Reed's Astro-Navigation Tables 2006 Harry Baker, Lt Cdr H. J. Baker, 2005-08 Reed's Astro Navigation Tables is an established book of annual astro navigation tables specifically for yachtsmen. It contains all the information the ocean going sailor needs without the bulk in order to navigate by the sun, moon, planets and stars using tables devised by practical ocean navigators. This book together with a sextant will enable sailors to navigate confidently and safely when out of the sight of land. Nothing I have seen comes near to the sensible format which I see before me. Tom Cunliffe RYA Yachtmaster Examiner author and sailor. Slim, modestly priced volume with clear, easily retrievable information. Cruising Well tried and familiar to many experienced sailors. Reeds Astro Navigation Tables 2019 Andy Du Port, 2018-08-23 Reed's Astro Navigation Tables is an established book of annual astro navigation tables compiled specifically for the needs of yachtsmen. It contains all the information the ocean going sailor needs without the bulk in order to navigate by the sun, moon, planets and stars using tables devised by practical ocean navigators. This book together with a sextant will enable sailors to navigate confidently and safely when out of the sight of land. The book continues to feature the well received additions of the past couple of years including forms to help determine True Altitude for the sun, planets and stars. Reeds Astro Navigation Tables 2026 Kendall Carter, 2025-10-09 The established book of annual astro navigation tables compiled specifically for the needs of boaters. This superbly compact almanac and sight reduction tables contains information the ocean going sailor needs in order to navigate by the sun, moon, stars and planets using tables devised by practical ocean navigators. This book together with a sextant will help sailors to navigate confidently and safely when out of the sight of land. This 2026 edition is completely up to date and continues to feature the well received additions of the past few years including forms to help determine True Altitude for the sun, stars and planets. Calculated Altitude using the versine formula and Azimuth using the ABC Tables as well as a pro forma for calculating Intercept. These tables along with clear and easy to use star ID charts mean you can resolve any calculation you're ever going to need. There is also an introductory section on practising ashore with helpful worked examples as an aide memoire and plenty of space for making notes and calculations. While they should not be relied upon as anyone's sole means of navigation, being so easy to use, Reed's tables encourage active navigation and a better understanding by sailors of where they have been and where to go next, rewarding in itself and essential in the event of GPS failure.

Where the Magic Happens Caspar Craven, 2018-05-17 In June 2009 Caspar and Nichola created a plan to sail around the world with their young children. Most people thought they were crazy. But over the past seven years they've embraced every moment of this momentous chapter of their lives. Five years of planning, the vision, the values, the practicalities, the realities, the excitement, the highs, the lows and the seemingly adventure stopping obstacles led to two

wonderful years of living their dream the magical and the scary enjoying life and learning as a family This is Caspar s story It s a story of a fabulous sailing adventure but it s also so much more than that it s an inspirational tale for all those wishing they could do the same it s a practical guide to show you just how you can make it happen it s a motivational story of leadership and teamwork within a family and it s a funny heart warming tale of slightly unconventional family life The fascinating narrative of Caspar s story is accompanied by useful text features such as tip boxes sidebars and chapter summaries so that the reader can easily extrapolate the necessary nuggets about how they can make the dream a reality
