Redefining Urban and Suburban America Bruce Katz, Robert E. Lang, 2004-05-13 The early returns from Census 2000 data show that the United States continued to undergo dynamic changes in the 1990s with cities and suburbs providing the locus of most of the volatility Metropolitan areas are growing more diverse especially with the influx of new immigrants the population is aging and the make up of households is shifting Singles and empty nesters now surpass families with children in many suburbs The contributors to this book review data on population race and ethnicity and household composition provided by the Census s short form and attempt to respond to three simple queries Are cities coming back Are all suburbs growing Are cities and suburbs becoming more alike Regional trends muddy the picture Communities in the Northeast and Midwest are generally growing slowly while those in the South and West are experiencing explosive growth Warm dry places grew Cold wet places declined note two authors Some cities are robust others are distressed Some suburbs are bedroom communities others are hot employment centers while still others are deteriorating And while some cities cores may have been intensely developed including those in the Northeast and Midwest and seen population increases the areas surrounding the cores may have declined significantly Trends in population confirm an increasingly diverse population in both metropolitan and suburban areas with the influx of Hispanic and Asian immigrants and with majority populations of central cities for the first time being made up of minority groups Census 2000 also reveals that the overall level of black to nonblack segregation has reached its lowest point since 1920 although high segregation remains in many areas **Redefining Urban and Suburban America** explores these demographic trends and their complexities along with their implications for the policies and politics shaping metropolitan America The shifts discussed here have significant influence **Redefining Urban and Suburban America** Bruce Katz, Robert Lang, 2003 Probes trends in migration income and poverty and housing in the nation s largest cities and metropolitan areas using data from the long form of the 2000 census Provided by publisher

immigration places such as Atlanta Austin Charlotte Dallas Fort Worth Minneapolis St Paul Phoenix Portland Sacramento and Washington D C These places are typical of the newest largest immigrant gateways to America characterized by post WWII growth recent burgeoning immigrant populations and predominantly suburban settlement More immigrants both legal and undocumented arrived in the United States during the 1990s than in any other decade on record That growth has continued more slowly since the Great Recession nonetheless the U S immigrant population has doubled since 1990 Many immigrants continued to move into traditional urban centers such as New York Chicago and Los Angeles but burgeoning numbers were attracted by the economic and housing opportunities of fast growing metropolitan areas and their largely suburban settings The pace of change in this new geography of immigration has presented many local areas with challenges social fiscal and political Edited by Audrey Singer Susan W Hardwick and Caroline B Brettell *Twenty First Century Gateways* provides in depth comparative analysis of immigration trends and local policy responses in America s newest gateways The case examples by a group of leading multidisciplinary immigration scholars explore the challenges of integrating newcomers in the specific gateways as well as their impact on suburban infrastructure such as housing transportation schools health care economic development and public safety The changes and trends dissected in this book present a critically important understanding of the reshaping of the United States today and the future impact of

Multiculturalism Question Jack Jedwab, 2016-03-14 Canada s policy of multiculturalism has been the object of ongoing debate since it was first introduced in 1971 Decades later Canadians still seem uncertain about the meaning of multiculturalism Detractors insist that government has not succeeded in discouraging immigrants and their descendants from preserving their cultures of origin undercutting a necessary identification with Canada while supporters argue that immigrant groups abilities to influence their adjustments to Canada has strengthened their sense of belonging Beyond what often seems to be a polarized debate is a broad spectrum of opinion around multiculturalism in Canada and what it means to be Canadian The *Multiculturalism Question* analyzes the policy ideology and message of multiculturalism Several of Canada s leading thinkers provide valuable insights into a crucial debate that will inevitably continue well into the future

The Futures of the City Region Michael Neuman, Angela Hull, 2013-09-13 Does the city region constitute a new departure in urbanisation If so what are the key elements of that departure The realities of the urban in the 21st century are increasingly complex and polychromatic The rise of global networks enabled by supranational administrations both governmental and corporate strongly influences and structures the management of urban life How we conceive the city region has intellectual and practical consequences First in helping us grasp rapidly changing realities and second in facilitating the flow of resources ideas and learning to enhance the quality of life of citizens Two themes interweave through this collection within this broad palette First are the socio spatial constructs and their relationship to the empirical evidence of change in the physical and functional aspects of urban form Second is what they mean for the spatial scales of governance This latter theme explores territorially based understandings of

intervention and the changing set of political concerns in selected case studies In efforts to address these issues and improve upon knowledge this collection brings together international scholars building new data driven cross disciplinary theories to create new images of the city region that may prove to supplement if not supplant old ones The book illustrates the dialectical interplay of theory and fact time and space and spatial and institutional which expands on our intellectual grasp of the theoretical debates on city regions through practical knowing citing examples from Europe the United States Australasia and beyond This book was originally published as a Special Issue of Regional Studies
