The Nationalist Program for China Chao-chu Wu, 1929

A Nation-State by Construction Suisheng Zhao, 2004 This is the first historically comprehensive up to date analysis of the causes content and consequences of nationalism in China an ancient empire that has struggled to construct a nation state and find its place in the modern world It shows how Chinese political elites have competed to promote different types of nationalism linked to their political values and interests and imposed them on the nation while trying to repress other types of nationalism In particular the book reveals how leaders of the PRC have adopted a pragmatic strategy to use nationalism while struggling to prevent it from turning into a menace rather than a prop

Building in China Jeffrey W Cody, 2021-01-15 Building in China is about striking an

architectural balance between the pull of monumental tradition and the push of technological novelty Centering on the dynamic period of post imperial and pre Communist China the book focuses on the building and city planning initiatives of Henry Murphy a little known American architect who initially ventured to China in 1914 to design a campus for the Yale in China programme but who then found himself captivated by a professional and cultural challenge that lasted two decades how to preserve China s rich architectural traditions while also designing new buildings using up to date Western technologies Murphy s buildings were compromises wine in old bottles as he once called them and the book uses those tles as lenses through which to understand not only Murphy s quest to find a middle ground for his architecture in China but also to gaze at a tumultuous society facing an uncertain future Murphy s buildings were more than vessels for either aesthetic visions or technical expertise inadvertently they became political emblems as Chinese rulers such as Chiang Kai shek and Sun Yat sen s son called on Murphy for city planning advice to complement their hopes for urban reconstruction There are few serious studies of Western architects in the twentieth century who practiced in non Western contexts and those scant studies that have been published concentrate largely on British French or Dutch examples in colonial settings Hence the book makes significant contributions to the fields of both American and Chinese architectural history

China Through The Ages Franz Michael,2019-03-13 Past studies of China have concentrated on specific events or have related a chronological history of the dynastic periods These works have included aspects of cultural history but have underemphasized the country s great social political and intellectual movements and their ultimate expression in the art and literature of the time By focusing on such themes Professor Michael provides a new framework for understanding the Chinese cultural tradition The author describes the evolving history of ideas in China from ancient faith in powerful magic to more modern concepts of a logical moral order of the universe and mankind s place in it He also explores the intellectual ferment following the dawn of the age of reason the integration of Buddhism into the Confucian social order and the social transformations accompanying the rise and fall of the centralized state Throughout he illustrates how the changing society s beliefs values and aesthetic sense were embodied in its art and literature This portrayal of the Chinese cultural tradition not only puts Chinese history in a new perspective it also illuminates the process through which China constructed a modern society from a non Western foundation and serves as an essential tool for understanding modern day China and its prospects for the future
