following the Second Anglo Afghan War gave an empowering voice to the Pashtun people the largest ethnic group in a diverse country In order to distil the narrative of the state s formation and early years a Pashtun centric version of history dominated Afghan history and the political process from 1880 to the 1970s Alternative discourses made no appearance in the fledgling state which lacked the scholarly institutions and any sense of recognition for history thus providing no alternatives to the narratives produced by the British whose quasi colonial influence in the region was supreme Since 1970 the ongoing crises in Afghanistan have opened the space for non Pashtuns including Tajiks Hazaras and Uzbeks to form new definitions of identity challenge the official discourse and call for the re writing of the long established narrative At the same time the Pashtun camp through their privileged position in the political settlements of 2001 have attempted to confront the desire for change in historical perceptions by re emphasising the Pashtun domination of Afghan history This crisis of hegemony has led to a deep antagonism between the Pashtun and non Pashtun perspectives of Afghan history and threatens the stability of political process in the country

A History of Eastern Europe 1918 to the Present Ian D. Armour,2021-04-08 Why is Eastern Europe still different from Western Europe more than a quarter century after the collapse of Communism A History of Eastern Europe 1918 to the Present shows how the roots of this difference are based in Eastern Europe s tortured 20th century Eastern Europe emerged in 1918 as the lands between new states whose weakness vis vis Germany and Soviet Russia soon became obvious The region was the main killing field of the Second World War which visited unimaginable horrors on its inhabitants before their liberation by the Soviets in 1945 The imposition of Communist dictatorships on the region ironically only deepened Eastern Europe s backwardness Even in the post Communist period its problems continue to make it a fertile breeding ground for nationalism and political extremism A History of Eastern Europe 1918 to the Present explores the comparative backwardness of Eastern Europe and how this has driven strategies of modernisation it looks at the ways in which the region has served as a giant test tube for political experimentation and in particular at the enduring strength of nationalism which since 1989 has re emerged more virulent than ever This book is the essential textbook for any student of 20th century Eastern Europe

**National Soul** Marilyn J. McKay,2002-05-13 Examining their social political and economic contexts McKay shows how the murals of this period glorified Canada as a modern nation state extolled the virtues of commerce and industry inculcated conventions of gender and race and shared the intensity of nationalistic sentiment that led to the work of the more renowned painters of Toronto s Group of Seven Bringing together for the first time a body of Canadian work civic commercial religious and private that has been largely ignored by art historians A National Soul challenges previous histories of Canadian painting This generously illustrated book reproduces seldom seen works from across the country many of which have been moved or destroyed and includes a comprehensive listing of all works from the period their original and present locations and their state of preservation

**The Return of Alsace to France, 1918-1939** Alison Carroll,2018 In 1918 the end of the First World War triggered the return of Alsace and Lorraine to France after almost

fifty years of annexation into the German Empire Enthusiastic crowds in Paris and Alsace celebrated the return of the lost provinces but return proved far more difficult than expected Over the following two decades politicians administrators industrialists cultural elites and others grappled with the question of how to make the region French again Differences of opinion emerged and reintegration rapidly descended into a multi faceted struggle as voices at the Parisian centre the Alsatian periphery and outside France s borders offered their views on how to introduce French institutions and systems into its lost borderland Throughout these discussions the border itself shaped the process of reintegration by generating contact and tensions between populations on the two sides of the boundary line and by shaping expectations of what it meant to be French and Alsatian Borderland is the first comprehensive account of the return of Alsace to France which treats the border as a driver of change It draws upon national regional and local archives to follow the difficult process of Alsace s reintegration into French society culture political and economic systems and legislative and administrative institutions It connects the microhistory of the region with the macro levels of national policy international relations and transnational networks and with the cross border flows of ideas goods people and cultural products that shaped daily life in Alsace as its population grappled with the meaning of return to France In revealing the multiple voices who contributed to the region s reintegration it underlines the ways in which regional populations and cross border interactions have forged modern nations

*What Is a Nation?* Timothy Baycroft, Mark Hewitson, 2006-06-29 This volume analyses and compares different forms of nationalism across a range of European countries and regions during the long nineteenth century It aims to put detailed studies of nationalist politics and thought which have proliferated over the last ten years or so into a wider European context By means of such contextualization together with new and systematic comparisons What is a Nation Europe 1789 1914 reassesses the arguments put forward in the principal works on nationalism as a whole many of which pre date the proliferation of case studies in the 1990s and which as a consequence make only inadequate reference to the national histories of European states The study reconsiders whether the distinction between civic and ethnic identities and politics in Europe has been overstated and whether it needs to be replaced altogether by a new set of concepts or types What is a Nation explores the relationship between this and other typologies relating them to complex processes of industrialization increasing state intervention secularization democratization and urbanization Debates about citizenship political economy liberal institutions socialism empire changes in the states system Darwinism high and popular culture Romanticism and Christianity all affected and were affected by discussion of nationhood and nationalist politics The volume investigates the significance of such controversies and institutional changes for the history of modern nationalism as it was defined in diverse European countries and regions during the long nineteenth century By placing particular nineteenth century nationalist movements and nation building in a broader comparative context prominent historians of particular European states give an original and authoritative reassessment designed to appeal to students and academic readers alike of one of the most

