Rethinking Nationalism Jonathan Hearn, 2006-04-13 Two key textbooks for the the study of nationalism **Rethinking Stateless Nations and National Identity in Wales and the Basque Country** Sophie Williams, 2018-08-10 This book looks at the fundamental components of national identity as understood by ordinary nation members and the way in which it is mobilised by political elites Drawing on an original case comparison between Wales and the Basque Country the author suggests there are many commonalities between these two nations particularly around the fundamentals of their national identities However differences occur in terms of degree of intensity of feeling and around the politicisation of identity with more entrenched and hostile political positioning in the Basque Country than Wales Through a multi level comparison the book generates insights into national identity as a theoretical concept and in a stateless nation context It argues for national identity's intangible yet polemical nature looking at the primordialist way it is understood its permanence and importance coupled with its lack of everyday salience and consequent obligations

The Routledge Handbook of the Politics of Brexit Patrick Diamond, Peter Nedergaard, Ben Rosamond, 2018-05-08 The surprise decision expressed by the British people in the referendum held in June 2016 to leave the European Union was remarkable It also presents a natural experiment where the exposure of a society to an extraordinary event allows scholars to observe in real time in the real world the interaction of variables The Routledge Handbook of the Politics of Brexit takes stock of what we know in the social science community about the Brexit phenomenon so far and looks to make sense of this remarkable process as it unfolds The book asks simple questions across a range of areas and topics so as to frame the debate into a number of navigable subdiscussions providing structure and form to what is an evolving and potentially inchoate topic As such it provides a systematic account of the background for the content of and the possible implications of Brexit The handbook therefore does not examine in detail the minutiae of Brexit as it unfolds on a day to day

basis but raises its sights to consider both the broad contextual factors that shape and are shaped by Brexit and the deeper sources and implications of the British exit from the European Union. Importantly as interest in Brexit reaches far beyond the shores of the United Kingdom so an international team of contributors examines and reveals the global implications and the external face of Brexit. The Routledge Handbook of the Politics of Brexit will be essential reading and an authoritative reference for scholars, students, researchers and practitioners involved in and actively concerned about research on Brexit.

British politics, European Union politics and comparative politics and international relations

Routledge Handbook of Chinese Media Gary D. Rawnsley, Ming-yeh T. Rawnsley, 2015-04-24 The study of Chinese media is a field that is growing and evolving at an exponential rate. Not only are the Chinese media a fascinating subject for analysis in their own right but they also offer scholars and students a window to observe multi-directional flows of information, culture and communications within the contexts of globalization and regionalization. Moreover, the study of Chinese media provides an invaluable opportunity to test and refine the variety of communications theories that researchers have used to describe, analyse, compare and contrast systems of communications. The Routledge Handbook of Chinese Media is a prestigious reference work providing an overview of the study of Chinese media. Gary and Ming Yeh Rawnsley bring together an interdisciplinary perspective with contributions by an international team of renowned scholars on subjects such as television, journalism and the internet and social media. Locating Chinese media within a regional setting by focusing on Greater China, the People's Republic of China, Taiwan, Hong Kong, Macau and overseas Chinese communities, the chapters highlight the convergence of media and platforms in the region and emphasise the multi-directional and trans-national character of media information flows in East Asia. Contributing to the growing de-westernization of media and communications studies, this handbook is an essential and comprehensive reference work for students of all levels and scholars in the fields of Chinese Studies and Media Studies.

Culture and Conflict Sine Krogh, Karina L. Grand, Thor J. Mednick, 2022-05-06 Cultural differences are often the trigger for conflict, whether politically

motivated or arising from dissonant understandings of national culture. But what we regard as distinctive today in our cultural heritage or day to day cultural experience is deeply rooted in the rich diversity of the national currents of the nineteenth century. Culture and Conflict: Nation Building in Denmark and Scandinavia 1800-1930 explores the many strands of Danish and Scandinavian culture that helped to shape these cultural identities. The sixteen contributions in this volume analyse how competing national agendas influenced the development of political life as well as literature, the visual arts and music. A central theme is the cultural conflicts that formed an essential part of nineteenth century nation building. Culturally as well as politically, boundaries were drawn up, ideologies were formulated and discussed, and determined attempts were made to suppress divergent cultural voices in the drive to forge strong national or Scandinavian narratives. The results of these conflicts were the enduring cultural struggles that form the subject of this volume. The contributions at hand by scholars from Denmark, Britain, Norway, the United States and Germany bring a broad and interdisciplinary perspective to bear on these distinctively Nordic themes. Aimed both at students and at established scholars, the chapters discuss the many facets of nationalism, its cultures and its countercultures, as well as revisiting the historiography of the 1800-1930 period with a more pluralistic approach.

Adapting Nations Alon Helled, Carlo Pala, 2025-05-28. Nations adapt. Nations are resilient both within and outside the boundaries of statehood. Yet scholarship tends to downplay nationhood as it focuses on the polity. As a consequence, the investigation of modern societies, though usually articulated around the nation-state model, falls into state-centrism whilst neglecting the other side of the coin. This book initiates an interdisciplinary debate that encourages research in a field that has largely been overlooked in European social and political sciences. The analysis offered by the authors reinstates the concept of the nation beyond the traditional and somewhat dichotomous schools of thought, hence neither judging the nation as a mere invention nor as a deterministic product of history. The book provides those interested in nationalism with new approaches to exploring national identity and its connection to statehood. By using concepts inspired by political science and sociology, namely *habitus*, survival unit, polity hysteresis, and so forth, the different chapters of the volume revitalise the inquiry of the dimensions and features in which the nation and the identification they engender become tools of adaptation in relation to the transformative reality of our own contemporaneity. The authors thus contextualise the latter via the mid-range concept of national resilience at both meso and macro levels.
