China 2035: The End of Capitalism As We Know It Simón Levy, Ma Wukong, 2025-09-11 In *China 2035 The End of Capitalism As We Know It* Simon Levy and Martin Puigal Casal deliver an electrifying and unfiltered account of the world's most misunderstood superpower and how it's quietly dismantling the global order America once built While the U.S. debates elections and Wall Street chases quarterly profits China is playing the long game From the mega projects of the Belt and Road Initiative to a radical new model of economic democracy this book reveals how China isn't just rising it's redefining the rules of success governance and prosperity This is not a book about China It's a book about your future Whether you're a startup founder policymaker or student *China 2035* will challenge everything you think you know about democracy capitalism and global power You'll learn why China's political meritocracy might outperform Western elections how Chinese cities offer lessons in housing infrastructure and technology that Americans can't afford to ignore and what American entrepreneurs must grasp to compete in a post-dollar multipolar world Most importantly you'll discover how the next generation of power will be defined not by bombs or ballots but by bandwidth belief systems and billion person planning Bold uncomfortable and deeply researched this book is the blueprint the West doesn't want you to read But once you open it you won't see the 21st century the same way again This is the book America doesn't want to tell you About China This book doesn't just talk about China it forces America to look in the mirror A groundbreaking analysis of how China's rise is reshaping the rules of power freedom and the global future

Invisible Countries Joshua Keating, 2018-01-01 A thoughtful analysis of how our world's borders came to be and why we may be emerging from a lengthy period of cartographical stasis What is a country While certain basic criteria borders a government and recognition from other countries seem obvious journalist Joshua Keating's book explores exceptions to these rules including self proclaimed countries such as Abkhazia Kurdistan and Somaliland a Mohawk reservation straddling the U S Canada border and an island nation whose very existence is threatened by climate change Through stories about these would be countries efforts at self determination as well as their respective challenges Keating shows that there is no universal legal authority determining what a country is He argues that although our current world map appears fairly static economic cultural and environmental forces in the places he describes may spark change Keating ably ties history to incisive and sympathetic observations drawn from his travels and personal interviews with residents political leaders and scholars in each of these invisible countries
