Forgotten Heroes of American Education J. Wesley Null, Diane Ravitch, 2006-01-01 This book is titled Forgotten Heroes of American Education because it contains representative writings by significant educators who challenged mainstream thinking The editors of this volume believe that the work of these thoughtful and important educators deserves to be remembered They have been forgotten because in the great pedagogical battles of the twentieth century they lost Time and again they battled with their Progressivist colleagues over the purpose and goals of elementary and secondary education Because they lost the arguments their role as leaders and thinkers was almost completely ignored by historians of education who identified with the winners We think this was a grand mistake To honor the legacy of these eight educators we have written this book and entitled it Forgotten Heroes of American Education **Whither Democracy?** Nels Johann

Lennes, 1927 *The Platonic Idiom* Samuel Louis Dael, 2009-05 Plato became the master for every dictator by sidestepping the Socratic method in his platonic state Plato invented the subjective in an attempt to demean the objective and shuffle away the predicate philosophy of Socrates The Platonic Idiom expresses the infirmity of western civilization **Intelligence**

and Its Measurement, 1921 *The Psychology of Culture* Edward Sapir, 2011-03-01 This work presents Sapir's most comprehensive statement on the concepts of culture on method and theory in anthropology and other social sciences on personality organization and on the individual's place in culture and society Extensive discussions on the role of language and other symbolic systems in culture ethnographic method and social interaction are also included Ethnographic and linguistic examples are drawn from Sapir's fieldwork among native North Americans and from European and American society as well Edward Sapir 1884-1939 one of this century's leading figures in American anthropology and linguistics

planned to publish a major theoretical statement on culture and psychology. He developed his ideas in a course of lectures presented at Yale University in the 1930s which attracted a wide audience from many social science disciplines. Unfortunately, he died before the book he had contracted to publish could be realized. Like de Saussure's *Cours de Linguistique Générale* before it, this work has been reconstructed from student notes in this case twenty-two sets as well as from Sapir's manuscript materials. Judith Irvine's meticulous reconstruction makes Sapir's compelling ideas of surprisingly contemporary resonance available for the first time. **Culture** Regna Darnell, Judith T. Irvine, Richard Handler, 2010-12-14. No detailed description available for **Culture**. **A Textbook of Psychology** William McDougall, 2004. Contents: Introductory, The Behaviour of the Lower Animals, Behaviour of Insects, Behaviour of the Vertebrates, The Instincts of the Mammals and of Man, Habit and Intelligence in Animals, Behaviour of the Natural Man, 8. Perceptual Thinking, Attention and Interest, Imagining, Anticipating, Recollecting, Emotion, The Derived Emotions, Disposition, Temper, Temperament and Moods, Belief and Doubt, Growth and Mental Structure, Reasoning and the System of Beliefs, Growth of Mental Structure. *An Outline of Psychology* William McDougall, 1923. *Adult Education* Joseph Kinmont Hart, 1927. *The Oxford Companion to the History of Modern Science* John L. Heilbron, 2003-02-14. Containing 609 encyclopedic articles written by more than 200 prominent scholars, *The Oxford Companion to the History of Modern Science* presents an unparalleled history of the field invaluable to anyone with an interest in the technology, ideas, discoveries, and learned institutions that have shaped our world over the past five centuries. Focusing on the period from the Renaissance to the early twenty-first century, the articles cover all disciplines: Biology, Alchemy, Behaviorism, historical periods, the Scientific Revolution, World War II, the Cold War, concepts, Hypothesis, Space and Time, Ether, and methodologies and philosophies, Observation and Experiment, Darwinism. Coverage is international, tracing the spread of science from its traditional centers and explaining how the prevailing knowledge of non-Western societies has modified or contributed to the dominant global science as it is currently understood. Revealing the interplay between science and the wider culture, the Companion includes entries on topics such as minority groups, art, religion, and science's practical applications. One hundred biographies of the most iconic historic figures chosen for their contributions to science and the interest of their lives are also included. Above all, *The Oxford Companion to the History of Modern Science* is a companion to world history, modern in coverage, generous in breadth, and cosmopolitan in scope. The volume's utility is enhanced by a thematic outline of the entire contents, a thorough system of cross-referencing, and a detailed index that enables the reader to follow a specific line of inquiry along various threads from multiple starting points. Each essay has numerous suggestions for further reading, all of which favor literature that is accessible to the general reader, and a bibliographical essay provides a general overview of the scholarship in the field. Lastly, as a contribution to the visual appeal of the Companion, over 100 black and white illustrations and an eight-page color section capture the eye and spark the imagination. *The Business Educator*, 1922. **The Other Zulus** Michael R. Mahoney, 2012-07-04. A detailed history
