Governing the New Europe Jack Ernest Shalom Hayward, Edward Page, 1995 Governing the New Europe provides a comprehensive and scholarly account of the changing political map of Europe as it emerges from the Cold War Exploring the variations of liberal democracy and market economy among the European states as well as current trends in these directions the contributors to this volume all leading authorities in European politics consider whether a common political model has begun to emerge out of historic European diversity Beginning with a discussion of the political economic and cultural development of Europe from a historical perspective the focus of the book shifts to an examination of the changing forms of European democracy and the move from public ownership and planning to privatization and deregulated competition Further essays analyze the challenge to national party systems and electoral performance from emerging social movements and organized interest groups Political and bureaucratic structures are also examined as is the new European constitutionalism reflected in the increasingly significant role of the judiciary Lastly attention is turned to several major themes in European politics the changing foundations of foreign and security policy the function of industrial champion firms and the retreat from the welfare state Primarily comparative in its scope Governing the New Europe does devote particular attention to specific major states as well

as to the importance of the European Union to the political life of member and non member countries Neither exaggerating the common features of the patterns that have emerged in contemporary Europe nor capitulating to the complexity of enduring differences and instabilities between states *Governing the New Europe* will become one of the standard texts in its field Contributors Jack Hayward Jolyon Howorth Herbert Kitschelt Marie Lavigne Tom Mackie Michael Mezey Edward C Page Richard Parry Richard Rose Anthony Smith Alec Stone *NATO in the New European Order* Fergus Carr, Kostas Ifantis, 1996 The European security environment has undergone profound change since 1989 This book examines NATO's response and adjustment to the new security environment It analyses the process of change in the European order and its effects upon transatlantic relations The new institutional map of Europe is assessed in its capacity to respond to multilevel security risks Instability in the Balkans forms a special focus of the book Finally the question of NATO's enlargement to Eastern Europe is considered BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **The Politics of the New Europe** Ian Budge, Kenneth Newton, 2014-01-21 A pioneering textbook which explains the dynamics of politics across Europe in the post Cold war era Comparing democratisation transition to a market economy and increasing economic and political integration in the countries of central and eastern Europe with experiences in Scandinavia and southern and western Europe the book provides a wealth of information and analysis on the state of Europe at the end of a momentous century of European and World history **Public Policy and the New European Agendas** Fergus Carr, Andrew Massey, 2006-01-01 This broad and all encompassing study focuses on Europe's new policy agendas It brings together international academic experts on a range of policies to discuss Europe's place in the world and its relationship to the USA and beyond This book concentrates on two key themes of particular salience for policy makers the enlargement of the EU and the place of Europe in international politics An expansive list of important policy areas within these themes is explored including enlargement political and constitutional implications and international socialization of central and eastern Europe Europe and the USA security and defence policy trade finance and development institutional development and external relations in justice and home affairs before and after September 11 international terrorism EU immigration and asylum and borders policy human rights and civil rights agriculture environmental policy and regional policy pensions and ageing in Europe This book constitutes a major contribution to achieving a deeper understanding of European integration and the barriers to integration within the context of global and multi level governance As such it will be of enormous interest to an extensive audience including academics researchers students policy makers and practitioners in the fields of political studies international relations public policy European studies US studies and security studies The Transatlantic Alliance on the Eve of the New Millennium Snežana Trifunovska, 2024-09-02 Within these pages is a veritable banquet for those who savour the politics of international security The reader is offered factual analysis insight new perspectives revisited concepts problem spotting and recipes for solutions Academic observers from a dozen different

countries in Eastern and Western Europe and on both sides of the Atlantic subject a large number of questions of topical interest in the security field to one or other of these forms of treatment Their debate embraces reinforcement of the European pillar of the Alliance adjustment of the balance of responsibilities between the two sides of the Atlantic and shoring up the transatlantic partnership and perhaps broadening it into that elusive concept a transatlantic community stretching into economic and other fields They address the perceived security vacuum in parts of Central and Eastern Europe and discuss measures to build up greater confidence between former Cold War antagonists and ways of developing in them the habits of co operation rather than counter operation They draw up architectural designs for the security of the twenty first century and grapple with the conflict of ideas circulating about the Alliance s future and particularly about its future relationship with Russia Isolationism nationalism multilateralism realism constructivism and other isms are helpfully put into context Renationalisation denationalisation and identities in formation or in decline are also investigated **The**

