Status Envy Anne Hendershott,2017-09-08 The debate within Catholic educational circles on whether church sponsored colleges and universities perpetuate mediocrity by giving too great a priority to the moral development of students instead of scholarship and intellectual excellence continues in this book by sociologist Anne Hendershott She asserts that part of the reason for the crisis of faith within Catholic colleges is due to status envy the desire to compete with the top colleges in the country Catholic universities are generally not rated as top notch They are viewed as having a lower status than secular institutions which of course creates resentment Catholic universities in turn become more secular as they become consumed with status concerns Detailing how this resentment manifests itself on campuses Hendershott explains faculty and administrative attempts to distance universities from Catholic ideas and curriculum Some have distanced themselves so far from their Catholic origins that the church no longer recognizes them as Catholic institutions The author questions whether even determined Catholic universities will be able to avoid the pressures to become more secular Hendershott who clearly sympathizes with the original mission of Catholic universities leads the reader through the earliest signs that Catholic colleges were beginning to lose their way in the 1960s up through the ongoing issues of feminism and homosexuality and their impact In focusing on these secular issues colleges are denying exposure to the traditional Catholic views on subjects such as homosexuality women s ordination and abortion Like all culture wars the interaction among people defines the situation The campus is a reflection of the greater culture between those who assert that there are no truths only readings and those who believe that the truths have been revealed and require constant rereading and application It is a conflict between those dedicated to the negation of the authority of Scripture and the hierarchy of the church and those proposing a renaissance of the Catholic intellect and a renewed appreciation of the church itself **Routledge Library Editions: Higher Education** Various,2021-03-29 The volumes in this set originally published between 1964 and 2002 draw together research by leading academics in the area of higher education and provide a rigorous examination of related key issues The volume examines the concepts of learning teaching student experience and administration in relation to the higher education through the areas of business sociology education reforms government educational policy business and religion whilst also exploring the general principles and practices of higher education in various countries This set will be of particular interest to students and practitioners of education politics and sociology

When Power Corrupts Lionel S. Lewis,2018-04-17 It is often said that the American academic protected by tenure is free to do pretty much as he or she pleases Lewis argues that this freedom is largely an illusion Faculty actions are greatly limited by governing boards and the academic administrators they appoint who control institutional resources Although ostensibly independent professionals in many ways faculty have no more autonomy than most employees Indeed what power they have derives from faculty student relationships Lay governing boards ultimately control how money is spent and who spends it This volume addresses issues

relating to current debates over the most appropriate and effective method of academic governance When Power Corrupts details the conflict between the governing board and administration and faculty at Adelphi University in Garden City New York between 1985 and 1996 This conflict culminated in the removal of the Board of Trustees by the New York State Board of Regents The new trustees in turn removed the president Although the book focuses on board administration faculty relations at one university its findings have implications for almost all other institutions of higher learning in the United States Lewis draws on the nearly 8 000 page transcript of the hearings of the Regents These eleven volumes of exhibits include hundreds of documents obtained from individuals and organizations Lewis suggests that academic administrators have more control of governing boards than is generally recognized Besides influencing who is asked to join a board administrators may largely determine the information boards receive and on which they must make decisions When faced with decisions boards often defer to academic administrators or acquiesce to a campus president's suggestions Because conflict over governance all too often takes precedence over academic work on American campuses the implications for higher learning are profound Faculty academic administrators members of governing boards college students and their parents and general readers concerned about problems relating to American higher education will find this book provocative and informative Lionel S Lewis is professor emeritus of sociology and adjunct professor of higher education at SUNY Buffalo He has written more than 150 research articles essays and reviews He is the author of Cold War on Campus A Study of the Politics of Organizational Control and The Cold War and Academic Governance The Lattimore Case at Johns Hopkins **The Complete Book of Colleges** ,2001 **The Library Journal** ,1998-10 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately

The Nation ,1882 Evaluating and Responding to College Guidebooks and Rankings R. Dan Walleri,Marsha K. Moss,1995-12-27 The proliferation of college guidebooks and reputational rankings has become of increasing concern to many in the higher education community Public relations and admissions staff view such publications from a marketing perspective and the potential positive or negative consequences for enrollment College presidents share these concerns along with the broader implications for the overall stature of their institutions The validity and integrity of the information reported is of particular interest to those who work in the area of institutional research Acknowledging the fact that the public the consumers has a great need for information about different institutions in order to make informed college choices for themselves or their children all of these groups in higher education share alarm about the burden imposed on institutions in responding to the ever increasing number of publishers requesting information for these guidebooks and rankings This volume explores some of the major facets of and issues surrounding college guidebooks and ratings The background and development of these publications are traced followed by discussion of major issues and perspectives consumer use of the publications validity of ratings and the institutional burden of supplying the needed information View from both the
