Nation, State, and Territory George W. White, 2007-04-26 Globalization seems to be making nation states increasingly irrelevant yet their number has continued to grow in recent years New nation states emerged out of the ruins of the Soviet Union and Yugoslavia more still may come as Palestinians Kurds Chechens and other peoples struggle tenaciously to establish their own Nation State and Territory shows that national identities are as potent as ever Today many conflicts rage over places and territories of historical linguistic and religious significance Many analyses however only consider the economic and geostrategic value of territory George W White shows that national identity is intimately bound to specific places and territories Nation state and territory are mutually defining and reinforcing phenomena and through careful analysis White examines their origins evolutions and relationships to provide a better understanding of the interactions and conflicts of the world's nation states

world *Histories of Nations* Peter Furtado,2014-11-10 Now in paperback this global bestseller is an engaging and informative read on the history of a diverse array of countries Global histories tend to be written from the limited viewpoint of a single author and a single perspective which results in an inevitable bias In this book however twenty eight different writers and scholars from around the world contribute giving engaging often passionate accounts of their own nation s history The countries featured in *Histories of Nations* have been selected to represent every continent and type of state large and small mature democracies and religious autocracies states that have existed for thousands of years and those born as recently as the twentieth century Each of these countries has a different relationship with history In the United States for example the myth of the nation s historylessness remains strong but in China history is seen to play a crucial role in legitimizing three thousand years of imperial authority History wars over the content of textbooks rage in countries as diverse as Australia Russia and Japan Some countries such as Iran or Egypt are blessed or cursed with a glorious ancient history that the present cannot equal others such as Germany must find ways of approaching and reconciling the pain of the recent past Original thought provoking and handy in its new paperback format *Histories of Nations* is a crucial primer for the Global Age

Nations of Emigrants Susan Bibler Coutin,2011-05-02 The violence and economic devastation of the 1980 1992 civil war in El Salvador drove as many as one million Salvadorans to enter the United States frequently without authorization In *Nations of Emigrants* the legal anthropologist Susan Bibler Coutin analyzes the case of emigration from El Salvador to the United States to consider how current forms of migration challenge conventional understandings of borders citizenship and migration itself Interviews with policymakers and activists in El Salvador and the United States are juxtaposed with Salvadoran emigrants accounts of their journeys to the United States their lives in this country and in some cases their removal to El Salvador These interviews and accounts illustrate the dilemmas that migration creates for nation states as well as the difficulties for individuals who must live simultaneously within and outside the legal systems of two countries During the 1980s U S officials generally regarded these migrants as economic immigrants who deserved to be deported rather than as political refugees who merited asylum By the 1990s these Salvadorans were made eligible for legal permanent residency at least in part due to the lives that they had created in the United States Remarkably this redefinition occurred during a period when more restrictive immigration policies were being adopted by the U S government At the same time Salvadorans in the United States who send relatives more than 3 billion in remittances annually have become a focus of policymaking in El Salvador and are considered key to its future

National Museums and the Origins of Nations Sheila Watson, 2020-10-28 National Museums and the Origins of Nations provides the first international survey of origins stories in national museums and examines the ways in which such museums use the distant past as a vehicle to reflect the concerns of the political present Offering an international comparison of institutions in China North and South America the Middle East Europe and Australia the book argues that national museums tell us more about what sort of community a nation wishes to be today than how and why that nation came into being Watson also reveals the ways in which narrative and exhibition design attempt to engage the visitor in an emotional experience designed to promote loyalty to and pride in the nation or to remind visitors who are not citizens that they do not belong These narratives of origin are it is claimed based on so called factual accuracies but this book reveals that they are often selective emotional and rarely critiqued within institutions At a time when nationalism is very much back on the political agenda this book highlights how museums reflect current political and social concerns National Museums and the Origins of Nations will appeal to academics and students engaged in the study of museums heritage politics nationalism and history

