

A woman with voluminous, curly red hair is shown in profile, looking towards the left. She has a contemplative expression. She is wearing a dark blue or black long-sleeved top and a thin gold chain necklace. Her right hand is resting behind her head. The background is a blurred bookshelf filled with books and some decorative objects, suggesting a library or study environment.

Other Way Around:

Freedom, Fatalism, and Foreknowledge John Martin Fischer, Patrick Todd, 2015 We typically think we have free will But how could we have free will if for anything we do it was already true in the distant past that we would do that thing Or how could we have free will if God already knows in advance all the details of our lives Such issues raise the specter of fatalism This book collects sixteen previously published articles on fatalism truths about the future and the relationship between divine foreknowledge and human freedom and includes a substantial introductory essay and bibliography Many of the pieces collected here build bridges between discussions of human freedom and recent developments in other areas of metaphysics such as philosophy of time Ideal for courses in free will metaphysics and philosophy of religion Freedom Fatalism and Foreknowledge will encourage important new directions in thinking about free will time and truth

The Mirage of China Xin Liu, 2009 Today's world is one marked by the signs of digital capitalism and global capitalist expansion and China is increasingly being integrated into this global system of production and consumption As a result China's immediate material impact is now felt almost everywhere in the world however the significance and process of this integration is far from understood This study shows how the a priori categories of statistical reasoning came to be re born and re lived in the People's Republic as essential conditions for the possibility of a new mode of knowledge and governance From the ruins of the Maoist revolution China has risen through a mode of quantitative self objectification As the author argues an epistemological rift has separated the Maoist years from the present age of the People's Republic which appears on the global stage as a mirage This study is an ethnographic investigation of concepts of the conceptual forces that have produced and been produced by two forms of knowledge life and governance As the author shows the world of China contrary to the common view is not the Chinese world it is a symptomatic moment of our world at the present time

Multinational Firms, Innovation and Productivity D. Castellani, Davide Castellani, Antonello Zanfei, 2006 The book assumes an original place in the literature Castellani and Zanfei show that the economic impact of MNEs on innovation and productivity depends on evolutionary features of firms and industries particularly on the heterogeneity of firm strategies and behaviours this volume contains high quality well written research Simona Iammarino Research Policy this book offers the reader a well written and very comprehensive analysis on the link between innovation and internalization which leads to insights into firm heterogeneity The authors have succeeded in synthesizing the vast body of theoretical and empirical research and given an up to date overview of the various issues involved This is then complemented with their own research findings The book will undoubtedly enrich the debate on the behavior and impact of MNEs Yama Temouri Journal of International Business Studies Davide Castellani and Antonello Zanfei two well known Italian economists have brought forth an excellent new book I think this book will serve as a starting point for many interesting studies both because of its findings and because of its empirical and theoretical rigour the book lays an excellent and empirically well founded foundation that

opens the way for what we need most in research on the international innovatory activities and R D configurations of MNCs intrafirm data and the study of intrafirm processes configurations and specific interactions with the host country environment The book to me is an important step in moving innovation research forward in this direction I am sure that this book will serve as a thought provoking starting point for many future studies on firms international innovatory activities and therefore recommend it without any reservation Marcus M Keupp Creativity and Innovation Management Castellani and Zanfei have developed an original and comprehensive analysis of the role of multinational firms in the transfer creation and diffusion of technology By developing their view of the multinationals as double network institutions the authors provide new insights on a variety of key issues at the frontier of economics of international production and innovation This book is thought provoking incisive and topical and should be required reading for both economists and policymakers alike Rajneesh Narula University of Reading UK Castellani and Zanfei present an in depth theoretical and empirical analysis of the key issues underpinning the relationship between innovation and multinationality This book is strongly recommended reading for any researcher working on innovation or multinationality or the interface between the two Grazia Ietto Gillies London South Bank University UK This book gets to the root of how and why multinational firms differ in the cross border creation transfer and diffusion of technology and provides fresh evidence on the effects that these differences have on productivity and innovation in the economic systems in which they are active Davide Castellani and Antonello Zanfei consider multinationals as heterogeneous institutions that combine internal networks of subsidiaries with external networks of collaborative linkages to bridge different economic and innovation systems They examine heterogeneity in productivity and innovative behaviour between multinational and national firms as well as across and within multinationals The authors argue that not every foreign firm is a good source of externality and not every domestic firm is equally well placed to benefit from multinationals It is shown that spillovers from multinationals differ according to the technological profiles embeddedness and linkage creation of both foreign and domestic firms active in local markets The book supports this view with empirical evidence based on illustrative case studies and on econometric analysis using extensive firm level datasets on multinationals

Knowledge, Belief, and Character Guy Axtell, 2000 There have been many books over the past decade including outstanding collections of essays on the topic of the ethical virtues and virtue theoretic approaches in ethics But the professional journals of philosophy have only recently seen a strong and growing interest in the intellectual virtues and in the development of virtue theoretic approaches in epistemology There have been four single authored book length treatments of issues of virtue epistemology over the last seven years beginning with Ernest Sosa's Knowledge in Perspective Cambridge 1991 and extending to Linda Zagzebski's Virtue of the Mind Cambridge 1996 Weighing in with Jonathan Kvanvig's The

Intellectual Virtues and the Life of the Mind 1992 and James Montmarquet's Epistemic Virtue and Doxastic Responsibility 1993 Rowman Littlefield has had a particularly strong interest in the direction and growth of the field To date there has been no collection of articles directly devoted to the growing debate over the possibility and potential of a virtue epistemology This volume exists in the belief that there is now a timely opportunity to gather together the best contributions of the influential authors working in this growing area of epistemological research and to create a collection of essays as a useful course text and research source Several of the articles included in the volume are previously unpublished Several essays discuss the range and general approach of virtue theory in comparison with other general accounts What advantages are supposed to accrue from a virtue based account in epistemology in handling well known problems such as Gettier and Evil Genie type problems Can reliabilist virtue epistemology handle skeptical challenges more satisfactorily than non virtue centered forms of epistemic reliabilism Others provide a needed discussion of relevant analogies and disanalogies between ethical and epistemic evaluation The readings all contribute
