## **Native American Ethnobotany:**

**Native American Ethnobotany** Daniel E. Moerman, 1999 Native American Ethnobotany Database includes foods drugs dyes fibers and other uses of plants a total of over 44 000 items This represents uses by 291 Native American groups of 4 029 species from 243 different plant families *Ethnobotany of Western Washington* Erna Gunther, 1973 Forty poems portraying the moods sensations and experiences of childhood

**Native American Ethnobotany** Daniel E. Moerman, 1999 *Native American Food Plants* Daniel E. Moerman, 2010-10-27 Based on 25 years of research that combed every historical and anthropological record of Native American ways this unprecedented culinary dictionary documents the food uses of 1500 plants by 220 Native American tribes from early times to the present Like anthropologist Daniel E Moerman s previous volume *Native American Medicinal Plants* this extensive compilation draws on the same research as his monumental *Native American Ethnobotany* this time culling 32 categories of food uses from an extraordinary range of species Hundreds of plants both native and introduced are described The usage categories include beverages breads fruits spices desserts snacks dried foods and condiments as well as curdling agents dietary aids preservatives and even foods specifically for emergencies Each example of tribal use includes a brief description of how the food was prepared In addition multiple indexes are arranged by tribe type of food and common names to make it easy to pursue specific research An essential reference for anthropologists ethnobotanists and food scientists this will also make fascinating reading for anyone interested in the history of wild and cultivated local foods and the remarkable practical botanical knowledge of Native American forbears

**Ethnobotany of the Ojibwe Indians** Huron H. Smith, 2016-08-24 This bulletin is the third in a series of six recounting the field work done among Wisconsin Indians to discover their present uses of native or introduced plants and insofar as is possible the history of these plant uses by their ancestors As far back as 1888 Hoffman 85 reported that the medicinal lore of the Ojibwe would soon be gone But thirty two years later it is still partially recalled and practised among the more primitive bands of these people How long it will persist is problematical The Ojibwe are the most numerous of any of our tribes and as long as they live in the northern forest and lake district of Wisconsin so long will the older Indians continue to explain the natural history of their environment to the young men and women of the tribe The writer deplores the brevity of the time that could be devoted to each tribe and applauds the similar study reported by Miss Frances Densmore 86 in her fifteen years of research among the Ojibwe Necessarily the most valuable information comes from the oldest Indians and many informants have died since this study was made

[Native American Medicinal Plants](#) Daniel Moerman, 2009-05-13 In *Native American Medicinal Plants* anthropologist Daniel E Moerman describes the medicinal use of more than 2700 plants by 218 Native American tribes Information adapted from the same research used to create the monumental *Native American Ethnobotany* includes 82 categories of medicinal uses ranging from analgesics contraceptives gastrointestinal aids hypotensive medicines sedatives and toothache remedies *Native American Medicinal Plants* includes extensive indexes arranged by tribe usage and common