Kanet, Dina

Moulioukova, 2021-09-27 This volume examines the role of Russia in the world under President Putin s rule When the Soviet Union disintegrated after the Cold War Russia seemingly embarked on the establishment of a democratic political system and seemed intent on joining the liberal international order However under President Putin s rule there have been dramatic shifts in Russian domestic and foreign policies in order to re establish itself as a great power This book examines broad aspects of Russian political culture and threat perception such as Russia s reaction to NATO expansion its information warfare and energy policies and its policy towards the Global South especially the Middle East and Africa The objective of the analyses is

to explain the factors that influence Russian foreign policy and to show how and why Russian relations with the European Union and the United States have deteriorated so rapidly in recent years The volume introduces an alternative approach to the standard realist perspective which often underlies existing analyses of Russian policy namely the work offers a theoretical perspective that focuses on the Russian sense of identity and on ontological security This book will be of much interest to students of Russian foreign policy security studies and International Relations European Foreign Policy Christopher Hill, Karen E. Orders of Exclusion Kyle M. Lascurettes, 2020 When and why do powerful countries seek to enact major changes to international order the broad set of rules that guide behavior in world politics This question is particularly important today given the Trump administration's clear disregard for the reigning liberal international order in the United States Across the globe there is also uncertainty over what China might seek to replace that order with as it continues to amass power and influence Together these developments mean that what motivates great powers to shape and change order will remain at the forefront of debates over the future of world politics Prior studies have focused on how the origins of international orders have been consensus driven and inclusive By contrast Kyle Lascurettes argues in *Orders of Exclusion* that the propelling motivation for great power order building has typically been exclusionary Dominant powers pursue fundamental changes to order when they perceive a major new threat on the horizon Moreover they do so for the purpose of targeting this perceived threat be it another powerful state or a foreboding ideological movement The goal of order building then is blocking that threatening entity from amassing further influence a motive Lascurettes illustrates at work across more than three hundred years of international history Far from falling outside of the bounds of traditional statecraft order building is the continuation of power politics by other means

The Enlargement of Europe Stuart Croft, 1999 What will happen to the EU in the wake of enlargement What are the institutional and policy making changes in light of enlargement This book newly available in paperback deals with the theoretical conceptual and historical processes that led to European Union enlargement It discusses the effects of enlargement on selected European Union policies agriculture single market foreign security and defence policy immigration and looks at the effect of the institutional reforms that were made at Amsterdam and Nice as well as considering the significance of the debates on the Constitution It contains chapters by leading European scholars from both sides of the Atlantic The chapters report current research and employ a variety of methodological and theoretical perspectives This book is unique in looking at the issues that the EU faces in the aftermath of Eastern enlargement Europe: the Cold Divide Fergus Carr, 2016-07-27 A useful examination of the degree to which a new Cold Divide separates Europe this book places NATO Russian relations within a wider analysis of post Cold War political social and economic divisions in Europe It compares and contrasts the interests and perceptions of Western Europe East Central Europe and Russia in the New

European Order It analyses the role of the European Union NATO the OSCE and the WEU in mediating conflict and responding to the challenge of the new European security agenda *Democratic Consolidation in Eastern Europe* Jan Zielonka,Alex Pravda,2001 This second volume in a series of books on democratic consolidation in Eastern Europe analyzes the external parameters of such a consolidation in thirteen Eastern European countries It explores how different international actors and various economic cultural and security types of transnational pressures have shaped democratic politics in the region especially over the last decade **The New European Union and Its Global Strategy** Valentin Naumescu,2019-10-17 In a relatively short period of time the European Project has faced an incredibly diverse spectrum of crises and challenges From the Eurozone crisis to the sovereign debt crisis and from the migration crisis to Brexit the European Union has found itself confronted with unprecedented internal and external threats and pressures The Global Strategy of 2016 and the Permanent Structured Cooperation PESCO in the field of defence of 2017 are just two of the new strategies and policies to which it has turned Whether the Franco German engine will succeed in surpassing this critical moment and trigger a deep reform of the European Union remains to be seen Raising its level of strategic ambition the European Union projects itself as a global actor in the system of international relations reshaping its ties with the United States China and Russia However European security along with the topics of European politics and society remain subjects of intense debate This volume offers a number of possible answers to various questions regarding the future of the European Union and its relationships with the rest of the world Based on a variety of perspectives from international relations European studies political science economics and cultural studies the contributions here address the conundrum of the EU s transformations
