Salacuse,2013-02-14 International investments are governed by three different legal frameworks 1 national laws of both the host country and the investor s

Investing in Development

Theodore Moran, 2021-12-24 This volume surveys current views in the debate about the impact of foreign direct investment on Third World development on growth employment exports technology and distribution of income It examines whether the efforts of less developed countries to attract and control multinational corporations have constituted a serious distortion of trade that threatens jobs in the home nations It provides new studies of foreign investment in agriculture and in the least developed states It looks at the threat of transmitting environmental pollution And it analyzes the link between international companies and the umbrella of World Bank cofinancing as a mechanism to reduce risk Finally it attempts to estimate how much of the gap in commercial bank lending might plausibly be filled by direct corporate investment over the next decade

Nationalism and the multinational enterprise H. R. Hahlo, J. Graham Smith, Richard W. Wright, 1973 **The End of History** Barry Cooper, 1984-12-15 History ended according to Hegel according to Kojve with the establishment and proliferation in Europe of states organized along Napoleonic lines rational bureaucratic homogenous atheist This state lives in some tension with the popular slogan that helped give it birth Liberty Equality Fraternity But there is now also totalitarianism the only new kind of regime according to Arendt created since the national state Man is now in charge of nature technology and society much of political life has become a gavotte elaborating the meaning of the Napoleonic model This interpretation however opposed it seems to common sense has been influential particularly in France where the course of existentialism is unintelligible without taking it into account Professor Cooper argues that it is inherently plausible and examines the arguments of Hegel and Kojve to reveal its consistency and explanatory power And he applies it to more

contemporary events the experience of the atomic bomb the Gulag system of extermination and the growth of multinational corporations The work concludes by pulling together the presuppositions and theories of the totalitarian system the Hegelian version of the Napoleonic state and our contemporary technological society Overall the reader will find here a complete and challenging presentation of how the modern world understands its collective life *The Law of Groups of Companies*

Christine Van Den Wyngaert, M Kruithof, 1991-12 The law and regulations governing groups of enterprises have undergone an amazing development during the last ten to twenty years The growing attention paid in legal writing to the specific issues raised by the group phenomenon is a direct consequence of the widespread and increasing utilization of separate legal entities to organize business activities whether in the profit or non profit sector It is increasingly felt that the traditional approach of today's company law does not provide adequate answers for the questions raised by today's enterprise organization Few national regulations have paid specific attention to the growth of groups of companies This does not mean that group law does not exist but rather that it has developed from its roots in judicial case law administrative practice and in many particular provisions of different statutes Legal doctrine has paid a great deal of attention to group relationships often utilizing material originating from other legal systems At the EEC level a directive on groups of companies has been envisaged but no agreement has been reached on its content The purpose of the research which resulted in the present publication was to document and orient research by everyone interested in the study of the law of groups of enterprises The Law of Groups of Companies systematically classifies the wealth of literature which was thus revealed and makes clear that although formal statutes on groups of companies rarely exist the law has been developing and concepts structures and reasoning have kept the minds of many legal writers active This book is a publication of the Studiecentrum

Ondernemingsgroepen Centre d Etude des Groupes d Entreprises *ABA Journal*, 1973-10 The ABA Journal serves the legal profession Qualified recipients are lawyers and judges law students law librarians and associate members of the American Bar Association

Indigenization of African Economies Adebayo Adedeji, 2023-08-18 Originally published in 1981 this book examines the progress of a number of national efforts to move towards economic self reliance It consists of case studies from Egypt Zambia Ghana Nigeria Kenya Tanzania Ethiopia Botswana Lesotho and Swaziland and Senegal The studies are set in a framework that outlines the historical background to African economic dependence and they discuss the theoretical and practical implications of that dependence It makes an important contribution to the study of indigenization bringing together a group of African specialists writing from the inside and articulating the continent's challenges with convincing authority *Instead of FIRA* Samuel Wex, 1984 From the back cover A president of a foreign controlled subsidiary recently commented As the Canadian subsidiary of a multi national we do not necessarily always operate to do the best we can for our local books We are attempting to optimize the parent company's books How can this perspective be changed so that the Canadian subsidiary can gain a heightened sense of its independence as a profit centre without a change occurring in

ownership or formal control relationships Canadian public policy contends Samuel Wex should seek to encourage maximization of the subsidiary's profits by focusing on its productivity and its international competitiveness Its performance should stamp it as a good corporate citizen In order to bring about this change of perspective different approaches will be needed to create autonomous subsidiaries that are entrepreneurial and outward looking These approaches if adopted could lead to an open door policy to new foreign investment that would be entrepreneurial and innovative
