England The various actors in this process from the national government and regional councils to private organizations and interested individuals did nothing less than engineer British national memory The author presents case studies of six famous British places namely battlefields Hastings and Bosworth political sites Runnymede and Peterloo and world s fairgrounds the Crystal Palace and Great White City In all three genres of heritage sites one location developed through commemorations and tourism while the other anti sites simultaneously faltered as they were neither memorialized nor visited by the masses Ultimately the book concludes that the modern social and political environment resulted in the revival creation or erasure of heritage sites in the service of promoting British national identity A valuable read for British historians as well as scholars of memory public history and cultural studies the book argues that heritage emerged as a discursive arena in which British identity was renegotiated through times of transitions both into a democratic age and an era of geopolitical decline

Material Identities Joanna Sofaer, 2008-04-15 *Material Identities* examines the way that individuals use material objects as tools for projecting aspects of their identities Considers the way identity is fashioned launched used and admired in the material world Contributors intervene from the disciplines of art history anthropology design and material culture Considers contrasting media painting print sculpture dress coinage architecture furniture luxury items and interior design Explores the complexity of identity through the intersection notions of gender ethnicity age sexuality and class Reaffirms the central role of public identities and their impact on social life *A Cultural History of Furniture in the Age of Empire and Industry* Catherine L. Fetter, Christina M. Anderson, 2022-02-24 The 19th century in Western culture was a time of both confidence and turbulence Industrial developments resulted in a number of benefits from a growing middle class to efficiency convenience and innovation across a range of fields from engineering to architecture Alongside these improvements the century began with the extended period of the Napoleonic Wars and was further disrupted by rebellions and revolutions both within Europe and in India South America and other parts of the world Slavery was abolished and urbanization increased dramatically These myriad developments were reflected throughout the period in the proliferation of types of furniture along with their categorization as industrial art at the international exhibitions and world fairs and the increasingly adventurous range of materials that were sometimes used in their construction Nonetheless a strong antiquarian historicist strand also prompted interest in the revival of past styles in areas of art and design including furniture Drawing upon a wealth of visual and textual sources this volume presents essays that examine key characteristics of the furniture of the period on the themes of Design and Motifs Makers Making and Materials Types and Uses The Domestic Setting The Public Setting Exhibition and Display Furniture and Architecture Visual Representations and Verbal Representations
