Child Care Needs and Numbers Jean Packman, 2021-11-07 Originally published in 1968 the study described in this title began in a very small way in late 1960 At that time some Oxfordshire county councillors and children's department officials were very conscious that the number of children in care in the county was high in comparison with the national average This meant that expenditure was also high The County's position however was not unique Oxford City was in a similar position but other neighbours did not appear to have the same problem A small research project was launched to investigate and it soon became apparent that there was a large and complex problem to be solved The problem was of striking persistent and puzzling variations in the proportion of children in care in the different local authority children's departments of England and Wales This seemed to warrant a larger investigation on a country wide basis and this book outlines the findings of that project

Social Support Networks James K. Whittaker, James Garbarino, This book offers for the first time a clear conception of what social support networks are why they are important how they are identified and sustained where they fit in an overall framework of human services and their limits and potential in selected fields of practice Individual chapters explore child adolescent and family services daycare and early childhood development divorced and stepfamilies schools delinquency prevention and treatment mental health service to the elderly development disabilities

healthcare and health promotion and drug treatment The use of social support networks extended family friends neighbors and other informal helpers is an idea whose time has come in the human services field At a time when spiraling costs and popular sentiment weigh against any major expansion of services it is apparent that a service strategy based primarily on the notion of professional helping delivered on a case by case basis usually in a one to one relationship has serious limitations Professional response to this major work has been uniformly positive The editors have assembled a book of considerable importance brilliant in both scholarship and construction will appeal to a broad readership Gerald Euster University of South Carolina offers a much needed balance to the focus on individual and internal dynamics which has characterized social work education for several decades Eleanor Reardon Tolson University of Chicago Social Support Networks is a valuable contribution a unique original and authoritative book an exciting timely and definitely practice oriented book with a strong theoretical and research base Anthony N Maluccio University of Connecticut James K Whittaker is professor of social work at the University of Washington A former childcare worker therapist and administrator in residential childcare he has been a consultant to governmental and voluntary children s agencies throughout the United States James Garbarino is Elizabeth Lee Vincent Professor of Human Development in the College of Human Ecology at Cornell University He was president of the Erikson Institute for Advanced Study in Child Development Chicago Illinois from 1985 to 1994 He is the co author of Troubled Youth Troubled Families also available from AldineTransaction **Family Child Care Homes** Linda J.

Child Care and Adult Crime Brian Minty, Colin Ashcroft, 1987

Perspectives in Child Care Policy Lorraine Fox Harding, 2014-06-11 Child care law and policy issues generate very strong emotions and some crucial questions concerning the role of the state For instance under what circumstances should the state be able to intervene and use the force of the law to protect children Do children have similar rights to adults Such questions are matters of controversial debate and in the light of well publicised child abuse cases official inquiries and a government review led to the passing of the Children Act in 1989 Perspectives in Child Care Policy presents four different value perspectives on child care policy laissez faire state paternalism defence of the birth family and children s rights These perspectives differ in their underlying values concepts and assumptions concerning children families the rights and powers of parents and the role of the state

Beyond Nature and Nurture Javier Pérez-Jara, Íñigo Ongay, 2025-05-28 This book gathers several of the world s leading scholars in the nature vs nurture debate offering a timely reconsideration of the dynamic interactions between physical chemical biological social and cultural factors that shape human multidimensionality Emphasizing this multidimensionality this edited volume seeks to bridge the divide between biology and social theory two research communities that have too often overlooked each other These disciplines despite being central to understanding human nature have long operated in isolation While some animal species exhibit higher degrees of phenotypic plasticity in specific traits humans stand out as the most plastic species in both their neurological and sociocultural systems This plasticity leads the contributors of this book to move beyond both biological reductionism and the blank slate hypothesis While biology undoubtedly plays a role in shaping and stabilizing human social and cultural processes it does so only within the framework of an inherently social environment one shaped by historically contingent and socially constructed realities such as values codes and cultural perceptions More importantly cultural structures and social interactions actively shape and transform certain biological features that were once considered immutable This book lays the groundwork for a productive dialogue among biologists psychologists social theorists and philosophers It also highlights some of the moral and political

consequences of different perspectives within the nature vs nurture debate Through updated scientific and philosophical theorizing the chapters in this book aim to overcome once and for all the simplistic yet persistent opposition between nature and nurture offering a far more complex and dynamic yet richer and epistemologically manageable picture of the human being
