The Reflective Journey Toward Order Marion Montgomery, 2008-10-01 This book embodies a sequence of closely related essays which explore the modern poet's uneasy awareness of a tradition the romantic tradition with which he must contend The author's premise is that the romantic age extends from The Divine Comedy through Wordsworth to Eliot The roots of contemporary questions about the self and alienation are seen to extend at least as far back as Dante who is the first poet to choose the ego as a focus for poetry of epic dimensions In the course of the study Montgomery considers the growing emphasis upon the self's becoming the focus of poetry until this shift culminated in the literature of the most autobiographical century in western letters the twentieth Dante Wordsworth and Eliot are discussed at length individually and in relation to one another as principal instances of the reflective poet The critic also considers other illustrative figures such as Milton Coleridge Keats Whitman Pound Joyce and Hemingway These and other writers have traveled along the romantic road anticipated by The Divine Comedy Finally the author suggests the road may end in a labyrinth so far as the contemporary writer is concerned In his increasing concern with the problems of the self and of the mind the poet has been forced to invent new modes and techniques which as the author demonstrates grow out of his response to the psychological and metaphysical preoccupations of his age

The Enlightenment of Sympathy Michael L. Frazer, 2010-08-18 The Enlightenment of Sympathy reclaims the sentimentalist theory of reflective autonomy as a resource for enriching social science normative theory and political practice today The sentimentalist description of the reflective process is more empirically accurate than the competing rationalist description and can guide scientists investigating the processes by which the mind formulates moral and political principles Yet the theory is much more than merely descriptive and can also contribute to the philosophical project of finding principles including principles of

justice that wield genuine normative authority Enlightenment sentimentalism demonstrates that emotion is necessarily central to our civic life and shows how our reflective sentiments can counterbalance the unreflective feelings that might otherwise lead our political principles astray *Handbook of Reflection and Reflective Inquiry* Nona Lyons, 2010-04-07 Philosophers have warned of the perils of a life spent without reflection but what constitutes reflective inquiry and why it is necessary in our lives can be an elusive concept Synthesizing ideas from minds as diverse as John Dewey and Paulo Freire the *Handbook of Reflection and Reflective Inquiry* presents reflective thought in its most vital aspects not as a fanciful or nostalgic exercise but as a powerful means of seeing familiar events anew encouraging critical thinking and crucial insight teaching and learning In its opening pages two seasoned educators Maxine Greene and Lee Shulman discuss reflective inquiry as a form of active attention Thoreau's wide awakeness an act of consciousness and a process by which people can understand themselves their work particularly in the form of life projects and others Building on this foundation the *Handbook* analyzes through the work of 40 internationally oriented authors Definitional issues concerning reflection what it is and is not Worldwide social and moral conditions contributing to the growing interest in reflective inquiry in professional education Reflection as promoted across professional educational domains including K 12 education teacher education occupational therapy and the law Methods of facilitating and scaffolding reflective engagement Current pedagogical and research practices in reflection Approaches to assessing reflective inquiry Educators across the professions as well as adult educators counselors and psychologists and curriculum developers concerned with adult learning will find the *Handbook of Reflection and Reflective Inquiry* an invaluable teaching tool for challenging times **Nineteenth-Century Nation Building and the Latin American Intellectual Tradition** Janet Burke, Ted Humphrey, 2007-02-28 This volume provides readings from the works of eighteen Latin American thinkers of the nineteenth century who were engaged in articulating and examining the problems that Spanish and Portuguese America faced in the one hundred years after securing independence The selections represent all major regions of Latin America Although these regions differ significantly with regard to indigenous background geography climate and available resources their people confronted the common problems that surround the intractable challenges of statecraft and nation building issues of race international relations economics education and self understanding Burke and Humphrey provide fresh accessible translations of key works a majority of which appear for the first time in English a General Introduction that sets the works in historical and intellectual context detailed headnotes for each selection a Guide to Themes and bibliographic references **Power and Justice** Xudong Zhao, 2019-04-10 This book discusses the relationship interaction and conflict between everyday life and various institutions in a specific village in North China with a focus on the formal and informal legal systems It vividly describes the village's legal construction problems as well as the customs and laws and such it can be seen as a historical and innovative comment on China's problems The book is based on the author's field investigations assessing vast amounts of material concerning
