Our Dynamic Society:

The Michigan Technic ,1937 *Longrun Dynamics* G. Snooks,1998-04-08 Longrun Dynamics is a ground breaking work that begins where the author s *Economics without Time* 1993 left off It employs the inductive method proposed by J S Mill to develop a general dynamic theory that integrates the separate disciplines of economic growth economic fluctuations and political decision making The central feature of this general theory is dynamic demand which provides both a realist form for the model and a new explanation of macroeconomics variables The general theory also provides an entirely new basis for policy and is designed to counter the influence of neo liberalism in economic theory Hearings United States.
