Bioprospecting of Indigenous Bioresources of North-East India Jubilee Purkayastha, 2016-08-16 This work is a comprehensive information on the indigenous bioresources of North Eastern India with the scope of bioprospecting for discovery and commercialization of new sources and products and long term ecological balance The exploration conservation and sustainable utilization of bioresources of world s Megabiodiversity Hotspots are undeniable North Eastern India is a recognised biodiversity hot spot where the evolutionary forces are at its optimum making this region as centre of origin for many species Although little bit exploratory studies have been conducted in this part of the globe but a scientific exploitation of the bioresources is almost lacking Unscientific exploitation and overexploitation without proper knowledge of the bioresources may lead to imbalanced ecosystem of this mega diversity region At the same time very less exploration and exploitation will hamper biodiversity based development Today unscientific dramatic changes are underway in this region Human activities are changing degrading and destroying the bioresources in an unplanned manner Scientific bioprospecting of the bioresources will boost the economy while ensuring conservation This book offers comprehensive information about various levels of bioprospecting of the gene pool of this Indo Burma Mega Biodiversity Hot Spot the North East India which is endowed with huge biodiversity potential for exploration and exploitation for the benefit of humankind Also this book highlights the less and merely explored part of the indigenous biodiversity of North East India with explanation towards their better sustainable exploitation for benefit of the people economy and environment The novelty of the book lies in expert coverage of the bioresources of this mega diverse region including plants microbes insects etc with provisions for their sustainable scientific utilization This book portrays North East India as a melting pot of bioresources which are little explored and also those resources which are still to be explored The book mainly highlights the bioprospecting approaches for North East Indian bioresources and thus it make itself a unique one in filling the knowledge gap that is there regarding the bioprospecting of the biodiversity of this special region on the earth The book concludes by the ecotourism potential of this region The target audiences for this book include biodiversity economists who are working on technology and bioresource management issues and especially on biotechnology and biodiversity development economists addressing the issues of bioresources in developing countries These

people may be in academia in government in non governmental organizations and in private companies The other target audiences group is policy scholars in government public sectors who are interested in issues of biotechnology IPRs and biodiversity In addition scholars experts in both development studies and resource management studies form another group of target audiences Also the book will be useful for the interaction between developed and developing nations regarding the issues of biodiversity and bioprospecting as North Eastern India is the hub of Biodiversity

Handbook of Climate Change Across the Food Supply Chain Walter Leal Filho,Ilija Djekic,Sergiy Smetana,Marina Kovaleva,2022-04-22 This book presents climate change as a global phenomenon which affects the entire food chain Many studies analyzing environmental impacts of food systems confirm significant effects of food production on climate change Most of them associate primary production with emission of greenhouse gasses identified as one of the causes resulting in warming the atmosphere and global climate effects A wider perspective shows that the food chains start at farms with consumers being at the end of the pipeline This approach emphasizes the role of the entire food chain highlighting different kinds of environmental impacts affecting climate change On the other side temperature changes and variations of precipitation patterns together with extreme weather events and water reduction are recognized as predictors for producing less food decreased food quality new food safety risks biodiversity losses and depletion of resources associated with food production in modified circumstances Last but not least these effects introduce new threats known as food security where some assumptions stress that almost one billion of people are hungry not receiving enough food as a result of climate changes As a result the UN highlights the need for combating climate change and promotes sustainable food consumption and production Based on the perceived need to promote and disseminate information on climate change related to food system the Handbook of Climate change across the food supply chain is being produced The publication compiles information experiences practical initiatives and projects around the subject matter and makes it available to a wide audience It is expected that the Handbook of Climate change across the food supply chain makes many benefits of climate service clearer and inter alia leads to an increase in the demand for such important services

Dictionary of Plant Breeding Rolf H. J. Schlegel,2009-10-14 Arguably one of the oldest scientific traditions plant breeding began in Neolithic times with methods as simple as saving the seeds of desirable plants and sowing them later It was not until the re encounter with Mendel s discoveries thousands of years later that the genetic basis of breeding was understood Developments since then have provided further insight into how genes acting alone or in concert with other genes and the environment result in a particular phenotype From Abaxial to Zymogram the Dictionary of Plant Breeding contains clear and useful definitions of the terms associated with plant breeding and related scientific technological disciplines This second edition of a bestseller defines jargon provides helpful tables examples and breeding schemes and includes a list of crop plants with salient details Packed with data and organized to make that data easy to access this revised and expanded reference provides comprehensive coverage of the latest discoveries in cytogenetics

molecular genetics marker assisted selection experimental gene transfer seed sciences crop physiology and genetically modified crops A complex subject plant breeding draws from many scientific and technological disciplines often making it difficult to know the precise meanings of many terms and to accurately interpret specific concepts Most dictionaries available are highly specific and fragmentary As in the previous edition this dictionary unifies concepts by including the specific terms of plant breeding and terms that are adjusted from other disciplines Drawing on the author's 30 years of experience the dictionary provides an encyclopedic list of commonly used technical terms that reflect the latest developments in the field

Sadi Gürses, 2016-05-04 In this book the authors go back to basics to describe the structural differences between dyes and pigments their mechanisms of action properties and applications They set the scene by explaining the reasons behind these differences and show how dyes are predominately organic compounds that dissolve or react with substrates whereas pigments are predominantly finely ground inorganic substances that are insoluble and therefore have a different mode of coloring They also describe the role of functional groups and their effect on dyeing ability contrasting this with the way in which pigments cause surface reflection or light absorption depending on their chemical and crystalline structure and relative particle size The book explores the environmental impact of dyes in a section that covers the physical chemical toxicological and ecological properties of dyes and how these are used to assess their effect on the environment and to estimate whether a given product presents a potential hazard Lastly it assesses how in addition to their traditional uses in the textile leather paper paint and varnish industries dyes and pigments are indispensable in other fields such as microelectronics medical diagnostics and in information recording techniques **Nematology in South Africa: A View from the 21st Century** Hendrika Fourie, Vaughan W. Spaul, Robin K. Jones, Mieke S. Daneel, Dirk De Waele, 2017-02-28 This unique book contains not only a comprehensive up to date summary of the achievements made in all areas of Nematology in South Africa over more than half a century but it also combines this rather technical part with an insiders narrative of how Nematology started and developed It also demonstrates how the South African community of nematologists gradually adapted to major changes in agriculture These were due to a major political shift followed by socio economic changes and this in an often challenging natural environment At the same time this book is conceived as a useful source for young scientists to provide them with practical knowledge and critical insight in the field of Nematology The information given is based primarily on research conducted by nematologists in South Africa Most of this research was aimed at finding workable solutions for nematological problems confronted by both large scale commercial producers and

smallholding farmers During a period when funding for scientific research is becoming increasingly scarce the future demand and quest for practical solutions by applied research will only increase Human-Centered Digitalization, Volume 3
