pressure necessitated exploitation of hitherto unutilized natural resources focus on environmental sustainability has been a recent consideration The growth impetus still playing a key role in these economies it becomes imperative that the countries effectively address the key sustainability concerns e g air and water pollution land degradation loss of biodiversity climate change issues like CO2 emissions etc But how prepared is the governance mechanism of these countries covering not only the legislative and administrative framework but also involvement of the judiciary presence of spirited civil society and active engagement of stakeholders in policy framing dialogues to rise up to these challenges The book seeks an answer to this question through the environmental governance mechanism and natural resource conservation policies in three vibrant regions within Asia A holistic development dimension of sustainable development path emerges through discussion of policies adopted by developed Japan South Korea upper middle China Malaysia developing India Indonesia Philippines Sri Lanka Thailand and least developed countries Bangladesh Myanmar Nepal

Governing the Climate Change Regime Tim Cadman,Rowena Maguire,Charles Sampford,2016-12-01 This volume the second in a series of three examines the institutional architecture underpinning the global climate integrity system This system comprises an inter related set of institutions governance arrangements regulations norms and practices that aim to implement the United Nations Framework Convention on Climate Change UNFCCC Arguing that governance is a neutral term to describe the structures and processes that coordinate climate action the book presents a continuum of governance values from thick to thin to determine the regime s legitimacy and integrity The collection contains four parts with part one exploring the links between governance and integrity part two containing chapters which evaluate climate governance arrangements part three exploring avenues for improving climate governance and part four reflecting on the road to the UNFCCC s Paris Agreement The book provides new insights into understanding how systemic institutional and governance failures have occurred how they could occur again in the same or different form and how these failures impact on the integrity of the UNFCCC This work extends contemporary governance scholarship to explore the extent to which selected institutional case studies thematic areas and policy approaches contribute to the overall integrity of the regime

Environment, Politics and Society Ram Alagan,Seela Aladuwaka,2018-05-18 Human activities and decision making have enormous impacts on the environment This volume engages in critical conversations on these issues and how their inter

connectedness and outcomes shape the natural environment and human activity **Ethical Values and the Integrity of the Climate Change Regime** Hugh Breakey, Vesselin Popovski, 2016-05-23 This book investigates the ethical values that inform the global carbon integrity system and reflects on alternative norms that could or should do so The global carbon integrity system comprises the emerging international architecture being built to respond to the climate change This architecture can be understood as an integrity system an inter related set of institutions governance arrangements regulations and practices that work to ensure the system performs its role faithfully and effectively This volume investigates the ways ethical values impact on where and how the integrity system works where it fails and how it can be improved With a wide array of perspectives across many disciplines including ethicists philosophers lawyers governance experts and political theorists the chapters seek to explore the positive values driving the global climate change processes to offer an understanding of the motivations justifying the creation of the regime and the way that social norms impact upon the operation of the integrity system The collection focuses on the nexus between ideal ethics and real world implementation through institutions and laws The book will be of interest to policy makers climate change experts carbon taxation regulators academics legal practitioners and researchers **Greening the Globe** Ann Hironaka, 2014-09-15 Recent decades have seen a rapid expansion of environmental activity in the world including the signing of a growing number of environmental treaties and the formation of international organizations like the United Nations Environment Programme UNEP Greening the Globe employs world society theory aka world polity theory or sociological institutionalism to explore the origins and consequences of international efforts to address environmental problems Existing scholarship seems paradoxical case studies frequently criticize treaties and regulatory structures as weak and ineffective yet statistical studies find improvements in environmental conditions This book addresses this paradox by articulating a bee swarm model of social change International institutions rarely command the power or resources to directly impose social change Nevertheless they have recourse via indirect mechanisms setting agendas empowering various pro environmental agents and propagating new cultural meanings and norms As a result world society generates social change even if formal institutional mechanisms and sanctions are weak

