A Guide to Native Plants of the New York City Region Margaret B. Gargiullo, 2007 It is no secret that with each new office park strip mall and housing development that slices through the New York New Jersey and Connecticut landscape more and more indigenous plant habitats are being destroyed Concrete after all is not a friendly neighbor to vegetative life Less common wisdom however holds that plants native to this region have been disappearing rapidly for a variety of reasons and some of the causes can be avoided even as construction projects continue to move in One of the most serious threats to indigenous plants is the introduction of invasive non native species by landscapers after new developments are built In this unique guide ecologist Margaret B Gargiullo presents a detailed look at the full scope of flora that is native to this region and available for propagation She offers practical advice on how to increase the amount of indigenous flora growing in the metropolitan area and in some cases to reintroduce plants that have completely disappeared More than one hundred line drawings of plants and their specific habitats ranging from forests to beaches help readers visualize the full potential for landscaping in the area A separate entry for each plant also provides detailed information on size flower color blooming time and its possible uses in wetland mitigation erosion control and natural area restoration Some plants are also highlighted for their ability to thrive in areas that are typically considered inhospitable to greenery Geared specifically for landscape architects designers land managers and restorationists and easily searchable by plant type or habitat this guide is an essential reference for everyone concerned with the region's native plant life Since most of the plants can also be grown well beyond the New York City metropolitan area this book will also be useful for project managers doing restoration work in most of southern New England and the mid Atlantic region including Pennsylvania Delaware and Maryland
