Classification of the Natural Communities of North Carolina Michael P Schafale, 2024-06 The North Carolina Natural Heritage Program's Classification of the Natural Communities now in its fourth edition is intended as a reference book describing the state's biodiversity at the community and ecosystem levels It describes natural patterns of organisms that typically co occur together in a particular kind of environment The classification draws on years of use and data collection by North Carolina's Natural Heritage Program the extensive vegetation plot data of the Carolina Vegetation Survey and the National Vegetation Classification The classification units are intended for detailed conservation planning at the natural community level for representing the diversity of ecological function for characterizing the habitats of species and for contributing to the conservation of the myriad species that are too poorly known to track individually The 343 community subtypes are grouped into types and are nested within 30 broader ecological themes that have been recognized in North Carolina for decades retaining continuity with previous editions Material to aid in identification of the communities includes concept statements dichotomous keys and descriptions of the distinctions from closely related communities Extensive descriptions of each community and each theme include sections on physical settings soils hydrology vegetation range abundance and ecological dynamics using scientific nomenclature and terminology

Crosswalks to the National Vegetation Classification and to NatureServe's ecological systems and listings of rare plant and animal species associated with each community provide additional functionality. While technical in style, mostly providing scientific names instead of common names, this book can offer the educated layperson and scientist alike an expanded appreciation of the diversity of natural settings in North Carolina. It is expected to remain a primary reference for years to come. An electronic pdf version of this book is available for download from the North Carolina Natural Heritage Program at <https://www.ncnhp.org>

White Mountain National Forest (N.F.), Forest Plan Revision, Proposed Land and Resource Management Plan, 2005 **Nature's Transcendence and Immanence** Jea Sophia Oh, Marilyn Lawrence, 2017-12-22

What does it mean for nature to be sacred? Is anything supernatural or even unnatural? Nature's Transcendence and Immanence: A Comparative Interdisciplinary Ecstatic Naturalism discusses nature's divinizing process of unfolding and folding through East-West dialogues and interdisciplinary methodologies. Nature's serving God-ing processes are the sacred that is revealed as nature's transcendent and immanent dimensions. Each chapter of Nature's Transcendence and Immanence: A Comparative Interdisciplinary Ecstatic Naturalism shares a part of nature's sacred folds that are complexes within nature that have unusual semiotic density. These discussions serve to help restore a better relationship to nature as a whole through an innovative combination of research and ideas from a variety of traditions and disciplines. This collection not only introduces ecstatic naturalism and deep pantheism as sacred practices of philosophy and theology but also invites a broader audience from a wide range of academic disciplines such as neuro-psychoanalysis, aesthetics, mythology, neuroscience, and artificial intelligence. Kentucky's Natural Heritage Greg Abernathy, Deborah White, Ellis L. Laudermilk, Marc Evans, 2016-01-21. Kentucky's abundance of plant and animal life from the bottomland swamps in the west to the rich Appalachian forests in the east is extraordinary as well as beautiful. Glades, prairies, forests, wetlands, rivers, and caves form a biologically diverse patchwork that is unique to the state. Kentucky's Natural Heritage: An Illustrated Guide to Biodiversity provides an essential reference to the remarkable natural history of the commonwealth and is a rallying call for the conservation of this priceless legacy. Kentucky's ecosystems teem with diverse native species, some of which are found nowhere else in the world. Kentucky's Natural Heritage brings these sometimes elusive creatures into close view from black-throated green warblers to lizard skin liverworts. The aquatic systems of the state are home to rainbow darters, ghost crayfish, salamanders, mussels, and an

impressive array of other species that constitute some of the greatest levels of freshwater diversity on the planet Kentucky's Natural Heritage presents a persuasive argument for conservation of the state's biodiversity Organized by a team from the Kentucky State Nature Preserves Commission the book is an outgrowth of the agency's focus on biodiversity protection Richly detailed and lavishly illustrated with more than 250 color photos maps and charts Kentucky's Natural Heritage is the definitive compendium of the commonwealth's amazing diversity It celebrates the natural beauty of some of the most important ecosystems in the nation and presents a compelling case for the necessity of conservation

Nature's Sublime Robert S. Corrington, 2013-03-14 Nature's Sublime uses a radical new form of phenomenology to probe into the deepest traits of the human process in its individual social religious and aesthetic dimensions Starting with the selfing process the essay describes the role of signs and symbols in intra and interpersonal communication At the heart of the human use of signs is a creative tension between religious symbols and the novel symbols created in the various arts A contrast is made between natural communities which flatten out and reject novel forms of semiosis and communities of interpretation which welcomes creative and enriched signs and symbols The normative claim is made that religious sign symbol systems have a tendency toward tribalism and violence while the various spheres of the aesthetic are comparatively non tribal or even deliberately anti tribal The concept experience of beauty and the sublime is meant to replace that of religious revelation The sublime is not merely an internal mode of attunement contra Kant but comes from the very depths of nature in the potencies of nature naturing