Rethinking Stateless Nations and National Identity in Wales and the Basque Country Sophie Williams, 2018-08-10 This book looks at the fundamental components of national identity as understood by ordinary nation members and the way in which it is mobilised by political elites Drawing on an original case comparison between Wales and the Basque Country the author suggests there are many commonalities between these two nations particularly around the fundamentals of their national identities However differences occur in terms of degree of intensity of feeling and around the politicisation of identity with more entrenched and hostile political positioning in the Basque Country than Wales Through a multi level comparison the book generates insights into national identity as a theoretical concept and in a stateless nation context It argues for national identity's intangible yet polemical nature looking at the primordialist way it is understood its permanence and importance coupled with its lack of everyday salience and consequent obligations **Entangled Identities** Willfried Spohn, 2016-12-05 Providing a comprehensive and comparative analysis of the way national and European identities are

intertwined in old and new member states of the European Union this volume assembles nine country case studies Each country has experienced different processes of state formation nation building and democratization thus they have each developed different forms of national identity and different patterns of interaction between national and European identities The case studies illuminate the similarities and differences in how national and European identities have evolved among the nine countries Rich in empirical data the volume examines the historical entanglement of national and European collective identities and is therefore well suited for courses on European studies including European integration and enlargement international relations and sociology *Crafting State-Nations* Alfred Stepan, Juan J. Linz, Yogendra Yadav, 2011-03-31

Political wisdom holds that the political boundaries of a state necessarily coincide with a nation's perceived cultural boundaries Today the sociocultural diversity of many polities renders this understanding obsolete This volume provides the framework for the state nation a new paradigm that addresses the need within democratic nations to accommodate distinct ethnic and cultural groups within a country while maintaining national political coherence First introduced briefly in 1996 by Alfred Stepan and Juan J Linz the state nation is a country with significant multicultural even multinational components that engenders strong identification and loyalty from its citizens Here Indian political scholar Yogendra Yadav joins Stepan and Linz to outline and develop the concept further The core of the book documents how state nation policies have helped craft multiple but complementary identities in India in contrast to nation state policies in Sri Lanka which contributed to polarized and warring identities The authors support their argument with the results of some of the largest and most original surveys ever designed and employed for comparative political research They include a chapter discussing why the U S constitutional model often seen as the preferred template for all the world's federations would have been particularly inappropriate for crafting democracy in politically robust multinational countries such as India or Spain To expand the repertoire of how even unitary states can respond to territorially concentrated minorities with some secessionist desires the authors develop a revised theory of federacy and show how such a formula helped craft the recent peace agreement in Aceh Indonesia Empirically thorough and conceptually clear *Crafting State Nations* will have a substantial impact on the study of comparative political institutions and the conception and understanding of nationalism and democracy **Ethnopolitics in Cyberspace** Robert A. Saunders, 2011-01-01 Defying predictions that the Internet would eventually create a world where nations disappeared in favor of a unified global village the new millennium has instead seen a proliferation of nationalism on the Web Cyberspace a vast digital terrain built upon interwoven congeries of data and sustained through countless public private communication networks has even begun to alter the very fabric of national identity This is particularly true among stateless nations diasporic groups and national minorities which have fashioned the Internet into a shield against the assimilating efforts of their countries of residence As a deterritorialized medium that allows both selective consumption and inexpensive production of news and information the Internet has endowed a new generation of technology savvy elites with a

level of influence that would have been impossible to obtain a decade ago Challenged nations from Assyrians to Zapotecs have used the Web to rewrite history engage in political activism and reinvigorate moribund languages This book explores the role of the Internet in shaping ethnopolitics and sustaining national identity among four different national groups Albanians outside of Albania Russians in the near abroad Roma Gypsies and European Muslims Accompanying these case studies are briefer discussions of dozens of other online national movements as well as the ramifications of Internet nationalism for offline domestic and global politics The author discusses how the Internet provides new tools for maintaining national identity and improves older techniques of nationalist resistance for minorities Bringing together research and methodologies from a range of fields Saunders fills a gap in the social science literature on the Internet s central role in influencing nationalism in the twenty first century By creating new spaces for political discourse alternative avenues for cultural production and novel means of social organization the Web is remaking what it means to be part of nation This insightful study provides a glimpse of this exciting and sometimes disturbing new landscape

