Minahan, 2009-12-23 These two volumes offer an unprecedented collection of flags seals and symbols used every day around the world In today's global society it is necessary to recognize and identify not only our own symbols but symbols from nations and territories far removed from home Empowering readers to identify symbols in daily use all over the world The Complete Guide to National Symbols and Emblems features an extensive collection of international symbols and cultural emblems never before compiled in such a concise and easy to use work It is inclusive of all the UN member states and some of the most prominent stateless nations This refreshing alternative to other commonly used sites blends both the political and cultural including not only flags national seals and national anthems but also foods and recipes national heroes sports teams festivals and pivotal events that figure in the formation of national identity This versatile source will prove valuable to a wide audience benefiting not only high school and undergraduate student researchers but international businesses journalists and government offices På fædrelandets alter Rasmus Glenthøj, 2007 *Imagology* Manfred Beller, Joseph Theodoor Leerssen, 2007 How do national stereotypes emerge To which extent are they determined by historical or ideological circumstances or else by cultural literary or discursive conventions This first inclusive critical compendium on national characterizations and national cultural or ethnic stereotypes contains 120 articles by 73 contributors Its three parts offer 1 a number of in depth survey articles on ethnic and national images in European literatures and cultures over many centuries 2 an encyclopedic survey of the stereotypes and characterizations traditionally ascribed to various ethnicities and nationalities and 3 a conspectus of relevant concepts in various cultural fields and scholarly disciplines The volume as a whole as well as each of the articles has extensive bibliographies for further critical reading Imagology is intended both for students and for senior scholars facilitating not only a first acquaintance with the historical development typology and poetics of national stereotypes but also a deepening of our understanding and analytical perspective by interdisciplinary and comparative contextualization and extensive cross referencing *Manual on the Wearing of Religious Symbols in Public Areas* Malcolm David Evans, 2009 **Northern Lights** B. J. Epstein, 2009 This volume is a collection of essays based on papers given at the Nordic Translation Conference which took place in London in

March 2008 The purpose of the collection is twofold First it serves to place the Nordic languages firmly into the field of translation studies where hitherto little research has focused on the Nordic region the essays include many Nordic specific studies and ideas Second the book presents research and conclusions which are relevant to translation studies in all languages and cultures Therefore this volume which covers a wide range of Nordic languages and both literary and non literary topics is unambiguously pertinent to the Nordic countries while also being universally valuable *The Athlete as National Symbol* Nicholas Villanueva, Jr.,2020-02-04 Examining the phenomenon of nationalism in the world of sport this collection of new essays identifies moments when athletes became national symbols through their actions on and off the field Since the break up of the Soviet Union and Yugoslavia and related global events of the 1980s and 1990s scholars have explored how race ethnicity gender and sexuality shape and are shaped by nationalism and national participation Topics include race golf and the struggle for social justice in South Africa sport as a battleground within the Israel Palestine conflict multiculturalism and the Olympic Games and white privilege in sport These case studies explore the strength and fragility associated with national identity and how athletes become icons for their nations Symbols of Defeat in the Construction of National Identity Steven Mock,2011-12-29 If nationalism is the assertion of legitimacy for a nation and its effectiveness as a political entity why do many nations emphasize images of their own defeat in understanding their history Using Israel Serbia France Greece and Ghana as examples the author argues that this phenomenon exposes the ambivalence that lurks behind the passions nationalism evokes Symbols of defeat glorify a nation s ancient past while reenacting the destruction of that past as a necessary step in constructing a functioning modern society As a result these symbols often assume a foundational role in national mythology Threats to such symbols are perceived as threats to the nation itself and consequently are met with desperation difficult for outsiders to understand **Symbols of Nations and Nationalism** Gabriella Elgenius,2018-11-12 Providing an original perspective on the construction of nations and national identities this book examines national symbols and ceremonies arguing that far from being just superficial or decorative they are in fact an integral part of nation building maintenance and change **Excavating Nations** J. Laurence Hare,2015-01-01 Excavating Nations traces the history of archaeology and museums in the contested German Danish borderlands from the emergence of antiquarianism in the early nineteenth century to German Danish reconciliation after the Second World War J Laurence Hare reveals how the border regions of Schleswig Holstein and Snderjylland were critical both to the emergence of professional prehistoric archaeology and to conceptions of German and Scandinavian origins At the center of this process Hare argues was a cohort of amateur antiquarians and archaeologists who collaborated across the border to investigate the ancient past but were also complicit in its appropriation for nationalist ends Excavating Nations follows the development of this cross border network over four generations through the unification of Germany and two world wars Using correspondence and site reports from museum university and state archives across Germany and Denmark Hare shows how these scholars negotiated

their simultaneous involvement in nation building projects and in a transnational academic community Provided by publisher

Choral Treatises and Singing Societies in the Romantic Age David Friddle,2022-06-27 Choral Treatises and Singing Societies in the Romantic Age charts the interrelated beginning and development of choral methods and community choruses beginning in the early nineteenth century Using more than one hundred musical examples illustrations tables and photographs to document this phenomenon author David Friddle writes persuasively about this unusual tandem expansion Beginning in 1781 with the establishment of the first secular singing group in Germany Friddle shows how as more and more choral ensembles were founded throughout Germany then Europe Scandinavia and North America the need for singing treatises quickly became apparent Music pedagogues Hans Georg N geli Michael Traugott Pfeiffer and Johann Heinrich Pestalozzi invented the genre that became modern choral methods initially these books were combinations of music fundamental primers with frequent inclusion of choral works intended for performance Eventually authors branched out into choral conducting textbooks detailed instructions on how to found such a community based organization and eventually classroom music instruction The author argues that one of the greatest legacies of this movement was the introduction of vocal music education into public schools which led to greater

musical literacy as well as the proliferation of volunteer choirs All modern choral professionals can find the roots their career during this century

