Reflections Of Eden My Life With The Orangutans Of Barneo:

Reflections of Eden Biruté Marija Filomena Galdikas, 1996 Since 1971 Birute Galdikas has lived and worked in the forests of Borneo documenting the lives of the orangutans This text describes her groundbreaking scientific and conservation work that has been recorded in more than a dozen television documentaries *Tears of the Cheetah* Stephen J. O'Brien, 2015-10-27 The history of life on Earth is dominated by extinction events so numerous that over 99.9% of the species ever to have existed are gone forever If animals could talk we would ask them to recall their own ancestries in particular the secrets as to how they avoided almost inevitable annihilation in the face of daily assaults by predators climactic cataclysms deadly infections and innate diseases In *Tears of the Cheetah* medical geneticist and conservationist Stephen J O'Brien narrates fast moving science adventure stories that explore the mysteries of survival among the earth's most endangered and beloved wildlife Here we uncover the secret histories of exotic species such as Indonesian orangutans humpback whales and the imperiled cheetah the world's fastest animal which nonetheless cannot escape its own genetic weaknesses Among these genetic detective stories we also discover how the Serengeti lions have lived with FIV the feline version of HIV where giant pandas really come from how bold genetic action pulled the Florida panther from the edge of extinction how the survivors of the medieval Black Death passed on a genetic gift to their descendants and how mapping the genome of the domestic cat solved a murder case in Canada With each riveting account of animal resilience and adaptation a remarkable parallel in human medicine is drawn adding yet another rationale for species conservation mining their genomes for cures to our own fatal diseases *Tears of the Cheetah* offers a fascinating glimpse of the insight gained when geneticists venture into the wild

industry conservation efforts and society at large Facing the Wild is the first serious empirical examination of why people seek out animals in their natural environment what the desire for this experience tells us about the meanings of animals nature authenticity and wilderness in contemporary industrialized societies and whether visitors change their environmental perspectives and behaviour as the custodians of wildlife parks would like them to The book explores the contradictions and ambivalence that so many people experience in the presence of wild nature in loving it we may diminish it and in the act of wanting to see it we may destroy it Ultimately the book makes a case for respectful stewardship of a hybrid nature and provides insight for both practitioners and ecotourists alike

The Case Against the Sexual Revolution Louise Perry,2022-05-16 Ditching the stuffy hang ups and benighted sexual traditionalism of the past is an unambiguously positive thing The sexual revolution has liberated us to enjoy a heady mixture of erotic freedom and personal autonomy Right Wrong argues Louise Perry in her provocative new book Although it would be neither possible nor desirable to turn the clock back to a world of pre 60s sexual mores she argues that the amoral libertinism and callous disenchantment of liberal feminism and our contemporary hypersexualised culture represent more loss than gain The main winners from a world of rough sex hook up culture and ubiquitous porn where anything goes and only consent matters are a tiny minority of high status men not the women forced to accommodate the excesses of male lust While dispensing sage advice to the generations paying the price for these excesses she makes a passionate case for a new sexual culture built around dignity virtue and restraint This counter cultural polemic from one of the most exciting young voices in contemporary feminism should be read by all men and women uneasy about the mindless orthodoxies of our ultra liberal era Also available as an audiobook narrated by the author