Culture Wars in American Education Michael R. Olneck, 2024-06-03 Culture Wars in American Education Past and Present Struggles Over the Symbolic Order radically questions norms and values held within US Education and analyses why and how culture wars in American education are intense consequential and recurrent Applying the concept of symbolic order this volume elaborates ways in which symbolic representations are used to draw boundaries allocate status and legitimate the exercise of authority and power within American schooling In particular the book illustrates the terms of inclusion by which full membership in the national community is defined limited and contested It suggests that repetitive patterns in the symbolic order for example the persistence of the representation of an individualistic basis of American society and polity constrain the reach of progressive change The book examines the World War I era Americanization movement the World War II era Intercultural Education movement the late twentieth century Multicultural Education movement continuing right wing assaults on Ethnic Studies and Critical Race Theory in the first decades of the twenty first century and historical and contemporary conflicts over the incorporation of languages other than Standard English into approved instructional approaches In the context of continuing culture wars in the United States and across the globe this book will be of interest to graduate students and scholars in critical studies of education history of education sociology of education curriculum theory Multicultural Education and comparative education as well as to educators enmeshed in contemporary tensions and conflicts

New Information Technologies in Organizational Processes Ojelanki Ngwenyama, Lucas D. Introna, Michael D. Myers, Janice I. DeGross, 2013-06-05 A number of relatively new technologies such as Enterprise Resource Planning systems the Internet and intranets have entered the organizational landscape These technologies have not only enabled a wide range of social and organizational transformations but have also challenged much of the received wisdom that operates in academic and industrial discourses This book attempts to capture some of these strands by discussing the social and organizational issues

surrounding the implementation and use of these new technologies in organizational processes Some of the contributions are critical and reflexive by nature while others offer rich insights through the analysis of cases The book represents a wide scope of traditions of thought as well as research approaches in addressing these emerging issues A number of practical and theoretical topics are discussed in detail including Implementation of ERP Electronic commerce Intranet implementation The management of standards Issues of organizational analysis Understanding BPR tools Collaborative technologies Knowledge work environments This book contains the selected proceedings of the International Working Conference on New Information Technologies in Organizational Processes Field Studies and Theoretical Reflections on the Future of Work organized by the International Federation for Information Processing IFIP and held in St Louis Missouri USA in August 1999 This valuable new title will be essential reading for researchers working in information systems and management technology social and organization studies

Peacebuilding, Constitutionalism and the Global South Kajit Bagu (John Paul),2019-07-05 This book presents the case that liberal constitutionalism in the global South is a legacy of colonialism and is inappropriate as a means of securing effective peace in regions that have been subject to recurrent conflict The work demonstrates the failure of liberal constitutionalism in guaranteeing peace in the postcolonial global South It develops an alternative more compelling constitutionalism for peacebuilding in conflicted regions This is based on constitutionalism that recognises plurality as a major feature in the global South Drawing on events in Nigeria it develops a constitutional model based on Cognitive Justice which could deliver peace by addressing historic conceptual legal institutional and structural issues that have created social inequality and injustice The study also incorporates insights from the development of plurinational constitutions in South America The book will be an invaluable resource for researchers academics and policy makers with an interest in constitutional legal theory peacebuilding and postcolonial studies

Military Cooperation in Multinational Peace Operations Joseph Soeters,Philippe Manigart,2009-12-04 This edited volume uses theoretical overviews and empirical case studies to explore both how soldiers cope with the new forms of cultural diversity occurring within various multinational military operations and how their organizations manage them Military organizations like other complex organizations are

now operating in an ever more diverse environment with the missions themselves being ever more varied and mostly conducted in a multinational framework Members of the military have to deal with a host of international actors in the theatre of operations and do so in a foreign cultural environment often in countries devastated by war Such conditions demand a high level of intercultural competence It is therefore crucial for military organizations to understand how military personnel manage this cultural diversity This book will be of much interest to students of peace operations military studies international security as well as sociology and business studies