Metamorphosis of a Death Symbol Kathleen Cohen,2023-12-22

Scandinavia After Napoleon Rasmus Glenthøj,Morten Nordhagen Ottosen,2024-05-13 This book explores the intellectual grounds of Scandinavianist ideology and its political development into a national unification movement Denmark Norway and Sweden were nearly annihilated during the Napoleonic Wars The lesson learned was that survival was a matter of size Whereas their union of 1814 offered Sweden Norway geostrategic security tempered by fear of Russia Denmark was the biggest territorial loser of the Napoleonic Wars and faced separatism connected to German nationalism in the duchies of Schleswig and Holstein This evolved into a national conflict that threatened Denmark s survival as a nation Meanwhile a new generation of Danes Swedes and Norwegians had come to regard kindred language culture and religion as a case for Scandinavian union that could offer protection against Russia and Germany When the European revolutions of 1848 unleashed the First Schleswig War the influence of Scandinavianism was such that it nearly turned into a Scandinavian war of unification

The Symbol at Your Door Nigel Hiscock,2016-12-05 Is the display of number and geometry in medieval religious architecture evidence of intended symbolism This book offers a new perspective in the retrieval of meaning from architecture in the Greek East and the Latin West and challenges the view that geometry was merely an outcome of practical procedures by masons Instead it attributes intellectual meaning to it as understood by Christian Platonist thought and provides compelling evidence that the symbolism was often intended In so doing the book serves as a companion volume to *The Wise Master Builder* by the same author which found the same system implicit in plans of cathedrals and abbeys The present book explains how the architectural symbolism proposed could have been understood at the time as supported by medieval texts and its context since it is context that can confer specific meaning The introduction locates the study in its critical context and summarizes Christian Platonism as it determined the meaning of number and geometry The investigation opens with the recurrent symbolism of the dome and the cube as heaven and earth in the Byzantine world and moves to the duality of the temple and the body in the East and West as reflections of Plato s universal macrocosm and human microcosm The study then examines each of the figures of Platonic geometry in the architecture of the West against the background of their mathematics and metaphysics before proceeding to their synthesis with the circle as seen in circular and polygonal structures the divisions of circles in Christian art and their display in window tracery culminating in the rose window In view of the multivalency of the symbolism the investigation establishes systematic occurrences of it which strongly suggest patterns of thought underlying systems of design The book concludes with a series of test cases which show the after life of the same symbolism as it overlapped with the Renaissance

Battles and Borders Petra Broomans,2015-11-27 *Battles and Borders Perspectives on Cultural Transmission and Literature in Minor Language Areas* is about literature on the fringes of Europe The authors all discuss the often unique ways in which literary history and cultural transfer function in peripheral and central regions

against the background of shifting national borders in the last two centuries Special attention is paid to minority and migrant groups in Northwest Europe The present volume aims to prompt a reconsideration of the concepts of minority and migrant cultures and literatures in the past and the present day It also suggests a new topic for further study the importance of cultural transfer for migrant groups whether or not they form a diaspora and their ability to create new words and to develop new identities This seventh volume in the Studies on Cultural Transfer and Transmission CTaT series is a spinoff of the research project Peripheral Autonomy Longitudinal analysis of cultural transfer in the literary fields of small language communities This project was carried out by scholars at the University of Groningen Ghent University and Uppsala University It started in 2006 and concluded with the publication in 2012 of Rethinking Cultural Transfer and Transmission Reflections and New Perspectives Experiences of War and Nationality in Denmark and Norway, 1807-1815 R. Glenthøj, M.

Nordhagen Ottosen, 2014-01-13 This book explores the impact of the Napoleonic wars on Danish Norwegian society and accounts for war experiences and the transformation of identities among the popular classes and educated elites alike

Trees as Symbol and Metaphor in the Middle Ages Michael D. J. Bintley, Pippa Saloni, 2024 WINNER AFCEMS Prize 2024 Highlights human encounters with the forest and its trees at the time of the European Middle Ages when their lofty boughs were weighted with meaning Forests with their interlacing networks of trees and secret patterns of communication are powerful entities for thinking with A majestic terrestrial community of arboreal others their presence echoes entangles and resonates deeply with the human world The chapters interrogate the pre Anthropocene environment reflecting on trees as metaphors for kinship and knowledge as they appear in literary historical art historical and philosophical sources They examine images of trees and trees in themselves across a range of environmental material and intellectual contexts and consider how humans used arboreal and rhizomatic forms to negotiate bodies of knowledge and processes of transition Looking beyond medieval Europe they include discussion of parallel developments in the Islamic world and that of the Māori the indigenous people of New Zealand **War and Cultural Heritage** Marie Louise Stig

Sørensen, Dacia Viejo-Rose, 2015-03-30 This book explores the relationship between cultural heritage and conflict through the use of new empirical evidence and critical theory and by focusing on postconflict scenarios It includes in depth case studies and analytic reflections on the common threads and wider implications of the agency of cultural heritage in postconflict scenarios
