Raskin,1979-01-01 The evolution of the national security state in the United States can be traced from the political military and economic dimensions of American power in the postwar world In Raskin s view the United States emerged from the Second World War with tremendously increased prestige and material power and American leadership created a national security apparatus as a planning instrument to ensure national stability to mute class conflicts and to secure the domestic economy This state then became the basis around the world for covert and overt imperialism The consensus that developed served to maintain stability at home and to guide the modern empire abroad This development required a state that was orderly and that was predicated on modern bureaucracy which operated within the values and assumptions of the ruling elites The national security state system was successful primarily in the economic sphere with bipartisan foreign policy decision making aimed at ensuring a stable business climate at home and abroad Military involvement in Indochina evidenced the decline of American hegemony the genocidal nature of the arms race and the questions raised by protestors of the sixties signaled the break up of the national security consensus Raskin concludes the book with an examination of alternative directions especially regarding the need and the possibilities for renewed public debate of national policy and purpose *Proceedings of the National Security Affairs Conference* ,1974 *National Security Affairs Conference* ,1980

The Geopolitics Of Super Power Colin S. Gray,2021-10-21 What is Soviet American competition all about Is the Soviet Union a security problem that the United States must solve Or is it an insecurity condition with which the U S must learn to live and if so on what terms What kind of a player is the United States in the great game of power politics In *The Geopolitics of Super Power* one of our most respected strategic theorists answers these and other questions In geopolitical terms Colin Gray sees the Soviet American antagonism as an enduring contest between a continental empire and a maritime coalition

each with its distinctive character and purposes Gray explores the roots of the American style in foreign policy and strategy and how that style relates to defense options He identifies four broad alternatives for U S national security policy passive and active means of containment disengagement from foreign security commitments and the rollback of the Soviet empire Gray argues vigorously for active containment for the systematic deemphasis of nuclear weapons and for the intelligent use for deterrence and defense purposes of the West s great competitive strengths in the political economic and technological spheres

Great Power Competition for Overseas Bases Robert E. Harkavy, 2013-10-22 *Great Power Competition for Overseas Bases* The Geopolitics of Access Diplomacy explores the geopolitics of the major powers overseas basing systems in relation to global strategies and changes in the international system in three fairly distinct phases the interwar early postwar and recent postwar periods This book links the great powers competition for overseas bases to several streams of more or less contemporary international relations theory This monograph consists of seven chapters and opens with an introduction to the diplomacy of basing access followed by a discussion on the different types or purposes of basing access as they have evolved over the past several decades in response to changes in diplomacy and military technology The major powers overseas basing access networks in the consecutive interwar early postwar and recent postwar periods are then reviewed along with the earlier corpus of geopolitical theory specifically as it relates to basing diplomacy Emphasis is on the conflicting assumptions about what reciprocal strategic advantages and disadvantages inhere to the geographic positions of the United States and USSR The final chapter considers a number of functional areas of world politics that are closely intertwined with basing diplomacy and relates the competition for facilities to raw materials access surrogate wars strategic deterrence arms control balances of payments arms sales and aid alliances and other such staple concerns of international relations This book will be of interest to political scientists military and government officials diplomats and policymakers
