### **Global State of National Urban Policy 2021**

**Achieving Sustainable Development Goals and Delivering Climate Action** OECD, United Nations Human Settlements Programme, United Nations Office for Project Services, 2021-06-25 National Urban Policy NUP is a key instrument to achieve sustainable urban development in a shared responsibility across countries regions and cities The scale and urgency of the current urban challenges has given prominence to NUPs The COVID 19 crisis has amplified the potential of NUPs in shaping more resilient green and inclusive cities as part of countries recovery packages *Urban and Regional Development Trajectories in Contemporary Capitalism* Flavia Martinelli, Frank Moulaert, Andreas Novy, 2013-03-22 This book re evaluates a rich scientific heritage of space and history sensitive development theories and produces an integrated methodology for the comparative analysis of urban and regional trajectories within a globalized world The main argument put forward is that current mainstream analyses of urban and regional development have forgotten this rich heritage and fail to address the connections between different dimensions of development the role of history and the importance of place and scale relations The proposed methodology integrates elements from different theories radical economic geography regulation approach cultural political economy old and new institutionalism that all share a strong concern with time and space dynamics They are recombined into an interdisciplinary meta theoretical framework capable of articulating the overall problem of socio economic development and providing methodological anchors for comparative case study analysis while recognizing context specificities The analytical methodology focuses on key dynamics and relations such as strategic agency and collective action institutions and structures culture and discourse as well as the tension between path dependency and path shaping The methodology is then applied to eight urban and regional cases mostly from Western Europe but also from the United States and China The case studies confirm the relevance of time and space sensitive analysis not only for understanding development trajectories but also for policy making They ultimately highlight that while post war institutions were able to address systemic contradictions and foster a relatively inclusive development model the neoliberal turn has led to reductionist policies that not only have resulted in an increase in social and spatial inequalities but have also undermined growth and democracy A National Public Works Investment Policy United States. Congress. House. Committee on Public Works. Subcommittee on Economic Development, 1973
