the world in different ways from different perspectives Representing Reasons Feminist Theory and Formal Logic collects new and old essays that shed light on the underexplored intersection of logic and feminism The papers in this collection cross over many of the traditional divides between continental and analytic philosophy between philosophical reflection and empirical investigation and between empirical investigations with an individual or societal grain of analysis This is possible because Representing Reasons frames the relationship between logic and feminism in terms of issues rather than historical figures or methodologies As such the articles serve as a model for crossing these divides just as they break down the traditional divide between logic and feminism The Gender Question In Education Ann Diller,2018-10-08 In this innovative

book four prominent philosophers of education introduce readers to the central debates about the role of gender in educational practice policymaking and theory More a record of a continuing conversation than a statement of a fixed point of view The Gender Question in Education enables students and practicing teachers to think through to their own conclusions and to add their own voices to the conversation Throughout the authors emphasize the value of a gender sensitive perspective on educational issues and the relevance of an ethics of care for educational practice Among the topics discussed are feminist pedagogy gender freedom in public education androgyny sex education multiculturalism the inclusive curriculum and the educational significance of an ethics of care The multiauthor dialogic structure of this book provides unusual breadth and cohesiveness as well as a forum for the exchange of ideas making it both an ideal introduction to gender analysis in education and a model for more advanced students of gender issues **Religion in Today's World** Melissa

Wilcox,2013-12-19 Religion is a major force in contemporary society It is also one of the least understood social and political influences on individuals and communities In this innovative collection of original essays and classic readings experts explore the significance of contemporary religiosity as a source of meaning and motivation how it unites and divides us and how it is used politically and culturally Readers will be introduced to the broad debates in ways that will equip them to analyze discuss and make their own judgments about religion and society This book should be read by anyone interested in understanding religion as a central source of meaning and politics and is ideally suited for undergraduate teaching on religion and social issues and from a global perspective **Shrinking Violets and Caspar Milquetoasts** Patricia McDaniel,2003-11 Since

World War II Americans attitudes towards shyness have changed The women s movement and the sexual revolution raised questions about communication self expression intimacy and personality leading to new concerns about shyness At the same time the growth of psychotherapy and the mental health industry brought shyness to the attention of professionals who began to regard it as an illness in need of a cure But what is shyness How is it related to gender race and class identities And what does its stigmatization say about our culture In Shrinking Violets and Caspar Milquetoasts Patricia McDaniel tells the story of shyness Using popular self help books and magazine articles she shows how prevailing attitudes toward shyness frequently work to disempower women She draws on evidence as diverse as 1950s views of shyness as a womanly virtue to

contemporary views of shyness as a barrier to intimacy to highlight how cultural standards governing shyness reproduce and maintain power differences between and among women and men *Handbk Research Stud Socl Sci* Chris Skinner, 2006-01-16 First published in 1991 Routledge is an imprint of Taylor Francis an informa company
