National Guard Bureau, 2000 *State of the World 2001* Lester Russell Brown, Worldwatch Institute, 2001 An indispensable guide for anyone concerned with the future of life on our planet *The Skeptical Environmentalist* Bjørn Lomborg, 2001 The Skeptical Environmentalist challenges widely held beliefs that the environmental situation is getting worse and worse The author himself a former member of Greenpeace is critical of the way in which many environmental organisations make selective and misleading use of the scientific evidence Using the best available statistical information from internationally recognised research institutes Bjørn Lomborg systematically examines a range of major environmental problems that feature prominently in headline news across the world His arguments are presented in non technical accessible language and are carefully backed up by over 2500 footnotes allowing readers to check sources for themselves Concluding that there are more reasons for optimism than pessimism Bjørn Lomborg stresses the need for clear headed prioritisation of resources to tackle real not imagined problems The Skeptical Environmentalist offers readers a non partisan stocktaking exercise that serves as a useful corrective to the more alarmist accounts favoured by campaign groups and the media Vital Signs 2001-2002 Worldwatch Institute, 2014-04-08 This annual volume from the Worldwatch Institute gives prominence to key trends that too often escape the attention of the news media world leaders and economic experts By distilling 45 vital signs of our times from thousands of government industrial and scientific sources the volume allows readers to track key indicators that show social economic and environmental progress or the lack of it Each trend is presented in both text and graphics *Policy Issues in Insurance Catastrophic Risks and Insurance* OECD, 2005-07-06 These conference proceedings present academic analysis country reports and financial insurance company assessments on how to handle losses caused by large scale catastrophes including terrorism and atmospheric perils **Climatic Change: Implications for the Hydrological Cycle and for Water Management** Martin Beniston, 2006-04-11 year simulations in order to

separate noise in the system from the climate change signal Several contributing papers focused on case studies using Regional Climate Models RCMs linked to hydrological models applied to the analysis of runoff under conditions of convective activity and extreme precipitation in regions of complex topography or stakeholder driven investigations such as water runoff simulations in Quebec undertaken for a major utility Thorough analyses of GCM results for the Century were reported at the Workshop in order to illustrate the improvements in model results which have taken place in recent years and the increasing confidence with which the models can be used for projecting climatic change in coming decades However there is still much room for improvement there is also a need to address more fully the manner in which climate and impacts models e g hydrological models can be linked in terms of consistency and the overlap between different scales the underlying physical assumptions and the parameterizations used Session 2 was devoted to the two extremes of water resources namely floods and droughts the focus here being to identify the climate change component in river floods These have significant economic implications as was shown by several scientists from Western and Central Europe Many long time series have been studied worldwide with the aim of detection of nonstationarities yet there is no conclusive evidence of climate related changes in flow records in general

**MANAGING CRISES** Uriel Rosenthal, Arjen Boin, Louise K. Comfort, 2001-01-01 In this book the editors with 25 notable contributors expand the knowledge of crisis management focusing on case studies of high profile events that have occurred in recent history Part One of the text aims at theoretical development through empirical case studies and also postulates a crisis typology and charts specific theoretical and administrative challenges The case bank which comprises the bulk of the book is presented in four additional sections The first deals with the development of crises and compares the infamous Watts riots with the 1992 L A riots It also analyzes the fragmented and complex international environment that allowed the safe area in Bosnia to be overrun by Bosnian Serbs in 1995 The final chapter chronicles the incredible human costs of mismanaged crisis in the Rwanda massacres in 1994 The second section explores the many decisional dilemmas that confront crisis managers Cases include the fire at the Piper Alpha oil rig the 1999 Turkish earthquakes the Eindhoven Holland plane crash and crisis management of the Mad Cow epidemic disease in the U K The third section explores the long term dimensions of crises and crisis management and particularly the development of national traumas such as the assassination of Sweden s Prime Minister Olaf Palme in 1986 the 1992 Amsterdam air crash and the TWA flight 800 disaster in 1996 The final section shifts focus to future scenarios such as speculative information technology disasters potentially devastating viral epidemics deteriorating environmental and societal conditions in Russia the southwest U S coming water shortage and the outlook for Japan one of the world s most disaster prone countries Summarizing the research findings of the past decade the authors describe patterns in the paths toward crises the dilemmas and coping mechanisms that emerge during the thick of crisis and very importantly the pathways that lead away from crisis **Vital Signs 2001** Janet N. on human and environmental security and peace as well as policy conclusions for cooperation and partnership in the Mediterranean in the 21st century      Resilience in the Pacific and the Caribbean Simon Hollis,2020-10-26 This book critically examines the global diffusion and local reception of resilience through the implementation of Disaster Risk Reduction DRR programmes in Pacific and Caribbean island states Global efforts to strengthen local disaster resilience capacities have become a staple of international development activity in recent decades yet the successful implementation of DRR projects designed to strengthen local resilience remains elusive While there are pockets of success a gap remains between global expectations and local realities Through a critical realist study of global and local worldviews of resilience in the Pacific and Caribbean islands this book argues that the global advocacy of DRR remains inadequate because of a failure to prioritise a person orientated ethics in its conceptualization of disaster resilience This regional comparison provides a valuable lens to understand the underlying social structures that makes resilience possible and the extent to which local governments communities and persons interpret and modify their behaviour on risk when faced with the global message on resilience This book will be of much interest to students of resilience risk management development studies and area studies

**Risk in Emerging Economies** Alcira Kreimer, Margaret Arnold, 2000-01-01 In 1999 natural catastrophes and man made disasters claimed more than 105 000 lives 95 percent of them in the developing world and caused economic losses of around US 100 billion In 1998 the twin disasters of the Yangtze and Hurrican Mitch accounted for two thirds of the US 65 billion loss The geographical areas affected may vary but one constant is that the per capita burden of catastrophic losses is dramatically higher in developing countries To respond to an increased demand to assist disaster recovery programmes the World Bank set up the Disaster Management Facility in 1998 to help provide the Bank with a more rapid and strategic response to disaster emergencies The DMF focuses on risk identification risk reduction and risk sharing transfer the three major topics in this volume The DMF also promotes strategic alliances with key private government multilateral and nongovernmental organisations to ensure the inclusion of disaster risk reduction as a central value of development The most important of these partnerships is the ProVention Consortium launched in February 2000 based on the premise that we must all take responsibility for making the new millennium a safer one *Citizens without a City* Jan-Jonathan Bock, 2022-02-01 In 2009 after seismic tremors struck the Italian mountain town of L Aquila survivors were subjected to a second earthquake invasive media attention and a relief effort that left them in a state of suspended citizenship as they were forcibly resettled and had to envision a new future In *Citizens without a City* Jan Jonathan Bock reveals how a disproportionate government response exacerbated survivors sense of crisis divided the local population and induced new types of political action Italy s disenfranchising emergency reaction relocated citizens to camps and sites across a ruined townscape without a plan for

restoration or return Through grassroots politics arts and culture commemoration rituals architectural projects and legal avenues local people now sought to shape their hometown s recovery Bock combines an analysis of the catastrophe s impact with insights into post disaster civic life urban heritage the politics of mourning and community fragmentation A fascinating read for anyone interested in urban culture disaster and politics Citizens without a City illustrates how survivors battled to retain a sense of purpose and community after the L Aquila earthquake