Governing Climate Change Andrew Jordan, Dave Huitema, Harro van Asselt, Johanna Forster, 2018-05-03 Climate change governance is in a state of enormous flux New and more dynamic forms of governing are appearing around the international climate regime centred on the United Nations Framework Convention on Climate Change UNFCCC They appear to be emerging spontaneously from the bottom up producing a more dispersed pattern of governing which Nobel Laureate Elinor Ostrom famously described as polycentric This book brings together contributions from some of the world's foremost experts to provide the first systematic test of the ability of polycentric thinking to explain and enhance societal attempts to govern climate change It is ideal for researchers in public policy international relations environmental science environmental management politics law and public administration It will also be useful on advanced courses in climate policy

and governance and for practitioners seeking incisive summaries of developments in particular sub areas and sectors This title is also available as Open Access on Cambridge Core [France on the World Stage](#) M. Maclean,J. Szarka,2008-04-30

This book examines the ways in which France s relations with the international community have evolved in a period of accelerating globalization It considers the role of the nation state and its capacity for political initiative examining French strategies to reinforce French influence on the world stage [Turning Down the Heat](#) H. Compston,I. Bailey,2008-11-05

This study analyses the politics of climate policy in a range of affluent democracies and at EU level in order to identify political strategies that would make it easier for governments to make major cuts in greenhouse gas emissions without sustaining significant political damage **Rethinking Authority in Global Climate Governance** Thomas

Hickmann,2015-10-16 In the past few years numerous authors have highlighted the emergence of transnational climate initiatives such as city networks private certification schemes and business self regulation in the policy domain of climate change While these transnational governance arrangements can surely contribute to solving the problem of climate change their development by different types of sub and non state actors does not imply a weakening of the intergovernmental level On the contrary many transnational climate initiatives use the international climate regime as a point of reference and have adopted various rules and procedures from international agreements Rethinking Authority in Global Climate Governance puts forward this argument and expands upon it using case studies which suggest that the effective operation of transnational climate initiatives strongly relies on the existence of an international regulatory framework created by nation states Thus this book emphasizes the centrality of the intergovernmental process clustered around the United Nations Framework Convention on Climate Change UNFCCC and underscores that multilateral treaty making continues to be more important than many scholars and policy makers suppose This book will be of great interest to students and scholars of global environmental politics climate change and sustainable development [Contesting Global Environmental Knowledge, Norms and Governance](#) M. J. Peterson,2019-01-08

Through theoretical discussions and case studies this volume explores how processes of contestation about knowledge norms and governance processes shape efforts to promote sustainability through international environmental governance The epistemic communities literature of the 1990s highlighted the importance of expert consensus on scientific knowledge for problem definition and solution specification in international environmental agreements This book addresses a gap in this literature insufficient attention to the multiple forms of contestation that also inform international environmental governance These forms include within discipline contestation that helps forge expert consensus inter disciplinary contestation regarding the types of expert knowledge needed for effective response to environmental problems normative and practical arguments about the proper roles of experts and laypersons and contestation over how to combine globally developed norms and scientific knowledge with locally prevalent norms and traditional knowledge in ways ensuring effective implementation of environmental policies This collection advances

understanding of the conditions under which contestation facilitates or hinders the development of effective global environmental governance The contributors examine how attempts to incorporate more than one stream of expert knowledge and to include lay knowledge alongside it have played out in efforts to create and maintain multilateral agreements relating to environmental concerns It will interest scholars and graduate students of political science global governance international environmental politics and global policy making Policy analysts should also find it useful **Regional Environmental**

Politics in Northeast Asia Jeongwon Bourdais Park, 2018-11-12 The share of global CO2 emissions from the core Northeast Asian NEA countries in 2015 was estimated to be as high as 33.63 percent Representing 28.21, 3.67 and 1.75 percent of total global emissions China Japan and South Korea were ranked the first fifth and seventh largest contributors respectively Some parts of China the Republic of Mongolia the Russian Far East and Southeast Asia have long been on serious alert due to accelerated deforestation With their rapid population growth and economic development the core countries of Northeast Asia are responsible both directly and indirectly for numerous environmental problems Urgent individual and collective action is required from the region's governments Against the backdrop of debate on how to understand Northeast Asia as a region Park focuses on the major regional economies of China Japan and South Korea along with Russia North Korea and the Republic of Mongolia due to both their geopolitical proximity and their significance to the region The author attempts to answer the questions How far has regional environmental cooperation progressed in Northeast Asia and Why are Northeast Asian countries reluctant to cooperate further on urgent transboundary and regional environmental issues