contentious topics of the modern period      *War and the Rise of the State* Bruce D. Porter, 2002-02-01 States make war but war also makes states As Publishers Weekly notes Porter a political scientist at Brigham Young University demonstrates that wars have been catalysts for increasing the size and power of Western governments since the Renaissance The state's monopoly of effective violence has diminished not only individual rights and liberties but also the ability of local communities and private associates to challenge the centralization of authority Porter's originality lies in his thesis that war breaking down barriers of class gender ethnicity and ideology also contributes to meritocracy mobility and above all democratization Porter also posits the emergence of the Scientific Warfare State a political system in which advanced technology would render obsolete mass participation in war This provocative study merits wide circulation and serious discussion      Region and State in Nineteenth-Century Europe J. Augusteijn, H. Storm, 2012-10-24 In reaction to the centralizing nation building efforts of states in nineteenth century Europe many regions began to define their own identity In thirteen stimulating essays specialists analyze why regional identities became widely celebrated towards the end of that century and why some considered themselves part of the new national self image      **Brithop** Justin A. Williams, 2021 With ongoing debates on Scottish independence immigration Britain's place in the EU multiculturalism national identity and the specter of a past Empire complicating ethnically defined notions of Britishness the Kingdom seems far from United As a cultural force that is often discussed as giving voice to the voiceless and empowering marginalized communities hip hop has become a space in which to explore and debate these issues defining global community while celebrating locality In Brithop author Justin A. Williams finds new hope in an often neglected figure the British rapper Through themes of nationalism history subculture politics humor and identity Brithop explores multiple forms of politics in rap discourses from Wales Scotland and England Featuring rappers and groups such as The Streets Goldie Lookin Chain Akala Lowkey Stanley Odd Loki Speech DeBelle Lady Sovereign Shadia Mansour Shay D Stormzy Sleaford Mods Riz MC and Lethal Bizzle Williams investigates how rappers in the UK respond to the postcolonial melancholia of post Empire Britain Brithop shows a rich multifaceted cultural reality reflective of both the postcolonial condition of the UK and the importance of localism within its varying cultures      Social Identities Gary Taylor, Steve Spencer, 2004 Social Identities argues that we have a collection of social selves and that our identities are influenced by such things as class gender sexuality race nationality religious views and by the media

After the Versailles Treaty Conan Fischer, Alan Sharp, 2013-09-13 Designed to secure a lasting peace between the Allies and Germany the Versailles Settlement soon came apart at the seams In After The Versailles Treaty an international team of historians examines the almost insuperable challenges facing victors and vanquished alike after the ravages of WW1 This is not another diplomatic history instead focusing on the practicalities of treaty enforcement and compliance as western Germany came under Allied occupation and as the reparations bill was presented to the defeated and bankrupt Germans It covers issues such as How did the Allied occupiers conduct themselves and how did the Germans respond Were reparations really affordable and how did the reparations regime affect ordinary Germans What lessons did post WW2 policymakers learn from this earlier reparations settlement The fraught debates over disarmament as German big business struggled to adjust to the sudden disappearance of arms contracts and efforts were made on the international stage to achieve a measure of global disarmament The price exacted by the redrawing of frontiers on Germany's eastern and western margins as well as the gentler impact of the peace settlement on identity in French Flanders This book was previously published as a special issue of Diplomacy and Statecraft

British Foreign Policy, National Identity, and Neoclassical Realism Amelia Hadfield-Amkhan, 2010-10-16 This groundbreaking study offers a genuinely multidisciplinary exploration of cultural influences on foreign policy Through an innovative blend of historical analysis neoclassical realist theory and cultural studies Amelia Hadfield Amkhan shows how national identity has been a catalyst for British foreign policy decisions helping the state to both define and defend itself Representing key points of crisis from the past two centuries her case studies include the 1882 attempt to construct a channel tunnel to France the frantic 1909 Dreadnought race with Germany the 1982 Falklands War with Argentina and the 2003 decision to remain outside the Eurozone The author argues

that these events marking the decline of a great power have forced Britain's society and government into periods of deep self reflection that are carved into its culture and etched into its policy stances on central issues of sovereignty territorial integrity international recognition and even monetary policy

**Russia and Eastern Europe, 1789-1985** Raymond Pearson, 1989

**The Gothic World** Glennis Byron, Dale Townshend, 2013-10-08 The Gothic World offers an overview of this popular field whilst also extending critical debate in exciting new directions such as film politics fashion architecture fine art and cyberculture Structured around the principles of time space and practice and including a detailed general introduction the five sections look at Gothic Histories Gothic Spaces Gothic Readers and Writers Gothic Spectacle Contemporary Impulses The Gothic World seeks to account for the Gothic as a multi faceted multi dimensional force as a style an aesthetic experience and a mode of cultural expression that traverses genres forms media disciplines and national boundaries and creates indeed its own World

*Multiplicity of Nationalism in Contemporary Europe* Ireneusz Paweł Karolewski, Andrzej Marcin Suszycki, 2010-01-01 Nationalism remains one of the key political societal and socio psychological phenomena in contemporary Europe The international scholars assembled in this edited collection suggest that the use of three perspectives supranationalism boundary making nationalism and regional nationalism may be promising as an explanatory framework for the analysis of nationalism in Europe The volume distances itself from older dichotomies such as civic and ethnic nationalism and questions the one sided normativity of nationalism in particular regarding the concept of liberal nationalism It argues that a promising approach to contemporary nationalism should reflect the multiplicity of nationalism
