Readings From The New On Nature Physics And Metaphysics In The Modern Novel:

Readings from the New Book on Nature Robert Nadeau, 1981 **Fiction in the Quantum Universe** Susan Strehle, 2000-11-09 In this outstanding book Susan Strehle argues that a new fiction has developed from the influence of modern physics. She calls this new fiction actualism and within that framework she offers a critical analysis of major novels by Thomas Pynchon, Robert Coover, William Gaddis, John Barth, Margaret Atwood, and Donald Barthelme. According to Strehle, the actualists balance attention to questions of art with an engaged meditation on the external actual world. While these actualist novels diverge markedly from realistic practice, Strehle claims that they do so in order to reflect more acutely what we now understand as real. Reality is no longer realistic in the new physical or quantum universe; reality is discontinuous, energetic, relative, statistical, subjectively seen, and uncertainly known. All terms taken from new physics. Actualist fiction is characterized by incompleteness, indeterminacy, and open endings unsatisfying to the readerly wish for fulfilled promises and completed patterns. Gravity's Rainbow, for example, ends not with a period but with a dash. Strehle argues that such innovations in narrative reflect on twentieth-century history, politics, science, and discourse.

Readings from the New Book on Nature Robert Nadeau, 1981 Memory and Identity in Modern and Postmodern American Literature Lovorka Gruic Grmusa, Biljana Oklopčić, 2022-09-16 This book discusses how American literary modernism and postmodernism interconnect memory and identity and if and how the intertwining of memory and identity has been related to the dominant socio-cultural trends in the United States or the specific historical contexts in the world. The book's opening chapter is the interrogation of the narrator's memories of Jay Gatsby and his life in F. Scott Fitzgerald's *The Great Gatsby*. The second chapter shows how in William Faulkner's *Light in August*, memory impacts the search for identities in the storylines of the characters. The third chapter discusses the correlation between memory, self, and culture in Tennessee Williams's *A Streetcar Named Desire*. Discussing Robert Coover's *Gerald's Party*, the fourth chapter reveals that memory and identity are contextualized and that cognitive processes including memory are grounded in the body's interaction with the environment, featuring dehumanized characters whose identities appear as role plays. The subsequent chapter is the analysis of how Jonathan Safran Foer's *Everything Is Illuminated* deals with the heritage of Holocaust memories and postmemories. The last chapter focuses on Thomas Pynchon's *Against the Day*, the reconstructive nature of memory, and the politics and production of identity in Southeastern Europe.

Reading America Elizabeth Boyle, 2009-03-26 This specially commissioned volume of essays offers a refreshing and unusual perspective on classic novels from the American literary canon. Accessible to students, scholars, and the interested reader, this engaging collection explores familiar novels through unfamiliar lenses and, in so doing, sheds light on surprising and previously overlooked aspects of each text. *Reading America* presents a new approach to American literature by showcasing a cross-section of recent research into previously untapped areas of interest. Each chapter attempts to re-read classic American texts using new or unorthodox theoretical frameworks, including such diverse

topics as an Emersonian reading of Don DeLillo decoding Thomas Pynchon with eco criticism and understanding Paul Auster's New York Trilogy by exploring the graphic novel version of City of Glass Other authors explored in this way include Henry James Truman Capote Ralph Ellison Toni Morrison Joyce Carol Oates and F Scott Fitzgerald This type of approach widens the reader's knowledge of each well known text and encourages new critical evaluations of contemporary American literature The collection moves through six large topic areas from Naturalism and an idea of the Great American Novel at the end of the nineteenth century through politics sexuality language and nature to a contemporary engagement with postmodernism Each essay deals with its own particular subject and author but the full impact of each on the notion of the American novel as a phenomenon can only be understood when read in conjunction with the others Of interest to both undergraduate and postgraduate students Reading America would be a valuable asset to any American Studies or American Literature degree course and a useful companion to American History or Politics courses The volume will also attract strong interest from established academics especially those researching the fields of literature critical theory cultural history and politics

Jeff and I met when I was a graduate student at the University of Minnesota and he was a post doctoral fellow first in the Chemistry Department and then in the Center for Philosophy of Science Later we were colleagues at Western Ontario Our friendship and collaboration owe a great deal to both these institutions In the mid 1960s the Center enjoyed great success under Feigl's directorship The history of the Center has been only very partially documented Feyerabend's recollections reported in his Autobiography and some years earlier in his remarks for Feigl's Festschrift possess an immediacy that makes them particularly noteworthy even if all too brief The Center was the first American institution of its kind and a bastion of positivist and neo positivist thought At the time Jeff and I were there the staff included in addition to Feigl and Maxwell Paul Meehl Roger Steuwer and Keith Gunderson There were many enthusiastic graduate students and there was participation on occasion from the members of the Philosophy Department as well as the departments of physics psychology mathematics and chemistry The extent to which this to us ideal environment was held together by the force of Feigl's personality became evident only many years later The political liberalism of the Viennese Positivists was very much reflected in the philosophical atmosphere Feigl created an atmosphere that was marked by openness collegiality and intellectual freedom Combined with its excellent permanent faculty and steady stream of distinguished visitors the Center was especially well suited to Jeff's and my early friendship our analytic and speculative interests and our early collaboration This collaboration was continued when we were members of the Philosophy Department at Western Ontario

Designs of Darkness in Contemporary American Fiction Arthur M. Saltzman, 2016-11-11 In Designs of Darkness Arthur M Saltzman examines some of the ways in which fiction has traditionally conspired to promote a goal oriented vision of the work of art and explores the ways in which postmodern or postrealist fiction consistently and unavoidably subverts the clarity of this vision Offering

readings of works by well known authors including Barthelme Doctorow DeLillo and Hakes as well as works by lesser known writers Auster Gangemi Saltzman concentrates on the breakdown of epiphany in recent fiction both as philosophical motive and as structural foundation In contemporary fiction Saltzman contends ambiguities blossom far beyond our capacities to stabilize summarize or restore them to sense The old rules of the game in which a reader looking for truth can expect come sort of satisfactory resolution no longer apply Literature now comes out of the answerless Designs of Darkness in Contemporary American Fiction is a valuable new resource for scholars and students of contemporary literature

American Literature and Science Robert Scholnick,2021-10-21 Literature and science are two disciplines are two disciplines often thought to be unrelated if not actually antagonistic But Robert J Scholnick points out that these areas of learning up through the beginning of the nineteenth century were understood as parts of a unitary endeavor By mid century they had diverged but literature and science have continued to interact conflict and illuminate each other In this innovative work twelve leaders in this emerging interdisciplinary field explore the long engagement of American writers with science and uncover science s conflicting meanings as a central dimension of the nation s conception of itself Reaching back to the Puritan poet minister physician Edward Taylor who wrote at the beginning of the scientific revolution and forward to Thomas Pynchon novelist of the cybernetic age this collection of original essays contains essential work on major writers including Franklin Jefferson Poe Emerson Thoreau Twain Hart Crane Dos Passos and Charles Olson Through its exploration of the ways that American writers have found in science and technology a vital imaginative stimulus even while resisting their destructive applications this book points towards a reconciliation and integration within culture An innovative look at a neglected dimension of our literary tradition American Literature and Science stands as both a definition of the field and an invitation to others to continue and extend new modes of inquiry
