significantly influenced the Home Fleet's creation. Subsequently the Home Fleet suffered a sustained campaign of criticism by the commander in chief of the Channel Fleet Lord Charles Beresford. This campaign ruined many careers including Beresford's and resulted in the assimilation of the Channel Fleet into the Home Fleet in 1909. From 1910 onward the Home Fleet steadily evolved and became the most important single command in the Royal Navy and the Home Fleet's successive commanders in chief had influence on strategic policy rivaled only by the Board of Admiralty. The last prewar commander of the Home Fleet Admiral Sir George Callaghan achieved this influence by impressing the civilian head of the Admiralty Winston Churchill. A driven reformer Churchill's influence was almost as important as Fisher's. Against this backdrop of political drama *Genesis of the Grand Fleet: The Admiralty, Germany and the Home Fleet 1896-1914* explains how Britain maintained its maritime preeminence in the early twentieth century. As Christopher Buckley describes the fleet sustained Britain and her allies' path to victory in World War I. **Design as Scholarship** Vanessa Svihla, RICHARD

A Generalized Computer-based Audiovisual Authorship System to Support Design, Construction, and Maintenance of Audio-digital Instructional Products for Interactive Computing Janice Marie Bleil, 1979

The Modern Cruiser Robert C. Stern, 2020-03-30 An entertaining and informative review of the evolution of one of the most important classes of warship from the technology of WWII into the missile age Firetrench Cruisers probably vary more in their characteristics than any other warship type and have certainly been subject to the most convoluted development There was always a basic tension between quantity and quality between numbers and unit size but at a more detailed level every one of the naval powers made different demands of their cruiser designers This makes the story of cruiser evolution in the world s major navies fascinating but complex This book sets out to provide a coherent history of the fortunes of this ship type in the twentieth century beginning with a brief summary of development before the First World War and an account of a few notable cruiser actions during that conflict that helped define what cruisers would look like in the post war world The core of the book is devoted to the impact of the naval disarmament treaty process which concentrated to a great extent on attempting to define limits to the numbers and size of cruisers that could be built in the process creating the treaty cruiser as a type that had never existed before and that existed solely because of the treaty process How the cruisers of the treaty era performed in the Second World War forms the final focus of this interesting well written and well grounded book which concludes with a look at the fate of the cruiser type since 1945 Warship International The result is probably the best single volume account of the subject to date
