National Interests And Presidential Leadership The Setting Of Priorities:

National Interests And Presidential Leadership Donald E. Nuechterlein, 2019-04-10 Many scholars have ignored the concept of national interest simply because no logical systematic means of dealing with this key aspect of international politics has been available A new approach to defining national interest forms the basis for this study of presidential decisions on U S involvement in foreign wars Professor Nuechterlein looks at various crisis situations to determine what defense economic world order and ideological interests are at stake he identifies sixteen cost risk and value factors that affect the U S view of which interest is most vital in a given situation In any dispute it is the interest that is considered vital too important to compromise that is the key element in crisis decisions Professor Nuechterlein uses his analytical framework to examine the ways Presidents Wilson Roosevelt Truman Johnson and Nixon perceived the national interest when making their decisions to begin or extend U S war involvement He assesses the value of National Security Council participation in the decision making process and presents case study analyses of three imminent U S foreign policy concerns Quebec s possible separation from Canada the Panama Canal Treaty and the potential for race war in South Africa with an epilogue on the challenges facing Carter The author suggests that the most important U S national interest in the future will be economic with energy conservation a top priority

America Overcommitted Donald E. Nuechterlein, 2021-03-17 Is the United States seriously overcommitted in its worldwide relationships Donald Nuechterlein examines the foreign policy priorities of the United States as it enters the latter half of the 1980s and contemplates its future international role he argues that whether the United States remains a superpower into the twenty first century depends on how it decides its international priorities in this decade and then marshals its resources to defend and enhance them The hard decisions needed to establish priorities among United States military and economic commitments abroad must be made if the United States is to remain financially strong and emotionally committed to an international rather than an isolationist foreign policy In this book the author uses a conceptual framework he developed earlier to assess the nature and intensity of specific challenges to United States national interests Nuechterlein analyzes seven geographical areas of the world in terms of the United States historical interests and suggests the future degree of interest that should be assigned to them He also classifies thirty countries in various parts of the world in terms of their national interest value to the United States in the coming decade Finally he assesses the foreign policies of the Reagan administration in light of national interest priorities America Overcommitted will be essential reading for makers of American foreign and national security policy for journalists reporting on international affairs for scholars seeking better ways to analyze United States foreign policy objectives and for informed citizens who ask why the United States is involved militarily in all parts of the world America Overcommitted is thus a guide to better decision making in foreign affairs in this critical decade

The Regionalization of Warfare James Brown, 2023-03-31 Three wars have dominated world events in recent years The conflict which erupted between the United Kingdom and Argentina over the Falkland Malvinas Islands the multinational conflict in Lebanon involving Israeli Syrian and FLO forces in Lebanon and the savage struggles between ground and air units of the Iranian and Iraqi forces The scale and intensity of these wars their potential for global conflict make them crucial for an understanding among citizens in general and defense and political analysts in particular The authors and contributors to this most unusual volume come to several common conclusions professionalism is a crucial factor in military effectiveness but not necessarily dependent on modes of recruitment high technology is crucial but only in relation to the quality and training of the personnel public support is necessary to sustain military morale in democratic and authoritarian regimes alike These are only some of the incisive findings registered and explored in *The Regionalization of Warfare* The volume assembles experts not only on these three major regional and interregional conflicts but on current U S defense policies Soviet strategic interests in Middle East and Persian Gulf conflicts and a series of papers on lessons learned and unlearned as a result of these small wars of the early 1980s For those interested in military history global strategy and regional rivalries this collection of finely written sophisticated papers will prove to be of intense concern

also looks at the relationship between nuclear and various non nuclear regional issues as well as the long term implications for the U S Iran relations **The Kuwait Petroleum Corporation and the Economics of the New World Order** Mary

Ann Tetreault,1995-01-30 Economic and strategic power is not the exclusive province of powerful developed countries Kuwait has used its main resource oil to integrate itself into the world economy as an autonomous actor rather than as a dependent commodity exporter This daring economic strategy enabled Kuwait to claim military support from governments hosting its direct investments overseas in 1990 91 following its invasion by Iraq Based on five years of research including interviews with more than 200 people Dr Tetreault s book analyzes the development of the Kuwait Petroleum Corporation in the context of domestic regional and world politics Contrary to current thinking she argues that multinational vertical integration under state ownership can be an optimal strategy for oil exporting developing countries particularly those whose resource endowments are otherwise highly limited This book is directed toward executives in natural resource industries economic and strategic planners in public and private institutions and those charged with the formulation and implementation of national international and transnational economic policy in addition it is of interest to academics specializing in political economy development industrial organization regional and domestic politics and international relations **Readings in Canadian Foreign Policy** Christopher John Kukucha,Duane Bratt,2007 This is a reader for courses in Canadian foreign policy it can be used on its own as a core text or alongside a single authored text The book is structured in six sections covering a broad range of topics approaches to Canadian Foreign Policy external sources domestic sources of CFP security trade and economic issues and social considerations which include human rights environment and development issues **The Social Meaning of Death** Renée Claire Fox,1980 Book department pages 101 142 Includes index *Professional Journal of the United States Army* ,1982 The Annals of the American Academy of Political and Social Science ,1980-05 Approaches, Levels, and Methods of Analysis in International Politics H. Starr,2006-09-02

Leading scholars incorporate domestic and international aims choices factors and processes to explore the advantages of crossing methodological and analytical boundaries to gain a better understanding of international relations They examine the complexity of international affairs and consider how scholars should best study it *The Environment of National Security* Harold J. Clem,1983 *The Illusion Of Presidential Government* Hugh Heclo,Lester M Salamon,2019-07-11 Presidential government is an illusion It is an image that misleads presidents no less than the media and the American public Thus begins this realistic look at the presidency in which nine leading presidential scholars examine how and why we are under the illusion of presidential government and ask such questions as What is the president s actual role What has happened to his traditional tools of executive leadership How is the office of the president organized to deal with domestic economic and national security affairs is federal regulation an area of potential power for the president And if presidential government is indeed a myth what can be done to help the presidency play a more effective part in constitutional government Each chapter

probes a different facet of the image of presidential government by looking at the major operations of the modern presidency from struggles with Congress for control of administrative detail to problems of managing the economy and national security. The book closes with the final report of the National Academy of Public Administration's Panel on Presidential Management. Not surprisingly the authors do not always agree nevertheless they are united in the view that the managerial role of the president must be seen as a whole and without illusions.

Strategy and Ethnic Conflict Laure Paquette, 2002-02-28 Ethnic conflict now presents the thorniest problems for military and civilian strategists of all stripes. This book presents a new general theory of strategy encompassing studies of the relationship between values, interest and strategy as these relate to ethnic conflicts. It focuses on the relationship between values and strategy building a theory on the hypothesis that national values influence national strategy. Paquette's research reveals that national values influence national strategy through three mechanisms: cognition, appreciation and evaluation. Each mechanism and indeed the whole value focused approach to strategic thinking is described using a network of interrelated statements. Paquette develops a methodology specific to the issues of international security and ethnic considerations. She tests this theory extensively for internal consistency before applying it to a single historical case: French decision making on national strategy between 1955 and 1970. However because of its generality this same theory could easily be applied to other cases. As with any theory it is possible to vary successively or simultaneously assumptions or conditions and to derive new predictions. This process of deriving variations has the potential to help in the training of strategists both military and civilian.
